

# Certas SIM cards

Alarm transmission via the Internet does not offer consistent stability. Certas therefore recommends for all IP connections transmission via the mobile phone network as a redundancy channel. To enable this redundancy, all IP transmission devices must be equipped with a SIM card that allows alarm transmission. In addition to the standard SIM card card, we also offer a "back-up SIM card". In the event of a network failure, this automatically falls back to another mobile network in order to establish a secure connection.

## Prices

	Standard SIM card		Back-up SIM card	
Initial costs – Activation fee	CHF	25.00	CHF	26.00
Monthly fee – basic package 100 MB*	CHF	7.00	CHF	8.00

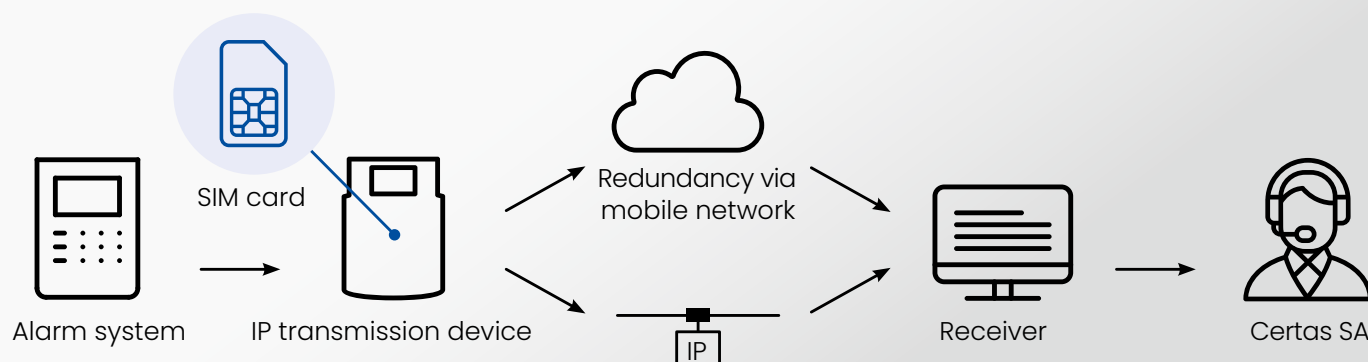

If more data volume is used than is included in the selected price package, this will be charged additionally during the year. Additional communication costs:

«Data»	CHF 0.30/Mo
«SMS»	CHF 0.20/SMS
«Voice»	CHF 0.40/min.

All prices subject to 8.1% VAT. The prices are only valid in conjunction with a Certas AG alarm reception subscription. Any use of the SIM card outside of an alarm transmission device is prohibited and may result in costs and/or deactivation of the SIM card.

\* 1MB corresponds to approximately 300 alarms (according to a test on a standard transmission device – this can vary depending on the transmission device used). This amount does not cover the sending of SMS and voice transmissions.

## Example of an installation
