Tips for appointments

ihc
IN YOUR COMMUNITY

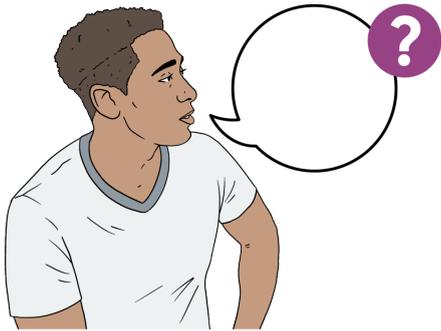

Here are some ideas to help make medical appointments easier:

- Have a list of things you want to talk about.

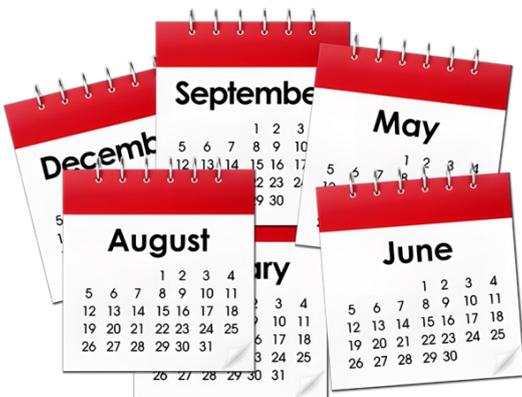

- Have a list of questions you want to ask.

Here are some questions you might like to ask:

- How did you decide what was wrong?

- How long will the problem last?

- What tests can I go for?

- What are my choices for getting help with this?

- How much will that cost?

- How long will I need to wait?

- If a **treatment** is started how long will it take to work?

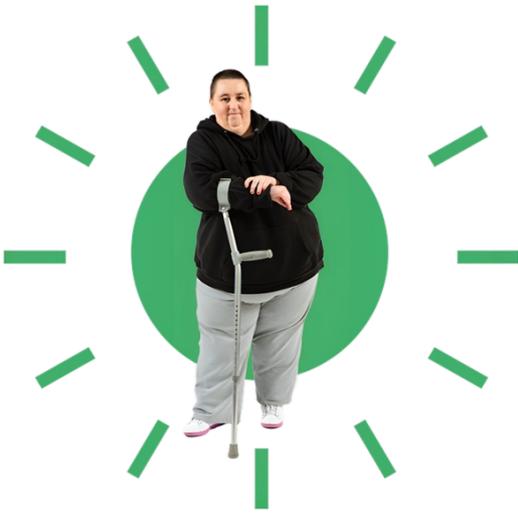

A **treatment** is something that helps you feel better or stay healthy.

It can include things like:

- Taking medicine
- Having an operation
- Changing what you eat or how you live.

- How will we know if the treatment is working?

You can take a support person with you and tell them:

- What you want to happen
- How they can help.
