Nasal Spray with Trehalose (hypertonic)

- Decongests & flushes out excess mucous, allergens, dirt, virus, and bacteria
- Supports reduction of rhinosinusitis induced headaches
- Helps to reduce inflammation
- Reduces allergen induced symptoms (runny nose, sneezing, itching and rhinorrhea)
- Moistens & cleans nasal cavities
- Supports defense against viruses and bacteria

Decongestion & Protection

Non-allergic rhinitis

Allergic rhinitis

Above 12 years

Medical Device Class I

Natural Sea Salt, Trehalose, Glycerol, Purified Water

24 months / 3 months

Nasal Spray with Propionate (isotonic)

- Suitable for the treatment of acute, unspecific nasal discomfort, especially in the case of a congested nose
- Immediate effect, direct after application
  Favorable safety profile
- Supports the nose's natural cleansing function, helping to defend against bacteria, viruses, and pollen, and contribute to its protective role
- Used for relieving nasal discomfort, including congestion, itching, sneezing, and a runny nose, without the risk of addiction
- Can also be used to treat symptoms of nasal congestion during weaning from addictive nasal sprays

Gentle relief from nasal discomforts

Non-allergic rhinitis

Allergic rhinitis

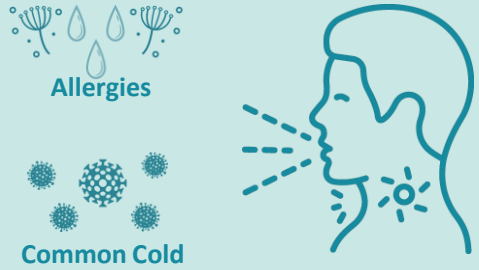

- Infants above 1 year & adults
- Medical Device Class I
- Locke-Ringer Solution, Sodium Propionate
- 36 months / 6 months

Mouth and Throat Spray with Propionate

- Intended for use in sore throat and can positively influence the mucosa of mouth, throat and pharynx in both adults and children.
- Can reduce the risk of bacterial and viral infections
- Soothes mucous membranes in the throat and moistens oral mucous membranes
- Reliefves from sore & dry throat and sore mouth
- Cleans the throat from irritants & pollutants

Soothing relief

- Infants above 1 year & adults
- Medical Device Class I
- Locke-Ringer Solution, Sodium Propionate
- 36 months / 6 months

Ear Spray with Propionate

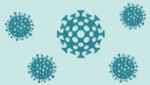

- Suitable for individuals prone to recurrent cerumen accumulation, including hearing-aid users, swimmers, and individuals with narrow ear canals
- Helps to alleviate symptoms associated with cerumen impaction, such as a feeling of fullness, reduced hearing, and itching
- Effectively softens cerumen through a physical cerumenolytic effect
- Cleansing and care of the external auditory canal
- Effective as a cerumenolytic and facilitates irrigation procedures by softening obstructive cerumen
- Restores the protective function of the outer acoustic meatus
- Improves visibility of the external auditory canal prior to otoscopic examination

Physical cerumen management for the external auditory canal

Allergies

Common Cold

Infants above 1 year & adults

Medical Device Class I

Locke-Ringer Solution, Sodium Propionate

36 months / 3 months

SoftBreezer® with 0.9% NaCl (isotonic)

- Moisturizes upper & lower airways
- Supplementary treatment of colds, hay fever, asthma, COPD
- Prevents discomfort in the airways
- Supports natural cleaning process of respiratory tract
- Positive effect when exposed to dust & air pollution

Gentle moisturization for airways

- Children above 6 years & adults
- Medical Device Class IIa
- Sodium Chloride, Purified Water
- 36 months / 3 months

SoftBreezer® with 3% NaCl (hypertonic)

- Dissolves viscous mucous in lower airways
- Facilitates clearing of the respiratory tract
- Supportive treatment of cystic fibrosis, obstructive bronchitis, acute viral bronchiolitis, COPD, bronchiectasis, etc.

Gentle & effective inhalation

- Children above 6 years & adults
- Medical Device Class IIa
- Sodium Chloride, Purified Water
- 36 months / 3 months

SoftBreezer® with 6% NaCl (hypertonic)

- Dissolves viscous mucous in lower airways
- Facilitates coughing up
- Facilitates clearing of the respiratory tract
- Supportive treatment of cystic fibrosis, obstructive bronchitis, acute viral bronchiolitis, COPD, bronchiectasis, etc.

Powerful & lasting inhalation

Children above 6 years & adults

Medical Device Class IIa

Sodium Chloride, Purified Water

36 months / 3 months

Breease® & MiniBreease®

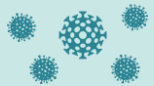

Inhalation device in the shape of a pacifier

- Filters the air inhaled through the mouth
- Supports breathing during mouth breathing periods (e. g. during episodes of infantile nasal congestion)
- Breease® can be combined with inhalation devices (e. g. SoftBreezer®, Ecomyst) using an adapter
- Hypoallergenic and free from BPA, phthalates, lead, PVC

Allergies

Common Cold

Babies and toddlers

Medical Device Class I

24 months

Food Supplements
(ready-to-market)

Mouth and Throat Spray with Melatonin

- Helps to shorten the time to fall asleep
- Alleviates the subjective sensation of jet lag
- Melatonin is known to improve sleep quality

Sleep management
