Where Global Energy Flows Converge

As global energy priorities become increasingly interconnected, Egypt continues to strengthen its role as a strategic connector between markets, investment, reform and opportunity.

Held under the patronage of His Excellency Abdel Fattah El-Sisi, President of the Arab Republic of Egypt, the event brings together heads of state, governments, policymakers, investors, operators and innovators to advance the partnerships, dialogue and collaboration shaping the future of energy.

Energy security in Europe, AI-driven power demand, cross-continental supply chains, international capital flows - no energy market operates alone anymore. The Egypt Energy Show exists at the intersection of these global forces, connecting regional opportunity with global ambition.

Taking place at a time of significant industry transformation, the event provides a platform for decision-makers to exchange perspectives, strengthen partnerships and advance projects that support long-term energy development.

Egypt: Hosting the Global Energy Conversation at a Historic Crossroads

“

Let me once again stress the great importance of cooperation among us, with the countries of the Mediterranean and with the European Union in the field of energy.

”

HE Abdel Fattah El-Sisi
President, Arab Republic of Egypt

“

We can transform uncertainty into stability, and stability into opportunity and prosperity through partnership and regional cooperation.

”

HE Nikos Christodoulides
President, Republic of Cyprus

Strategic Agreements of Global Influence

Partnerships Connecting Global Energy:

GANOPE and BP agreement supporting offshore exploration development in Block 6.

EGPC, Eni and the General Authority for Health Insurance partnership supporting healthcare infrastructure development.

Cross-sector collaboration initiatives supporting industrial growth and long-term economic resilience.

These agreements reflected the increasing importance of coordinated regional cooperation in strengthening energy infrastructure, accelerating investment and enabling future energy system development.

Advancing global energy partnerships

As energy markets become increasingly interconnected, the strategic locations capable of connecting resources, infrastructure, investment and demand are playing an increasingly defining role in future energy systems. Egypt is one of those locations.

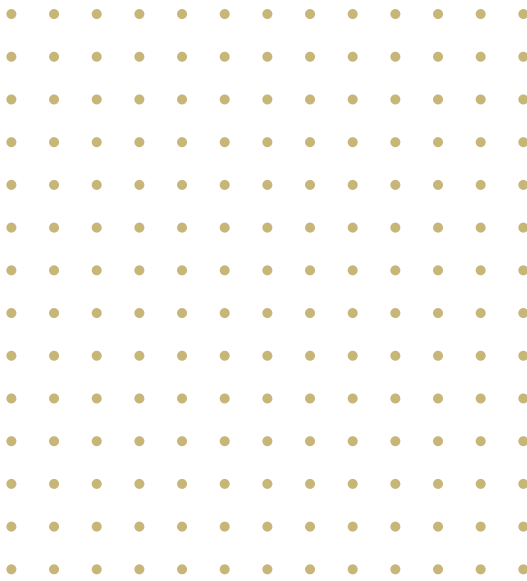

Positioned at the crossroads of global energy flows, Egypt Energy Show convenes the governments, national and international energy companies, investors, EPC contractors and technology providers aligning policy with industry priorities and investment frameworks.

Building on landmark agreements including the Egypt-Cyprus gas cooperation framework and the Egypt-Chevron Host Government Agreement supporting the Aphrodite gas field, Egypt Energy Show 2027 will bring together the next wave of partnerships shaping how energy moves between markets — strengthening export routes to Europe, advancing offshore exploration and deepening the integration of infrastructure connecting the Eastern Mediterranean to global supply.

Global energy progress depends on collaboration between policymakers,

industry and investors, and on energy systems capable of balancing security with sustainability across gas, renewables, hydrogen, AI and electrification.

From upstream oil and gas to power generation, infrastructure, digitalisation and emerging technologies, the Egypt Energy Show reflects the breadth and scale of the energy sector’s evolution, bringing together the expertise, technologies and investment opportunities defining the future of energy.

“

Egypt Energy Show 2027 represents an important opportunity to showcase Egypt as a stable and attractive investment destination while strengthening regional and international partnerships across the energy sector.

”

HE Eng Karim Badawi

Minister of Petroleum and
Mineral Resources,
Arab Republic of Egypt

Where Global Energy Meets Africa

Egypt Energy Show provides direct access to the governments, operators, investors and technology leaders advancing energy projects and shaping investment decisions across global markets.

With participation from national oil companies, international operators, EPC contractors, service providers, utilities and infrastructure developers, the event creates opportunities to build relationships, generate business and position your organisation at the centre of global energy development.

Access Decision Makers

Connect with governments, investors and operators shaping the future of global energy through a single international platform.

Strengthen Commercial Relationships

Build new partnerships, engage existing clients and accelerate conversations with organisations actively investing across the energy value chain.

Showcase Solutions at Scale

Demonstrate technologies, services and expertise to an international audience seeking solutions that improve performance, efficiency and energy security.

Expand Regional Market Reach

Reach decision-makers from Africa, the Mediterranean, the Middle East and beyond through one platform connecting regional opportunity with global investment.

Engage across the Full Value Chain

Meet organisations operating across upstream, midstream, downstream, power generation, infrastructure, digitalisation and emerging energy technologies.

Align with Industry Priorities

Position your organisation within the discussions shaping future investment, infrastructure development and global energy policy.

Egypt Energy Show 2026 is the leading energy event in the Mediterranean, bringing together stakeholders, governments, and operators to advance opportunities while reinforcing Egypt's position as a stable and attractive destination for investment.

Mathios Rigas
Chief Executive Officer
Energean

60+ NOCs, IOCs & IECs Driving Industry Progress

Egypt Energy Show brings together the organisations responsible for developing, financing, operating and supplying the energy projects driving growth across global markets.

Participation spans national and international energy companies, government entities, EPC contractors, service providers, technology companies and investors, creating an environment where strategic dialogue and commercial opportunity converge.

2026 Exhibiting Companies included

9

National Oil Companies

20

International Oil Companies &
International Energy Companies

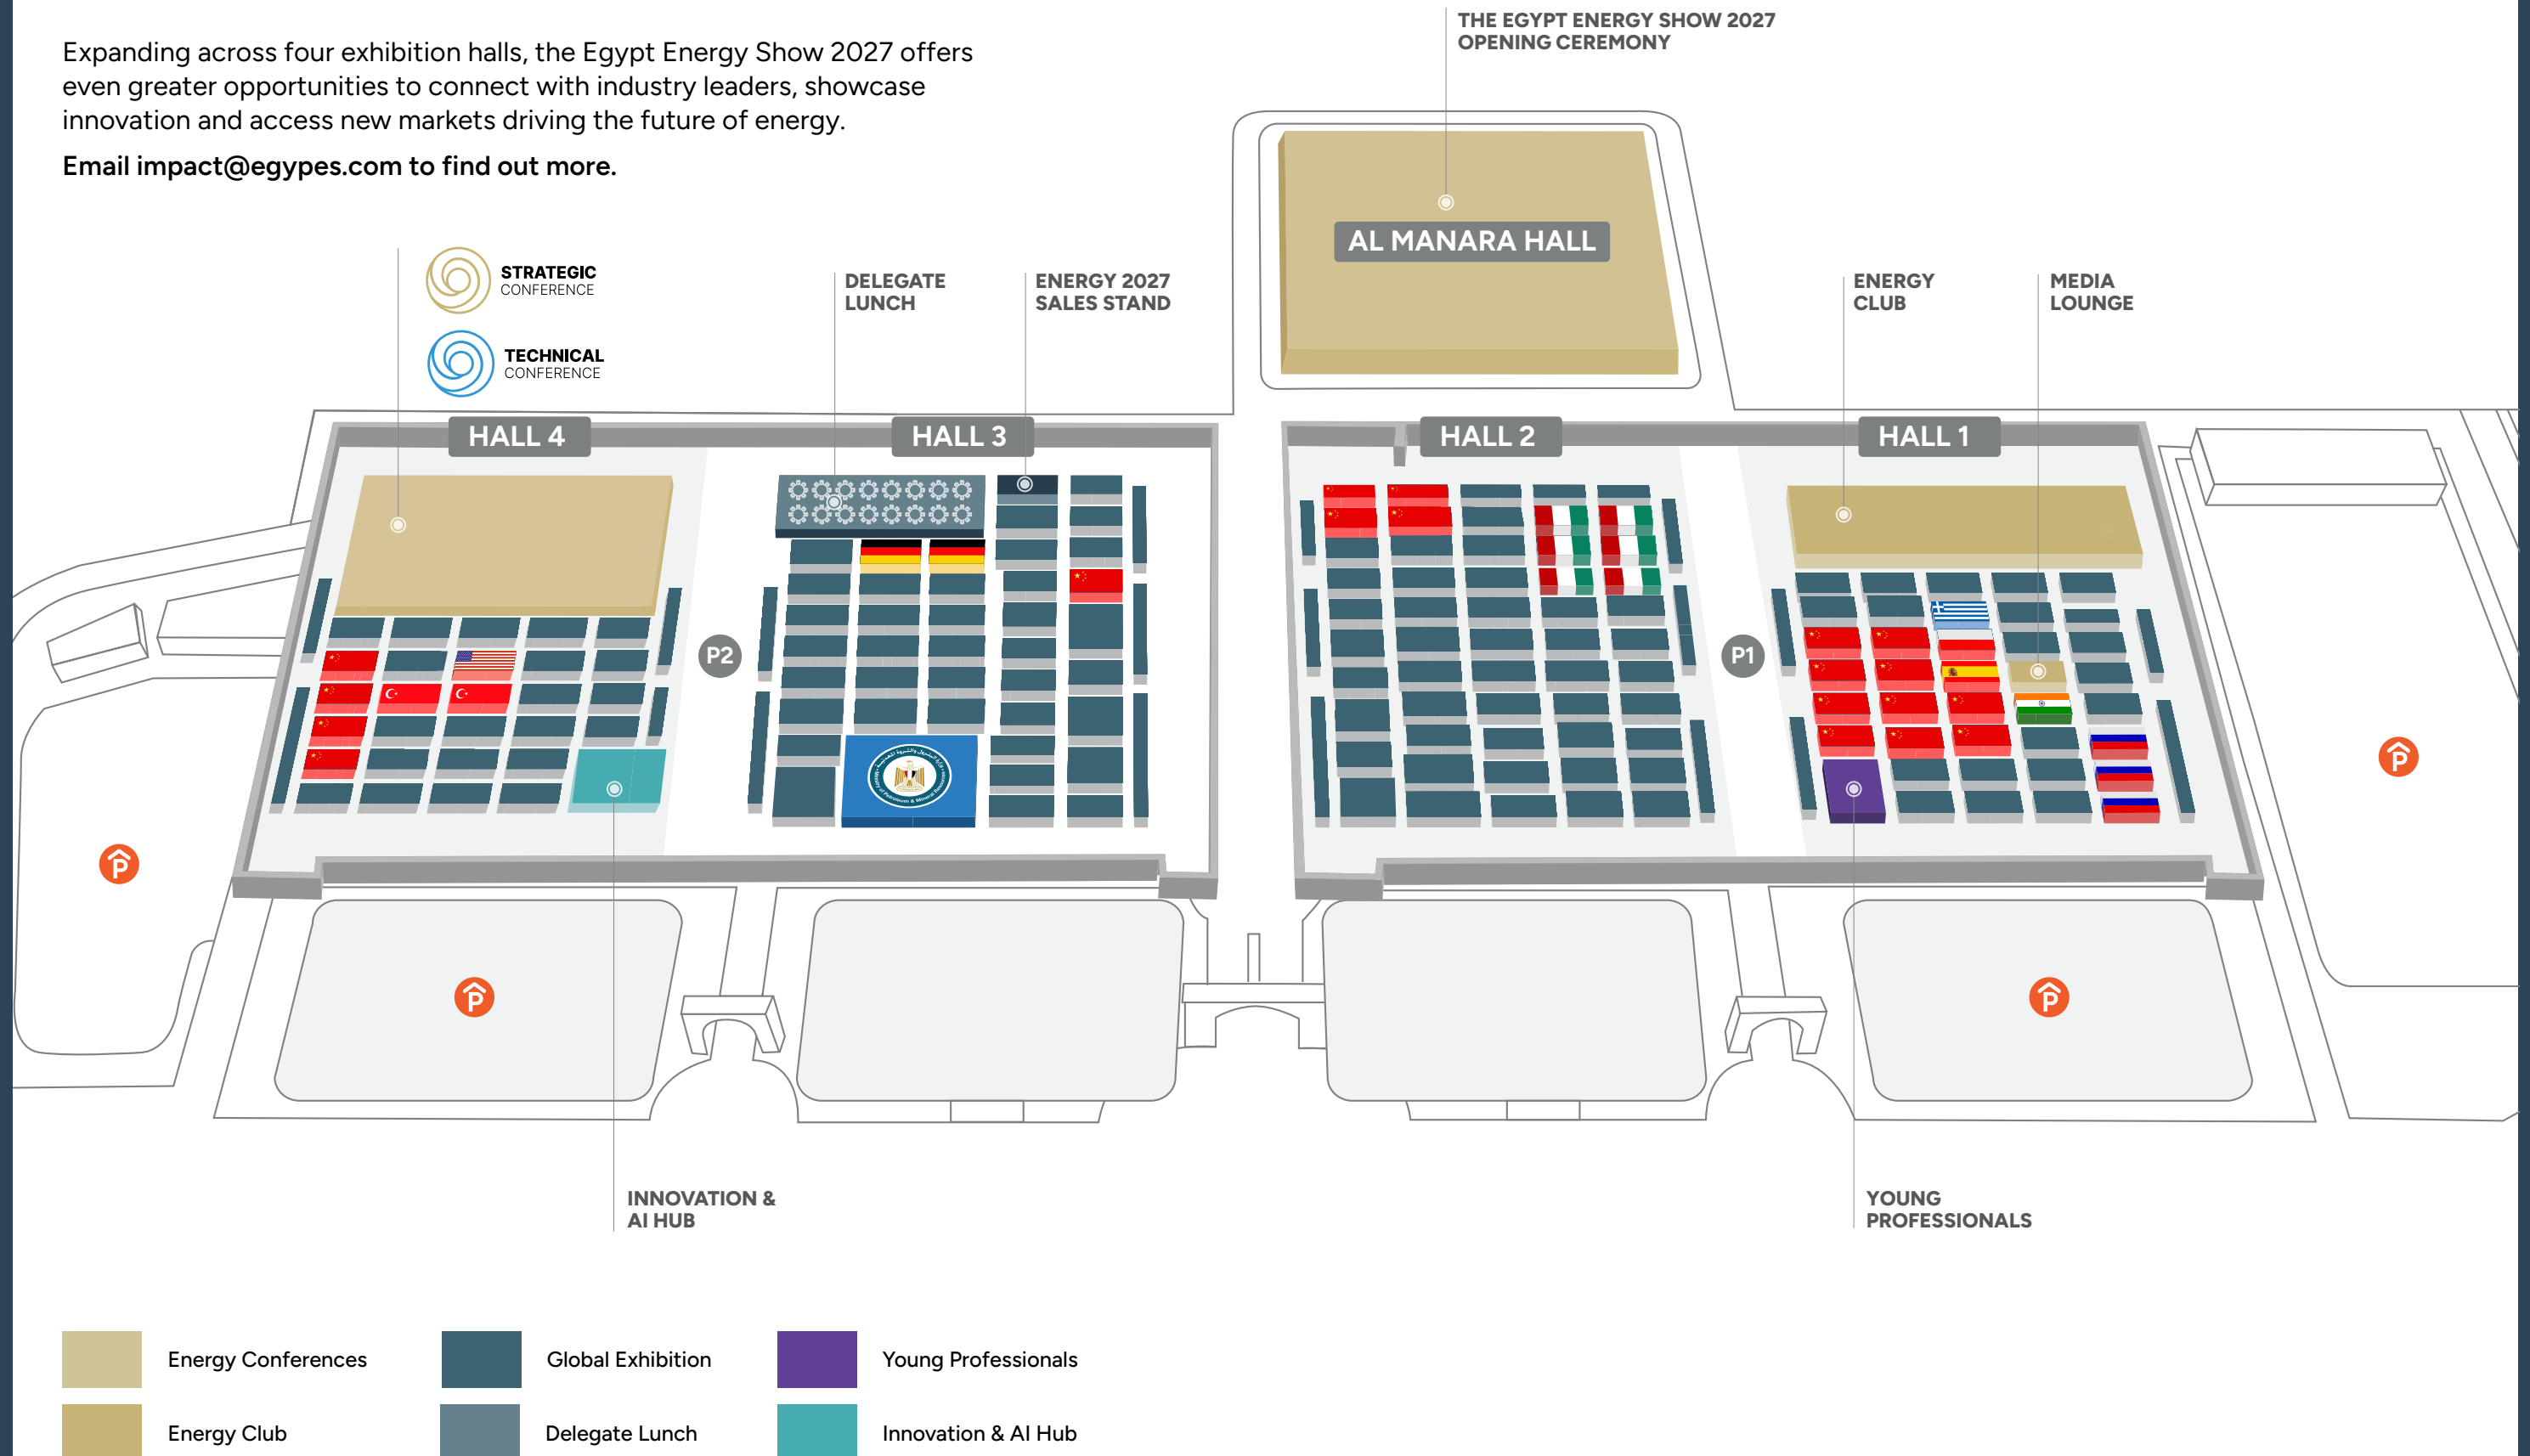

26

International Technology & Service Providers,
Engineering, Procurement & Construction
Companies

Egypt Energy Show 2027 Floor Plan

Expanding across four exhibition halls, the Egypt Energy Show 2027 offers even greater opportunities to connect with industry leaders, showcase innovation and access new markets driving the future of energy.

Where Regional Opportunity Meets Global Ambition

Connecting the global energy value chain

The Egypt Energy Show brings together the full global energy value chain, creating a platform for strategic engagement, commercial collaboration and technology exchange.

With over 600 exhibiting companies from 120+ countries, the exhibition showcases advanced technologies and innovations, with strong participation from NOCs, IOCs, EPCs, technology providers, infrastructure developers and energy transition companies.

The diversity of participation reflects the growing strategic importance of Egypt as a connector between regional opportunity and global investment, expertise and innovation.

Conversations Driving Global Energy Forward

The conferences bring together policymakers, ministers, energy leaders, investors and technical experts to examine the priorities defining the future of energy.

Held across two dedicated programmes - the Strategic Conference and the Technical Conference - the Conferences connect high-level industry direction with on-the-ground engineering and operational expertise.

Across 100 conference sessions, delegates will explore global energy markets, finance and investment, oil and gas development, international cooperation and digital innovation. Together, the conferences connect strategic vision with practical implementation, providing a platform for meaningful dialogue and industry collaboration.

 STRATEGIC CONFERENCE	 TECHNICAL CONFERENCE
2,500+ Conference Delegates	15 Ministers and Secretary Generals
400+ Global Speakers	3 Roundtables
100 High-Level Sessions	2 Energy Conferences

Strategic Conference

Advancing global energy priorities through high-level dialogue

The Egypt Energy Show Strategic Conference convenes policymakers, ministers, investors and energy leaders to examine the geopolitical, economic and technological forces defining the future of energy.

The conference delivers a high-level platform for dialogue focused on investment, infrastructure development, energy security and future transformation pathways.

High-level ministerial discussions reinforce the importance of collaboration between governments, operators and investors in enabling long-term energy resilience and infrastructure development.

Egypt Energy Show further strengthens its position as a strategic platform supporting dialogue between policy, investment and industry execution.

This is where governments, industry and investors come together to align priorities and advance the projects driving the future of global energy.

Strategic Conference Programmes

- Global Energy Markets
- Gas & LNG
- Upstream Exploration & Production
- Electricity, Power Generation & Grid Infrastructure
- Refining, Petrochemicals, Chemicals, Fuels, Trade And Retail
- African Emerging Energy Markets
- Innovation, Artificial Intelligence, Electrification & Decarbonisation
- Renewables & Low Carbon Solutions
- Leadership & Development
- Finance & Investment

Technical Conference and Industry Innovation

Engineering operational excellence across the energy value chain

The Technical Conference brings together engineers, geoscientists, operational specialists and technology leaders to explore practical solutions advancing operational efficiency, technical excellence and infrastructure performance.

Focused on real-world application and measurable outcomes, the programme showcases peer-reviewed research, engineering case studies and operational best practices supporting secure, affordable and sustainable energy systems.

2027 Technical Conference Categories

 Downstream: Refining Technology, Operations and Marketing (REF)	 Energy Economics, Governance, Agreements and Finance (EGAF)	
 Downstream: Petrochemicals Technology and Operations (PET)	 AI and Digital Era (AIDE)	NEW
 Upstream: Exploration of Conventional Resources (CONV)	 Health and Safety (HS)	
 Upstream: Exploration of Unconventional Resources (UNCONV)	 Project Management and Execution (PM)	
 Gas/LNG Processing, Operations and Technology (GAS)	 Operational Excellence (OEX)	
 Midstream: Infrastructure, Transportation and Storage (MID)	 People and Talent Development (PPL)	
 Offshore and Subsea Production, Operations and Technology (OS)	 Geoscience (GEO)	
 Decarbonisation, Energy Transition and Energy Efficiency (DTE)	 Oil and Gas Field Development (FD)	
 Hydrogen, Biofuels, Alternative Fuels, Nuclear (ALT)	 Drilling (DR)	NEW
 Renewable Energy (RE)	 Completions and Well Engineering (COMPL)	NEW
 Environmental Sustainability and Climate Change (ESC)	 Asset Integrity & Corrosion Management (AICM)	NEW

Present Your Research. Share Your Expertise. Define What's Next.

The Egypt Energy Show Technical Conference Call for Papers invites engineers, researchers, technologists and operational specialists to contribute to one of the region's most influential technical energy programmes.

Selected speakers will have the opportunity to present innovative projects, technical breakthroughs and operational case studies to an audience of industry experts, decision-makers and technology leaders.

From drilling and production to digitalisation, decarbonisation, asset integrity and future fuels, the programme highlights the innovations and expertise driving progress across the energy industry.

Submit Your Technical Abstracts

Submit your abstract and position your work at the forefront of technical innovation and operational excellence.

Perspectives from Global Energy Leadership that Participated

“

The GCC countries are not only a major supplier of energy, but also aspire to play a pivotal role in ensuring the stability of international markets through responsible production policies and effective coordination in finding a delicate balance between supply and demand and immunising the global economy against sharp fluctuations.

”

HE Jasem Mohamed AlBudaiwi
Secretary-General
Gulf Cooperation Council (GCC)

“

Egypt Energy Show 2026 continues to strengthen its role as a strategic platform connecting governments, operators and investors across the Mediterranean and beyond.

”

John Christmann
Chief Executive Officer
Apache Corporation

“

Diversification of energy supply is essential for security and economic stability, and the East Mediterranean offers important new opportunities to strengthen reliable and diversified energy partnerships.

”

Ditte Juul Jørgensen
Director-General for Energy
European Commission

“

The Egypt Energy Show brings together producers, technology providers, and industry leaders to advance critical dialogue on energy security, affordability, and sustainability, reinforcing Egypt's role as a vital global energy gateway.

”

Lorenzo Simonelli
Chairman and Chief Executive Officer
Baker Hughes

AI, Technology and Intelligent Energy Operations

Accelerating operational transformation

The Innovation and AI Hub is a dedicated platform exploring how artificial intelligence, digitalisation and intelligent technologies are transforming energy operations and infrastructure systems.

Designed to connect operators, technology providers and decision-makers, the Hub examines how AI-driven solutions are enhancing operational performance, infrastructure resilience, cybersecurity and efficiency across the energy value chain.

Key Areas of Focus

- Artificial Intelligence
- Digital Transformation
- Operational Optimisation
- Predictive Maintenance
- Cybersecurity
- Industrial Automation
- Data & Analytics
- Smart Infrastructure

Egypt Energy Show reinforces the growing strategic importance of AI, digitalisation and operational technology in shaping the next generation of energy systems.

Executive Networking and Experiences

Enabling high-level industry engagement

The Energy Club provides an invitation-only executive networking environment for ministers, C-suite executives, senior policymakers and infrastructure leaders.

Designed as a dedicated high-level engagement platform away from the exhibition floor, the Club facilitated private meetings, strategic discussions and relationship-building opportunities.

Exclusive Access for Energy Club Members to:

- Members Only Private Lounge
- Private Meeting Suites
- Premium Networking Among 1,800 Peers
- VIP Concierge Services And Amenities
- Media-Free Environment

Dedicated for ministers, C-suite executives and policymakers, the Energy Club facilitated high-level engagement shaping the future direction of regional energy markets.

Celebrating Leadership and Excellence

Building relationships remains central to industry progress. Egypt Energy Show creates opportunities for meaningful engagement between policymakers, energy leaders, investors, technology providers and future industry talent through a range of curated networking and community-led initiatives.

Gala Dinner

An Evening of Influence

Held under the patronage of the Ministry of Petroleum and Mineral Resources, the Egypt Energy Show Gala Dinner is the pinnacle of executive networking. This private, high-profile gathering brings together ministers, global CEOs and industry visionaries for an elegant evening of diplomacy, celebration and relationship-building.

Energy Awards

Recognising Leadership

The Egypt Energy Show Awards honour bold, measurable contributions to innovation, sustainability and progress across the energy value chain. Endorsed by the Ministry of Petroleum and Mineral Resources and judged by a distinguished international panel, the Awards set a benchmark for energy leadership.

Empowering the Next Generation

Innovation, leadership and ecosystem development

The Young Professionals Programme focuses on developing future energy talent and strengthening industry engagement with students, graduates and early-career professionals.

The initiative reinforces the importance of future workforce development, industry accessibility and long-term talent investment across the global energy sector.

Young Professionals Programme Highlights

- Race-to-Zero Challenge
- Skill-Up
- Innovation Lab
- Youth Forum
- Future Female Leaders
- Energy Industry Immersion Tour
- Future Energy Ambassadors
- Energy Explorers
- Powerskills
- STEM City
- Shell Eco-Marathon
