

# The Unified Data and AI Security Platform

Enable safe AI adoption and business growth by protecting your most vital resource: **data**.

## Protect Your Dataverse and AI Ecosystem.

Enterprises depend on both data and AI to innovate and grow, yet most lack the visibility and control to protect them. Cyera secures both through agentless discovery and multimodal, AI-native classification that reveal the DNA of your business faster and more precisely at any scale. By uncovering what data you have, where it resides, and which identities can or actually do access it, Cyera enables you to reduce risk, simplify compliance, protect your crown jewels, and adopt AI securely.

### Discover and classify data with confidence

Gain unmatched visibility with agentless discovery and AI-native classification that reveal your business data landscape, sensitivity, and exposure to reduce risk, strengthen governance, and protect what matters most.

### Secure AI with deep, data-centric insight

AI Guardian provides visibility and protection for AI, discovering sanctioned and shadow AI, mapping access, detecting misuse, and enforcing guardrails to prevent harmful behavior.

### Protect data at rest and in motion

Omni DLP unites data-at-rest insights with data-in-motion controls, correlating legacy DLP events to recommend smarter policies and reduce false positives by up to 97%.

### Unify Data, Identity, and Access

Correlate data, identity, and access activity to detect anomalies, expose insider threats, enforce least privilege, and meet compliance requirements with confidence and evidence.

# One platform to see and protect Data and AI

Built for speed and scale, Cyera scans and classifies more data faster and with greater precision, eliminating blind spots. Built on an AI-native intelligence engine, Cyera empowers you to confidently take remediation actions to secure sensitive data, protect AI assets, and enable trusted innovation across your enterprise.

## Data Security Posture Management (DSPM)

Discover and classify sensitive data across cloud, on-prem, and SaaS with speed, scale, and precision. Remediate data vulnerabilities, reduce your attack surface, and realize cost savings from day one.

## AI Security Posture Management (AI-SPM)

Discover and inventory AI assets and their business intent, including shadow AI. Surface data risk and ensure AI tools only access what they should by mapping them to identities and datastores.

## Access Trail

Intercept insider threats, accelerate investigations, remove unused or excessive permissions, and prove compliance with evidence by uncovering which humans or AI accessed sensitive data, what they did, when, how, and why.

## Omni Data Loss Prevention (Omni DLP)

Orchestrate your DLP tools through a single intelligence layer. Aggregate and prioritize alerts in one view and summarize findings in plain language. Automatically optimize policies using smart correlation between alerts, data, and business context.

## AI Protect

Detect threats like prompt injection or policy violations by continuously inspecting prompts and responses. Prevent policy violations with automatic blocking of AI abuse and misuse, as well as risky AI agent actions.

\*\*\*

## Actions & Remediation

Easily resolve issues from within Cyera with policy-driven remediation and democratization capabilities woven into every solution. Apply sensitivity labels, remove public access, enable encryption, and more. Empower data owners to take quick, informed action through automated tickets and personalized notifications.

## DataWatcher

Free up your team to focus on more strategic initiatives. Let our experts manage the Cyera Data and AI Security Platform on your behalf. Keep your data protected, your team focused, and your business moving forward with peace of mind.

## Built on an AI-Native Platform That Unifies Data and AI Security:

Rapid Agentless  
Discovery at  
Petabyte Scale

AI-Native  
Classification with  
95%+ Precision

Data, Identity,  
and Access —  
Converged

Protection for Data  
at Rest, in Use, and  
in Motion

Visibility,  
Governance, and  
Defense for any AI
