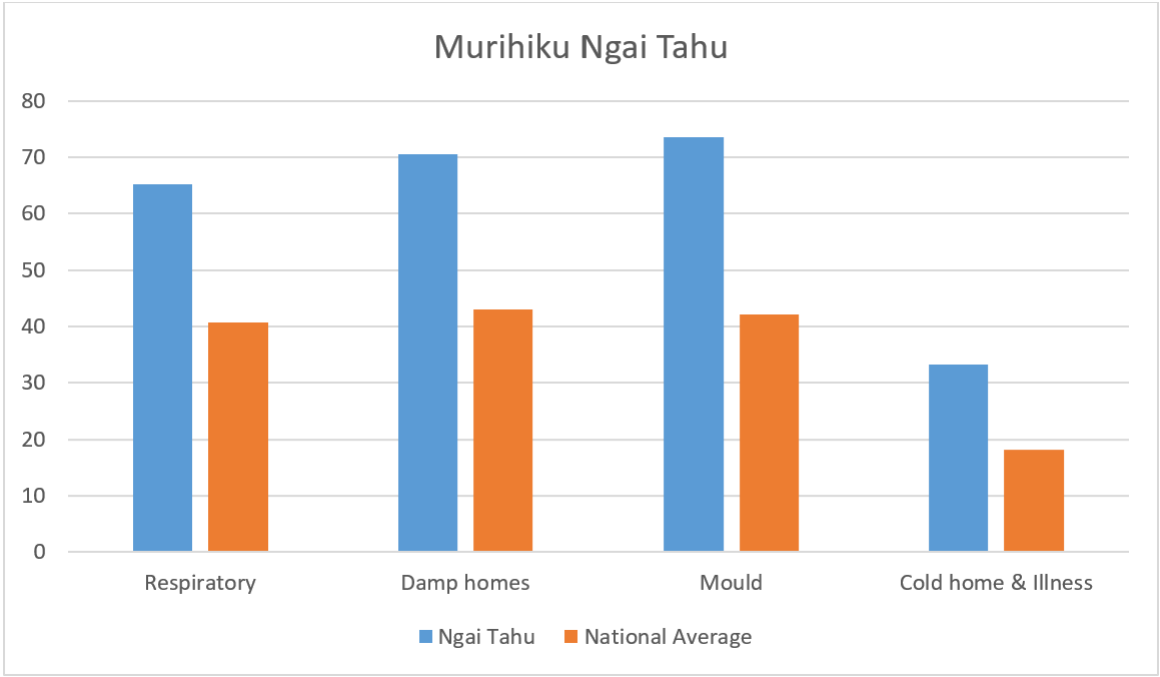
Otago University Housing Heating Health Study Conclusion

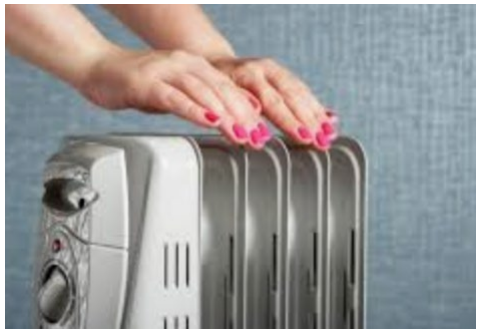
The data in this table suggests that Ngai Tahu Ngai Tahu whanau are more likely to experience cold homes and energy hardship than the national average. This is likely due to a number of factors, including the high prevalence of mould and damp in Ngai Tahu homes, and the use of inefficient heating methods.



Hands Up

If you struggled to pay your power bill last winter

If you had to reduce power/heating to converse their power bill?



Awarua Synergy
Warming and eco-powering our deep south

Be Honest

Hands up many in here have been wasteful in their own energy use?
