SUMMARY OF 2022

WE ARE INSPIRED
BY ALL MAGNIFICENT THINGS
OMEGARENDER.COM

WE DID IT

2022 was the year of challenges and big results. Our studio completed 868 architectural and design projects. Among them, Omegarender has finished 95 projects for major American, Canadian, and International companies. We are proud to have partnered with all of you and of the fact that after all these years, we continue to make 3D architecture of the present and for the future.

GOYOHAM
NON-COMMERCIAL PROJECT
SOUTH KOREA

The Goyoham Seoul Psychological Center is our 2022 non-commercial architectural project made together with Dof.One.

The design creates an eye-catching complex in harmony with the surrounding nature.
It has both a simple and a smooth form and attracts attention due to the scale of the building and the awe-inspiring space. This is a calm, zen-like place where people will absorb complete peace and a passion for life.

EVACUATION OF THE PEOPLE AND ANIMALS.

In 2022, Omegarender produced plenty of artwork images. As you already know, we can't show most of the 3D renderings, due to NDAs we signed. However, every month we do non-commercial projects that give our future clients the opportunity to see the outstanding quality of our production.

GOLDEN SAIL
NON-COMMERCIAL PROJECT

Another joint art project made together with our longtime friend, Fran Silvestre Arquitectos.

EGT
FRAN SILVESTRE ARQUITECTOS
SPAIN

The work of Fran Silvestre Arquitectos is always pure geometry and minimalistic shapes contrasted against picturesque nature. From our side, Omegarender uses eye-catching perspectives and vivid scenes to make the viewers immerse themselves in the image. The task of an archviz studio is to provide the opportunity to perceive the full potential of architecture. One glance should be enough for a person to be convinced of the perfection of the architect's intention.

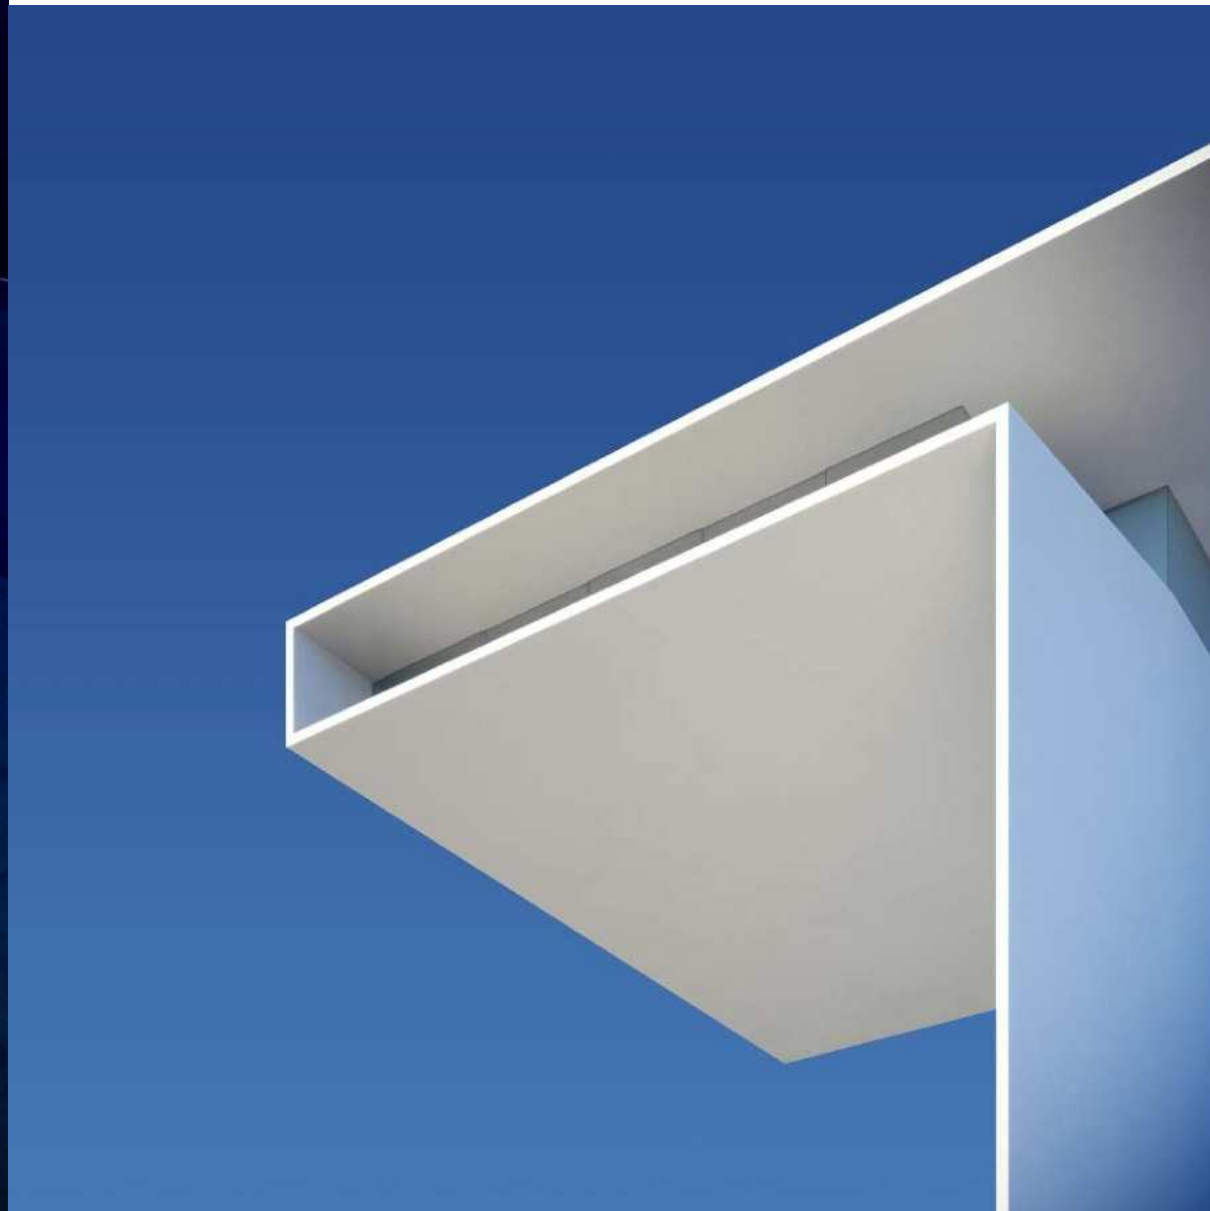

EGT
FRAN SILVESTRE ARQUITECTOS
SPAIN

Forest or desert, clear day, twilight or night, close-up or medium shot — the set of expressive means as simple as those architectural forms used by Fran Silvestre Arquitectos. However, you can see for yourself how epic and lofty the final images are.

MODELING SKILLS

THANKS TO 3D MODELING, A SIMPLE DRAFT OR ILLUSTRATION CAN BE CONVERTED INTO A TOP-NOTCH 3D IMAGE

THE GREAT ADVANTAGE OF 3D FURNITURE MODELING IS THAT THE MANUFACTURERS AND DESIGNERS DON'T NEED TO STAGE INTERIOR SETTINGS AND PUT THE PRODUCT INTO IT, THEY DON'T EVEN NEED TO PRODUCE THE TEST SAMPLES.

AWARDS

This year has also been rich in awards and industry recognition.

DNIPRO METRO
ZAHA HADID ARCHITECTS
UKRAINE

Our longtime client Islyn studio became a finalist in the competition of a major publication Hospitality design. Their interior concept was rendered by us.

GAME DEVELOPMENT

Over the past year our game development company has grown rapidly.

As a result we decided to completely rebrand the studio. Now we are ready to present you Electric Blue, the studio of digital dreamers.

In 2022, our studio collaborated with the key gamedev market players, but unfortunately we cannot say which ones. NDAs in the game direction are stricter than in Archviz. We hope to share more specific news with you in the next digests, but for now, we want to share some statistics and images available for publication.

ARTIFICIAL INTELLIGENCE

Also last year, Omegarender and Electric Blue embedded AI into the pipeline. In production, we are often inspired by the results that Midjourney generates. Here are some examples of a few of the concepts.
