

# AI Denial Automation Agent

*Always-On Intelligence for Revenue Cycle Teams*

The Denial Automation Agent is an AI-powered assistant that transforms how health systems recover lost revenue. By automatically identifying, correcting, and resubmitting denied claims, it reduces manual work, accelerates cash flow, and improves the financial health of every organization it supports.

## Supporting Claims Across the Healthcare Ecosystem

Inpatient

Home Health

Outpatient

Dental

Ambulatory Surgery Centers

Federally Qualified Health Centers

- 1.0 Pulls denied claims directly from your EMR or billing system
- 2.0 Fixes denials using proprietary AI correction models
- 3.0 Writes back corrected claims for audit-ready visibility
- 4.0 Resubmits to payers automatically

Give your RCM teams the power of agents.

## Built for Measurable Impact on Your Bottom Line

- ✓ **Visibility & Reporting**  
A web-based dashboard provides full transparency into:
  - Denial trends and correction rates
  - Financial recovery metrics
