

Digital Implant Workflow: Efficiency Meets Precision

Date: April 14, 2026

Location: The Underground @ Lakeshore Dental Specialists

Time: 6:00 PM – Dinner & Gather, 6:30 PM – Program Starts

Speaker: Dr. Albert Wesley with Ryan Boutler (TruAbutment)

Support Speaker: Dr. Mustafa Tattan

Advisory Lead: Dr. Mustafa Tattan

Lecture Summary: 🙌 **This is a hands-on course!** Come ready to learn by doing as we dive into the digital implant workflow in real time.

From scan to seat, digital workflows are transforming implant dentistry. In this fast-paced and practical session, Ryan Boutler from TruAbutment will walk us through modern digital workflows for implants, highlighting how to reduce error, improve accuracy, and streamline the restorative process. With clinical insights from Dr. Mustafa Tattan, we'll dive into real-world protocols and tips that bridge the gap between high tech and hands-on private practice.

Course Objectives:

- Understand the complete digital workflow for single and multi-unit implants.
- Learn how to communicate effectively with labs and manage files across platforms.
- Explore common pitfalls in digital implant workflows and how to avoid them.
