

Minesweeper

Description

Minesweeper is a simple and well-known video game where your purpose is to walk through the minefield avoiding all the mines. The longer you are able to go without landing on a mine, the more handsome your payout will be!

RTP is 97.8% - 98.4%, based on player selection.

How To Play

You can choose between field sizes of 2x3, 3x6, 4x9, 5x12, and 6x15. To do so, go to game **Settings** and select your preferred size under **Fields**.

1. To begin the game press **START**.
2. Walk through the minefield. Click any square in the highlighted row to choose your next block on the field.
 - If you land on a safe spot, you win. Payouts are given at the bottom of each row and multiplied by total bet. When all levels are reached successfully, then payout will be automatically added to the balance.
 - If you land on a mine, you lose your original wager and any previous winnings.
3. You can cash out at any time by clicking **COLLECT**. But you can also proceed to the next field row for a much greater payout!

Malfunction voids all plays and pays! All unfinished rounds will be terminated every other day. If the game requires “Collect” - “Collect” will take place and the win from the round will be added to the player balance. If the game requires action from a player, the result is counted assuming that the player has chosen the action with no risk without raising the initial bet.

The Game Rules as published on this website are in English. Translations into other languages are provided as a service in good faith. In the event of ambiguity between an English version and a translation, the English version always retains priority.
