Important Notice

Before contacting any Multinational Stakeholder authority, it is mandatory to first call the official SAR contact responsible for the national waters or SAR region in which the incident occurs. Directly calling an international number without notifying the competent national authority is prohibited and may violate operational and legal protocols.
International contacts listed in this document must be used only if the national SAR authority is unable to assist you, explicitly instructs you to call an international center, or does not respond. SAR areas don't imply recognition of any claims, and possibly not drawing disputed boundaries at all.
