

Using Repertoire

Congratulations! You are ready to begin using Repertoire. Repertoire is a software program that will allow you to view your commissions and other key components that are entered in your Back-Office Software system. It is accessible over the Web.

Your Broker Dealer should have sent you an email with three things:

1. Your User Name (this is the same as your rep id)
2. Your temporary Password – Welcome1!
3. A URL (web address) to access the Repertoire Program

<http://KWUS.reps.artisansoftware.com>

Enter your User Name - this will be your rep id.

Enter your Temporary Password. It should be Welcome1!

The program will now ask you to change your password. This will be your permanent password. It can be letters and numbers, it will be case sensitive.

You are ready to use Repertoire!
