# CYERA

# Cyera + Microsoft

Secure your AI transformation with deep data insight and control

Cyera and Microsoft give you the data protection backbone to deploy AI with confidence - across your Microsoft estate and every cloud you use.

## AI accelerates everything. Even your data risks.

Over-permissioned accounts, misapplied labels, and fragmented tools put sensitive data at risk across AI, SaaS, IaaS, and on-prem environments. Together, Cyera and Microsoft give you multi-cloud visibility, precision classification and labeling, and automated remediation at scale.

## Get multi-cloud visibility into your data risks.

Connect to your multi cloud environments and deploy in minutes. Scan, classify, and assesses your data security posture almost immediately.

## Confident Copilot rollouts start with data you can trust.

Discover and classify sensitive data to control what AI tools can access, and ensure only the right data fuels your AI.

## Strengthen your data protection.

Use deep data insights from Cyera and Microsoft to apply accurate labels and extend protection across Azure, Copilot, and M365.

## Accelerate your DLP program.

Automate alert triage, fine-tune label-driven policies, and see the signal through the noise across your entire DLP stack.

# Joint Solutions

## Cyera for Microsoft Azure

See your data risks in Azure and every other cloud with Cyera's Data Security Posture Management (DSPM). Cyera connects agentlessly to 40+ data sources - including Azure, AWS, GCP, SaaS, IaaS, and DBaaS - to:

| | | |
|---|---|---|
| **Assess your data security posture.**<br><br>Reduce your data attack surface with insights from identities, access, encryption, backups, and the location of sensitive data. | **Classify with unmatched breadth and depth.**<br><br>Discover and label files with relevant data classes, and use rich context to determine criticality with 95% precision. | **Automate remediation at scale.**<br><br>Shrink the find-and-fix cycle: eliminate public exposure, correct sensitivity labels, notify owners, and trigger workflows. |

## Cyera for Microsoft 365 Copilot

Secure AI adoption starts with securing data at the source. Cyera discovers and protects sensitive data before 365 Copilot or other AI tools can access or expose it.

| | | |
|---|---|---|
| **Discover AI and secure data access.**<br><br>See which Copilot users and AI accounts can access sensitive data, and automatically revoke over-permissioned access. | **Classify all data - human or AI-generated.**<br><br>Apply sensitivity labels and prevent sensitive data from reaching agents or models - no matter who or what created it. | **Detect AI misuse and data leakage.**<br><br>Log and analyze all prompts and responses to uncover misuse, data leakage, unauthorized access, and prompt injections. |

## Cyera for Microsoft Purview

Enforce enterprise-grade data protection across your estate with precision labeling from Cyera and Purview. Cyera DSPM integrates with Purview to:

| | | |
|---|---|---|
| **Label files accurately.**<br><br>Tag sensitive data with 95% precision leveraging deep insights from Cyera's AI-led classification and Purview's data security graph. | **Automatically fix gaps.**<br><br>Detect missing or incorrect labels and apply AI-recommended tags in a single click - without manual work. | **Enforce policies with confidence.**<br><br>Deliver consistent labeling across Azure, OneDrive, SharePoint, and more, so Purview policies trigger the right protections every time. |

# Cyera for Microsoft Purview DLP

Unify your siloed data loss prevention tools and move from reacting to orchestrating. Cyera Omni DLP works with Purview to help teams:

| **See what's working and fix what's not.** | **Shrink DLP false positives by over 95%.** | **Resolve alerts in minutes.** |
|---|---|---|
| Track DLP performance, identify coverage gaps, and optimize policies across your DLP stack. | Use AI-driven analysis to detect insider risk patterns, surface true positives, and eliminate the noise that slows teams down. | Cyera shows you what happened, why it triggered, and what to do next, so you can act fast without wasting time hunting for context. |

# Why Organizations *Choose Cyera* and Microsoft for Data Protection

- ✦ Integration with Microsoft and 40+ other sources
- ✦ Agentless deployment with fast onboarding
- ✦ AI-led data classification with 95% precision

- ✦ Risk-based prioritization and workflow automation
- ✦ Granular identity and data access visibility
- ✦ Automated remediation for Azure and M365
