Credit Ratings

Portfolio Composition**

Credit Quality**

If a facility does not have an official public credit rating, Manning Asset Management engages an independent external agent to provide a rating. This rating is determined using a methodology akin to those employed by S&P or Moody’s for public RMBS or ABS transactions. For this assessment, it is assumed that the facility is fully drawn.

**For rated transactions, exposures are assigned the rating provided by an independent third party, such as S&P or Moody's. For unrated transactions, Manning employs an independent external agent to apply credit rating methodology to certain fund holdings. The methodology determines the credit rating for varying levels of risk within a single tranche or between different tranches. The methodology determines the minimum required credit enhancement necessary for various ratings. These required credit enhancement levels are determined based on several factors, including performance of the asset class and the characteristics of the loan portfolio. These minimum credit enhancement requirements are used to determine the rating breakdown of each exposure held by the Fund. The charts show the portfolio holdings as at 30 November 2025 and credit ratings as at 30 September 2025.
