

Vulcan Seals Type 1688Z

S.P.X. Johnson®

Technical Data Sheet

Product Description

The Vulcan Seals Type 1688Z S.P.X. Johnson® 'O'-ring mounted wave spring seals are available with bi-elastomeric stationaries, to suit "Top Lobe®" series lobe rotor pumps.

Please note; We offer other specific design seals to suit SPX Johnson pumps, such as our Vulcan Seals Type 1649 to suit "Top Wing®" and our Vulcan Seals Type 1698 to suit "SQ®" series pumps.

Please contact us with your requirements and for stock availability on these.

Why Choose the Vulcan Seals Type 1688Z S.P.X. Johnson®?

The Vulcan Seals Type 1688Z S.P.X. Johnson® is a single wave-spring seal with distinctive bi-elastomeric (twin 'O'-Ring) stationaries located into the stationary recess of this range of rotary lobe pumps. Each pump will require two seals, one for each drive shaft to the twin rotary lobes.

Pump Ranges

The S.P.X. Johnson® pump model includes the following pump ranges: "TL-Series" rotary lobe pumps.

Compliance & Certificates

The Vulcan Seals mechanical seal range can be supplied with material combinations designed to meet the compliance standards and certifications listed above. Additional compliance or regulatory requirements can also be considered upon request. Please enquire to discuss your specific application.

Standard Face Material Combinations

Elastomers	Rotary Face	Stationary Face	Metals	Complete Material Code
EP	VTN2 Tungsten Carbide	VTN1 Tungsten Carbide	304 Stainless Steel	.E.H.
EP	304 Stainless Steel	VCP1 Carbon	304 Stainless Steel	.E.P.
