

# U21 - SUBWOOFER

## Single 21 Inch Passive Subwoofer

### INTRODUCTION

Today's highest-performance systems demand serious low-frequency authority, and the U21 delivers. Building on Procella's sealed-box heritage, this single 21" subwoofer combines immense output with tight, accurate control, making it the perfect solution where ultra-deep extension meets space efficiency. Using the same driver technology found in our flagship V21, the U21's 110-litre enclosure houses a 21" professional-grade driver with a 4.5" voice coil and neodymium magnet, achieving -3dB at 21Hz with remarkable transient precision. Capable of 124.7 dB continuous and 127.4 dB peak SPL @ 50Hz, the U21 delivers cinematic bass in a compact form. Paired with the Procella DA08-DSP amplifier, it becomes a full-frequency powerhouse.

### TECHNICAL SPECIFICATIONS

<b>Impedance</b>	8 ohms nominal
<b>Frequency Response</b> -3dB	21Hz
<b>Maximum SPL @ 50Hz</b> Continuous Peak	124.7dB 127.4dB
<b>Components</b>	Professional 21" driver 4.5" voice coil Neodymium magnet 110 litre sealed enclosure
<b>Power Handling</b> Continuous Peak	1800W 3600 W
<b>Sensitivity</b> 1m/1W	97dB
<b>Connectivity</b>	Gold plated binding posts
<b>Construction</b>	Internal heavily braced MDF Semi-matte textured black lacquer

<b>Dimensions</b> HxWxD	805x700x290mm (grille 300mm) 31.7x27.6x11.4 inch ( grille 11.8)
<b>Shipping Carton</b> HxWxD	803x908x375mm
<b>Net Weigth</b>	48 Kg
<b>Shipping Weight</b>	52 Kg
<b>Assembly</b>	Belgium; 100% QC testing
<b>Amplification</b>	2-ch bridge* DA08-DSP

*\* depending on the roomsize / listening position in combination with the desired SPL*

**Procella Amplifiers are sold and packaged seperately**
