

THE VITAMIN BAR

Chicago

AN UNPARALLELED STANDARD IN IV THERAPY AND WELLNESS

V|B HYDRATE

\$239

Large bag of isotonic fluids

Restore your natural equilibrium with this infusion of plain fluids. Aids in return to adequate fluid volume, and electrolyte imbalance. Can be customized from our list of add ons (\$35/ vitamin | \$45/ medication).

V|B DEFEND

\$349

Vitamin C, Zinc, Glutathione, B Complex

Support your immune system with this blend of vitamins to fight off common colds and viruses. Enriched with high doses of antioxidants and minerals, to recover from and defend against illness.

V|B CURE

\$349

Your choice of IV medication, B Complex, Glutathione

Ideal for treating the stomach flu or hangover. Replenish your body with Glutathione, B vitamins and any of the following prescription medications to customize your treatment: Toradol for pain relief, Zofran for nausea, or Pepcid for digestive comfort.

V|B GLOW

\$299

Vitamin C, Glutathione, Biotin

This blend of additives encourages healthy cell turnover, to increase the appearance of plump and hydrated skin. Featuring an added dose of biotin to support hair, skin, and nail health.

V|B ENERGIZE

\$329

L Carnitine, B Complex, Glutathione

Combat exhaustion with our blend of essential vitamins and antioxidants, a comprehensive choice for hydration and vitality. Fight chronic fatigue and boost energy, while rehydrating and replenishing your body from within.

V|B ELEVATE

\$329

B12, B Complex, Glutathione

Infusion formulated for pre and post travel, and jet lag. Includes energy boosting vitamins, and powerful medications to help combat dehydration, headache, and fatigue.

V|B MYERS

\$349

B complex, B12, Magnesium, Vitamin C, Calcium

All inclusive specialty infusion that combines essential vitamins and minerals to boost overall health and well-being. Typically including Vitamin C, B vitamins, magnesium, and calcium, this infusion supports immune function, energy levels, and muscle relaxation. It's used to enhance general wellness, alleviate fatigue, and aid in recovery from physical exertion or illness.

V|B SIGNATURE

\$325

B Complex, B12, Vitamin C, Magnesium, Lipo, Zinc, Biotin, Glutathione

This powerful blend is designed to revitalize your body from the inside out, enhancing energy levels, improving cellular function, and supporting overall wellness. It promotes healthier, more radiant skin, stronger hair, and nails, while boosting immunity and combating oxidative stress. Experience a refreshed and vibrant you, with this specialty infusion.

V|B NAD

\$350 - \$1250

NAD+, Magnesium, Vitamin C, Toradol, Zofran, Pepcid

NAD is a coenzyme that converts foods we eat into the true form of energy (ATP) inside of your cells. Boosting the intracellular level of ATP can manage diabetes, decrease risk of cancer, improve mental clarity, fight fatigue, and increase concentration. Experience the science of NAD, and the benefit of this energizing specialty infusion.

V|B YOU

Starting \$349

Customized infusion created for you, and by you.
Includes one liter of fluids, and 3 additives of your choosing.

Add Ons (\$35 each):

GLUTATHIONE Detox, Metabolism, Anti-aging	VITAMIN C Vitality, Immunity, Antioxidant

THE VITAMIN BAR

Jeuveau®

Experience the convenience of expert aesthetic care in the privacy of your own space. Our licensed Registered Nurse provides personalized Jeuveau® treatments designed to soften fine lines and dynamic wrinkles, delivering natural, refreshed results without the need to visit a clinic. Each appointment includes a professional consultation, customized dosing, and precise administration using advanced injection techniques. Enjoy a discreet, luxury experience with medical-grade care, exceptional safety standards, and beautiful, confidence-boosting results. Results in as soon as 2-3 days, results shown after 2 weeks.

VI Peel® Menu

VI Peels® are medical-grade chemical peels designed to improve skin tone, texture, and overall clarity by promoting cellular turnover and stimulating collagen production. They help reduce acne, fine lines, wrinkles, hyperpigmentation, and sun damage while leaving the skin smoother, brighter, and more youthful. Safe for all skin types, VI Peels deliver noticeable results with minimal downtime. Results shown after 3 peels. Packages available!

Original

Ideal for all skin types and ages, especially those looking to improve early signs of aging, mild acne, uneven skin tone, or dull, tired-looking skin. This is an excellent first-time chemical peel for maintaining healthy, glowing skin.

Purify

Ideal for acne-prone and congested skin, including teens and adults experiencing active breakouts, blackheads, whiteheads, or oily skin. Also ideal for those looking to improve overall skin clarity and prevent recurring acne.

Advanced

Ideal for mature skin (typically ages 40+) or anyone experiencing moderate to advanced signs of aging, including wrinkles, loss of elasticity, and sun damage. Ideal for clients seeking firmer, more youthful-looking skin with noticeable rejuvenation.

Precision® Peptides

Ideal for clients concerned with hyperpigmentation, melasma, sun damage, and uneven skin tone. Ideal for all skin types seeking a brighter complexion, improved firmness, and enhanced overall skin clarity and radiance.

Purify with Precision® Peptides

Ideal for acne-prone skin, those experiencing active breakouts, acne scarring, and dark spots. Ideal for teens and adults seeking clearer skin while also correcting discoloration and improving overall skin quality and confidence.

Peptide Menu

GLOW 50

A powerful blend of GHK-Cu (30mg), BPC-157 (10mg), and TB500 (10mg), designed to support research into cellular signaling pathways involved in tissue remodeling, repair, and inflammation regulation.

BPC-157 10mg

A synthetic peptide derived from a naturally occurring protein found in the human gastric system. It has gained attention in the wellness and recovery space for its potential regenerative and protective properties, particularly related to tissue repair and inflammation modulation.

Semax 30 mg

A synthetic peptide known for its powerful neuro-protective and cognitive-enhancing properties, widely used to improve focus, memory, and overall brain function.

Epithalon 50mg

A synthetic peptide known for its anti-aging properties, primarily by stimulating the production of telomerase, an enzyme that protects and extends the length of telomeres, which are crucial for cellular health and longevity.

AOD 9604

A specialized peptide fragment of human growth hormone (HGH) designed specifically for fat metabolism, offering targeted fat loss without affecting blood sugar levels or muscle mass.

Selank 10mg

A nootropic and anxiolytic peptide known for its ability to reduce anxiety, improve mood, and enhance cognitive function without the sedative effects often associated with traditional anti-anxiety medications.

CJC-1295 no DAC 10mg

A potent growth hormone-releasing hormone (GHRH) analog designed to stimulate the pituitary gland, promoting natural growth hormone (GH) release for enhanced muscle growth, fat metabolism, and overall cellular repair. This version of CJC-1295 without the Drug Affinity Complex (No DAC) allows for a more natural, pulsatile release of GH, closely mimicking the body's own hormonal rhythms.

DSIP 5mg

A unique neuropeptide known for its ability to regulate sleep patterns and promote deep, restorative sleep by interacting with the body's sleep-wake cycle.

KPV 10mg

A potent anti-inflammatory peptide, currently under investigation for its effects on inflammatory pathways and tissue response, particularly in gastrointestinal and dermal research models.

MOTS-c 10mg

A mitochondrial-derived peptide that plays a key role in regulating metabolic function, enhancing fat metabolism, and improving energy levels by optimizing mitochondrial efficiency.

Sermorelin 10 mg

A growth hormone-releasing hormone (GHRH) analog designed to stimulate the natural production of growth hormone (GH) by the pituitary gland, promoting anti-aging effects, muscle growth, and fat loss.

BPC-157 (10mg)/TB500 (10mg)

Designed to support advanced tissue repair, reduce inflammation, and promote optimal recovery.
