

About the game

Fly in a reindeer sled towards a New Year's miracle! Welcome to Gift X! BGaming is happy to introduce a new holiday game with popular mechanics, where you will be able to make a real Christmas flight with Santa Clause and get great gifts!

Make bets and watch your sled fly over X coordinates. Make multiple bets, reach top multipliers and get big winnings. But be cautious, you have to jump off the sled before it flies away. This is the only way for you to get incredible winnings. Good luck!

Rules

The game's goal is to win money by jumping off the reindeer sled until it disappears! The winning is the bet multiplied by the coefficient shown on the screen at the moment you jump out of the sled. You win only if you cash out before the sled disappears!

Betting

Before each game round starts, a countdown timer is displayed on the screen showing the time until the sled is launched.

You can place 1 or 2 bets in each game round! All you need is to push the button "Place Bet" on the screen and select the bet amount. It's possible to place bets before the game round starts (during the countdown) or when it has already started. In the last case, your bet will play in the next round. Note: you can place the bet for the next round only if you are not playing in the current one!

When the game round starts, the sled raises on the screen. You can cash out until it disappears! To cash out you need to push the "Cashout" button.

In the case of bets that contain cents and fractional multipliers, winnings are rounded up in favor of the house.

Rounding works based on the number of subunits. Thus, if you bet 10 cents with a cash out on a x1.01 multiplier, then the winnings will be rounded up to the number of subunits after dot.

In case free rounds are given you can place only 1 bet, during free rounds there is no possibility to place 2 bets simultaneously. You can play at the betting level that was active when the free rounds were given.

Autoplay

There is an Autoplay mode available during the game! To activate it, click on the “Auto” button and select the number of autoruns. Using automode, you can change your bet during the countdown. If you don’t want to change the bet, each autorun will be played with the bet placed before the round starts or the mode is activated.

You can also cash out in the automode. To activate this option, you need to choose the value of the multiplier in the box near the button “Place Bet”. Choosing a certain multiplier value means that you will cash out automatically if the sled will reach it.

To stop the automode, you need to push the Cross button.

Results

You win if you cash out before the sled disappears. In that case, the bet is multiplied by the coefficient shown on the screen at the moment you push the “Cashout” button.

All live results of the game are displayed in the chart. The leader list shows the name of the player and the player’s bet. If a player wins, the value of the player’s bet will be replaced with the value of the winning. The winning multiplier will also be shown on the screen. If you play on your mobile device, you need to open the chart by clicking on the button above the chart.

All results are displayed in the currencies of origin bet. You can convert them to the currency of your bet by changing your personal settings.

License requirements

For the Greek license, the maximum allowable bet in the game is **14 EUR**.

The maximum possible win in the game is **140.000 EUR**.

Return to Player

The overall theoretical Return to Player (RTP) is 96.88% - 98.92% depending on the player’s chosen strategy.

RNG

The game is based on a certified random number generator. For more information, visit our BGaming site.

Additional information

Malfunction voids all plays and pays! All unfinished rounds will be terminated every 24 hours. If the game requires “Collect” - “Collect” will take place and the win from the round will be added to the player balance. If the game requires action from a player, the result is counted assuming that the player has chosen the action with no risk without raising the initial bet.
