

FOR SECURITY LEADERS

Exposure intelligence for security leaders

Reduce risk faster. Prioritize what matters. Prove security ROI.

EXECUTIVE
SUMMARY

Security teams are overwhelmed by fragmented vulnerability data, alert noise, and manual prioritization — making it difficult to focus on the exposures that actually reduce business risk.

Guardare unifies exposure intelligence across technical and human risk, so organizations identify, prioritize, and remediate the most critical exposures faster.

BUSINESS OUTCOMES

Typical ranges observed across deployments

40–70%

FASTER EXPOSURE IDENTIFICATION

Eliminate manual correlation across tools and spreadsheets.

- Faster detection of critical vulnerabilities
- Less time spent understanding real exposure
- Earlier intervention before exploitation

30–60%

FASTER REMEDIATION

Focus effort on the exposures with the highest business impact.

- Prioritized, actionable remediation guidance
- Smaller backlog of low-value work
- Faster closure of critical risks

50–80%

LESS ALERT NOISE

Cut through thousands of non-actionable alerts.

- Lower analyst fatigue
- Sustained focus on high-impact threats
- No time lost to false prioritization

25–50%

HIGHER TEAM EFFICIENCY

Automate manual risk correlation and analysis.

- Less time aggregating data by hand
- Faster investigation cycles
- Higher throughput without headcount growth

AND THE OUTCOME LEADERSHIP SEES

Security ROI you can put in front of the board

Exposure translated into measurable business risk reduction.

- Clear risk-reduction metrics for leadership
- Easier budget justification and renewals
- Security activity aligned to business outcomes

BEFORE VS. AFTER GUARDARE

From noise to measurable risk reduction

BEFORE	AFTER GUARDARE
Fragmented vulnerability data	Unified exposure intelligence
Thousands of alerts	Prioritized critical exposures
Manual risk correlation	Automated contextual analysis
Reactive remediation	Proactive risk reduction
Technical-only reporting	Business-impact-aligned insights
Unclear ROI	Measurable risk-reduction outcomes

OUR POSITION

Guardare replaces fragmented vulnerability management with exposure intelligence that connects risk to business impact.

Unified exposure intelligence platform

GUARDARE CONSOLIDATES

- Vulnerabilities across environments
- Asset context and criticality
- Attack signals and exploitability
- Human and behavioral risk signals
- Security control effectiveness

Into a single prioritized exposure view.

Strategic value for security leaders

- 01 Reduce enterprise attack surface
- 02 Improve the speed of risk decision-making
- 03 Optimize existing security investments
- 04 Support consolidation of overlapping tools
- 05 Demonstrate measurable risk reduction to the board

Guarding your future, today.
