

AI-Powered Healthcare Assistants

Empowering healthcare providers to quickly retrieve real-time, context-aware answers from your existing operational knowledge base, for informed decision-making throughout the organization.

Automated document generation, intelligent search and chat to enable:

**Reduced Admin
Burden**

**Efficient Patient
Management**

**Informed Decision
Making**

Enhance healthcare efficiencies with DataQI Assistant

DataQI

**Built for
Enterprises**

**Flexible
Deployment**

Secure by Design

Healthcare Assistant Use Cases

Medication Check

“What’s the dosage guideline for Lipitor, and does it interact with Advil?”

Retrieves dosage, prescribing codes & interaction information

Care Protocol Finder

“What’s the protocol for blood sugar monitoring?”

Searches across protocols and EHR guides to return care steps & escalation guidance

Discharge Planner

“Create a discharge plan for Patient X”

Uses template & clinical notes to create patient-specific discharge plan with care instructions

Pre-Built Healthcare Assistants

Triage Assistant

Guides nurses through symptom intake, flags urgency and recommends next steps.

Instant Chat

Inventory Visibility Assistant

Tracks real-time stock across sites & wards, surfacing what to restock, where, and when.

Intelligent Search

Claims Assistant

Generates pre-filled claim forms with billing codes and visit data.

Document Generator

Privacy First

Data stays private to ensuring compliance and security

Accurate Outputs

Precision outcomes based on your organizational data and defined guardrails.

Competitive Pricing without Compromise

More features at a lower cost than other leading Gen AI platforms.

Connects to Leading Healthcare Applications

Power Healthcare Productivity with 150+ Available Enterprise Connections
