Solutions Handbook

# Creating Exceptional Workplace Experiences with Neat Technology.

# Welcome to tomorrow's workplace.

From hybrid-ready boardrooms to intuitive hot desks, we help create workspaces that actually work.

Offices are in a state of flux; they require cutting-edge technology to cater efficiently to an ever-evolving workforce. With workers now collaborating remotely and beyond, office tech must be upscaled and flexible enough for dynamic working styles.

Modern collaboration succeeds only when every participant - remote or in-room - can see, hear and co-create without friction. Neat's AI-optimised cameras, beamforming mics, and real-time environmental sensing

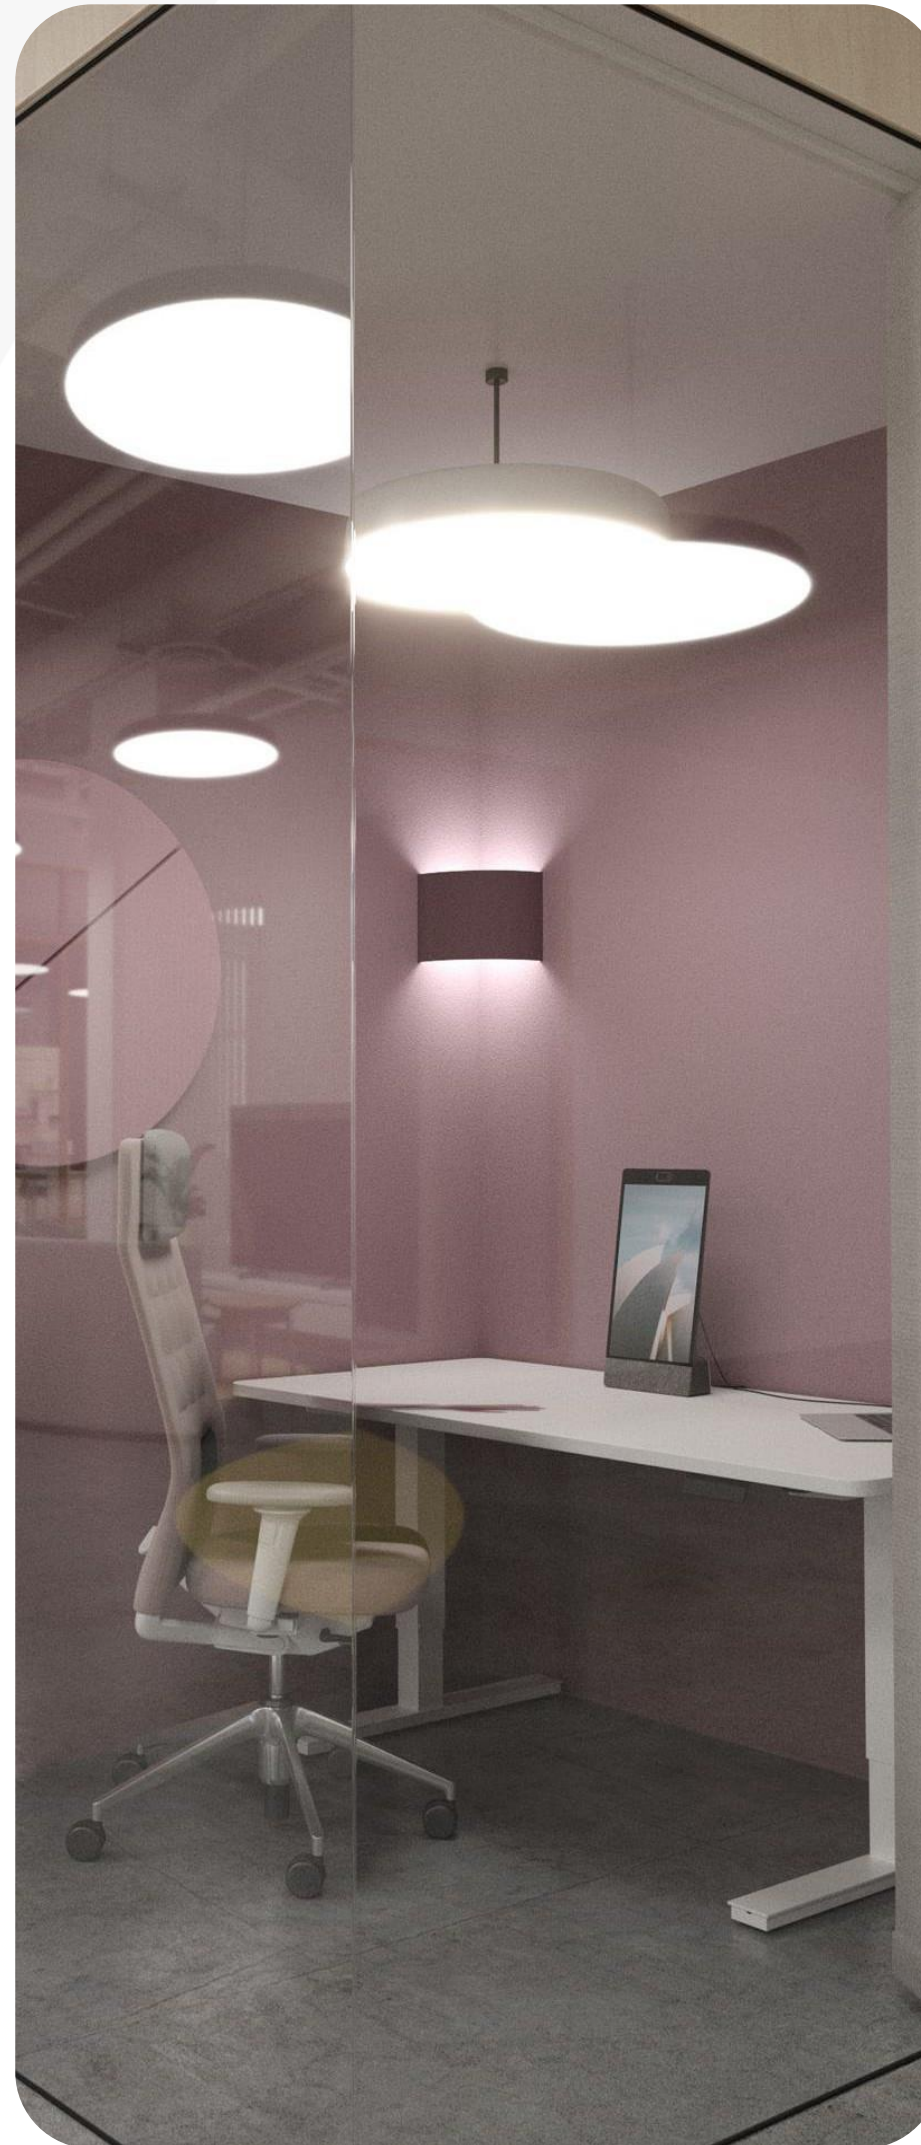

make that equity tangible, room after room.

Neat devices are designed for simplicity, ease of use in an elegant form factor that fosters collaboration, equity, and flexibility.

Pro AV Solutions and Neat have been partnering with Australian businesses to design and deploy seamless workplace collaboration experiences across sectors, across spaces, and across the country.

## Neat solutions for the entire office:

- Lobby
- Hallway
- Hot desking
- Focus room
- Huddle space
- Medium space
- Large meeting space
- Video centric
- Common area
- Open office
- Training room
- Creative workshop
- Personal office

# Lobby

Allow visitors and employees to connect face to face with a helpful virtual receptionist or IT support person. The small footprint of the Neat Frame allows for easy placement, while still allowing users to reach out for assistance or reserve available workspaces in the office.

## Device

Neat Frame

- Portrait-mode Neat Frame keeps eye-level contact with visitors while occupying less than an A4 footprint, perfect for tight reception counters.
- Remote teams can “beam in” via Neat Pulse for real-time assistance, reducing onsite reception costs by up to 40 %.

# Hallway

Finding a room to take a spontaneous meeting can be like going on a scavenger hunt sometimes.

Adding Neat Pads to help display room availability with LED indicators makes it easier to discover a room to meet. Book that space or reserve another room on the spot.

Flow areas, such as receptions and hallways, where people pass through, are often where people randomly meet and strike up conversations. They can lead to spontaneous meetings and information sharing.

## Device

Neat Pad

- LED side-bars on Neat Pad show room status 15 m away, cutting “meeting-room hunt” time by 25 %.
- Built-in people-count sensors feed your space-utilisation dashboards for continuous optimisation.

## Hot Desking

Workplaces with flexible, reservable, shared, open office environments. The environment might be noisy and the lighting conditions poor. Ideally, you'll want to have phone calls or meetings on a device that provides crystal clear audio and video and has a range of other cutting-edge capabilities that allow for maximum efficiency, privacy and seamless compatibility with your laptop.

### Devices

Neat Frame

Neat Bar

- 15.6" portrait screen delivers “phone-like” intimacy that encourages fast decision-making for 1-to-1s.
- 450-nit display and 113° FOV camera capture every expression, even in low light.

- Neat Frame auto-frames the speaker and suppresses keyboard noise, so desks stay distraction-free even in open offices.
- One-tap log-out via Neat Pulse means the next user starts with a clean, secure profile.

## Focus Room

Small rooms that offer a private and secluded space for focused in-person and remote teamwork are great for an adhoc meeting or phone call. But limited desk space requires an equally small footprint device. What you need in a focus room is sharp audio and video, maximum efficiency, and a seamless wireless companion for your laptop.

# Huddle Space

Collaborate and brainstorm in smaller meeting spaces ideal for small groups of 3-5 people. Take a quick huddle with devices built to easily enable a hybrid work session. Instantly start a meeting or share content with HD audio video optimised for the room. You can also take a phone call or dial into a conference bridge.

Flexible and dynamic small huddle rooms for informal in-person and remote engagement encourage impromptu meetings and brainstorming sessions, working on documents or whiteboards, where one person or multiple people are sitting, standing or moving around.

## Devices

Neat Board Pro

Neat Board 50

Neat Bar

Neat Pad

Neat Center

Neat Bar 2

- Neat Board 50 and Neat Centre combine dual cameras with spatial audio so whiteboard brainstorming stays clear for remote teammates.
- Touch-to-annotate lets teams save sketches straight into Teams or Zoom chat, no photos required.

# Medium Meeting Space

A versatile meeting room for in-person or hybrid interaction, planned discussions and the sharing of documents should allow round-table dialogue that includes remote participants.

## Devices

Neat Board Pro

Neat Board 50

Neat Bar 2

Neat Pad

Neat Center

- Neat Bar 2 brings 50 MP capture, AI auto-framing and deep noise suppression for boardroom-grade clarity.
- Dual-screen output supports people on one screen, shared content on the other, ideal for project reviews.

# Large Meeting Space

Large rooms enable the gathering of bigger groups comprising both in-room and remote participants.

Typically, they accommodate planned meetings with discussions and presentations and all-inclusive round-table dialogue. The furniture is arranged to give everyone in the room a front-row seat, and the carpet, wall panels and curtains provide acoustic dampening.

## Devices

Neat Bar Pro

Neat Pad

Neat Center

- Neat Bar Pro extends coverage to 10 m rooms with beamforming mics and vibration-cancelled dual speakers—everyone is heard without ceiling arrays.
- Pair with Neat Centre for 360° participant framing in U-shape tables.

# Video-Centered

Video-centered rooms optimised for meetings focused on content and remote participants should allow all in-room participants an unobstructed view of the screen. In addition, natural daylight plus ceiling lights should ensure ideal lighting conditions, with carpet, wall panels and curtains providing acoustic dampening.

## Devices

Neat Bar 2

Neat Bar Pro

Neat Pad

Neat Center

- HDMI & USB-C passthrough enables instant BYOD for Webex, Google Meet or specialist platforms.

# Social Common area

Connecting with people at the office when working from home is vital for fostering a healthy company culture and maintaining well-being.

Chance encounters like catching up with a colleague while they grab a coffee or quickly exchanging ideas over lunch help everyone feel included.

## Devices

Neat Board Pro  
(with adaptive  
stand)

Neat Board 50  
(with adaptive  
stand)

- Wheel-mounted Neat Board Pro turns break out areas into pop-up town-hall venues; dual 50 MP cameras keep both crowd and presenter perfectly framed.

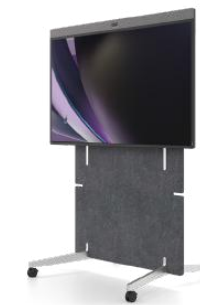

# Open office

Open offices provide employees with work and social areas, inspiring spontaneous meetups, collaborative sessions and agile team exercises. They also prompt personal workspaces reservable via hot desking for ad-hoc syncs with remote colleagues at your desk.

## Devices

Neat Board Pro  
(with adaptive  
stand)

Neat Board 50  
(with adaptive  
stand)

Neat Frame

- Hot-desk kiosks running Neat Frame and desk-booking app via Neat App Hub cut empty-desk rates by 18 %.  
(Source: Neat)

# Training Classroom

Rooms for education, seminars, and training for physical and remote participants should include clear audio and video to empower you to easily hear the teacher or instructional material, whether you're physically there in the room or not. When in-room and remote participants can easily see and hear each other, it creates a heightened sense of community through collaboration and interaction.

## Devices

Neat Bar Pro

Neat Pad

Neat Board Pro  
(with adaptive stand)

Neat Center

- 65" Neat Board Pro anti-glare 4K screen plus Neat Active Marker deliver true digital whiteboarding.

# Creative Workshop

Creative rooms for brainstorming sessions and group work with in-room and remote participants often means the flexible use of furniture and office layout to adapt to changing activities.

## Devices

Neat Board Pro  
(with adaptive stand)

Neat Board 50  
(with adaptive stand)

Neat Pad

Neat Center

- Flexible furniture + Neat's wide-angle camera capture standing brainstorm without manual panning.

# Personal office

For personal workspaces in the office or at home, fewer cables and economical use of space are paramount. Ideally, you'll want to have video meetings or phone calls on a dedicated device that provides crystal clear audio and video and has a range of other cutting-edge collaboration capabilities that pairs with your laptop for maximum productivity.

## Device

Neat Frame

- Privacy shutter, one-button mute and speaker-tracking mics make Neat Frame perfect for C-level calls from home.

# Manage, Monitor & Maximise Every Space

## Maintenance & Support

Neat Pulse is a full-service offering that gives you technical support, an extended warranty, cloud management and monitoring for complete control of all your Neat devices. Providing you with peace of mind, Neat Pulse enables you to configure, maintain and update your devices from anywhere. Plus, if any issues arise, you can rest assured that you'll get priority help from our support specialists and fast device replacement.

## App Hub

Neat App Hub is a pioneering platform that directly connects all the essential apps you rely on in your daily workflows to your Neat devices. Thanks to its adaptability and ever-evolving capacity, Neat App Hub doesn't just help you stay ahead of the curve. It inspires you to redefine it.

Neat App Hub is accessible through Neat Pulse. It enables you to select which apps to make available across your Neat devices or a subset of individual devices. It gives you total control and a customised deployment tailored to a space, team, use case, or function.

- Real-time environmental data (CO<sub>2</sub>, humidity, temperature) helps facilities teams maintain healthy IAQ and hit ESG targets.
- Curate approved third-party apps, whiteboarding, desk booking, signage, per device or room, all from a single dashboard.
