

A MOMENT CAN CHANGE A LIFE.

Your support changes what happens next.

Synaptic provides coordinated, multidisciplinary neurorehabilitation for individuals living with complex neurological conditions. **Care is individualized, integrated, and delivered in one place.**

In these moments, a symptom, a diagnosis, or an accident, people often find themselves scared and searching for reassurance, clarity, and coordinated support.

Who We Serve

Synaptic serves **individuals of all ages, with or without a formal diagnosis.** We offer a different kind of care that focuses on symptoms, not just conditions, without the need for a referral, and delivered through a coordinated, multidisciplinary team in one place.

Serving individuals with:

- ✓ Stroke
- ✓ Brain injury
- ✓ Parkinson's disease
- ✓ Spinal cord injury
- ✓ Multiple sclerosis
- ✓ Concussion
- ✓ Functional neurological disorders
- ✓ Other complex neurological conditions

Neurological recovery requires coordinated care that adapts to each individual.

2025 BY THE NUMBERS

What Progress Looks Like

Moments of change, made possible through coordinated care.
Progress looks different for everyone.

Cody

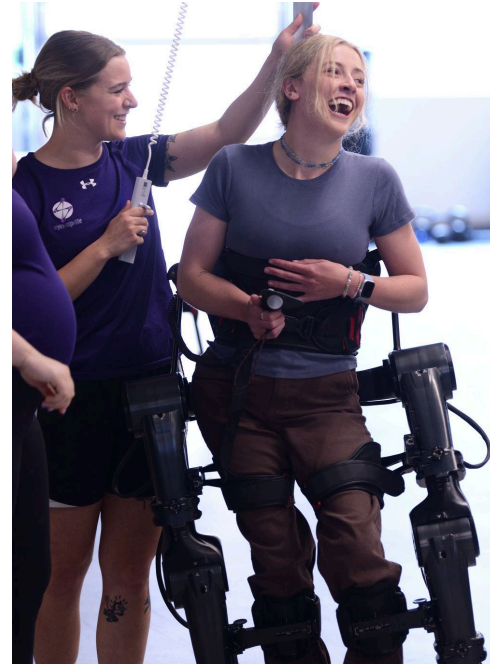

Living more independently

Cody is home. Driving.
Playing wheelchair rugby.

Wendy

200+ steps

Wendy took over 200 steps with only one break.

Becca

15 seconds standing

Becca stood independently for 15 seconds.

Chloe

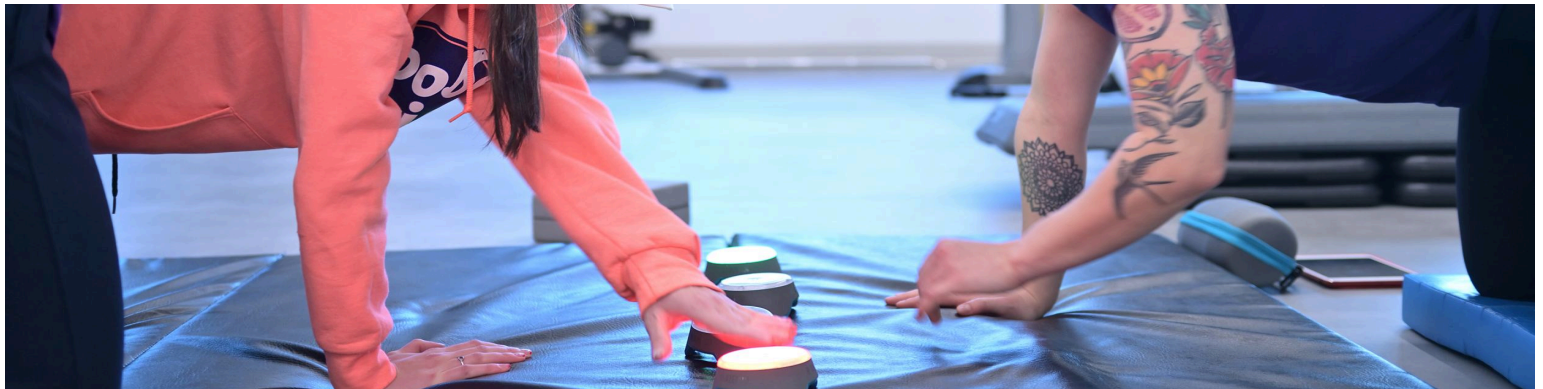

Back to competition

Chloe returned to competing in water skiing.

Kiesha

Stronger than ever

Kiesha's triceps are stronger than ever.

COMMUNITY POWERED CARE

How is this kind of care possible?

Synaptic is a **community-funded charity**. We operate outside the traditional healthcare system, allowing us to provide coordinated, integrated care in one place.

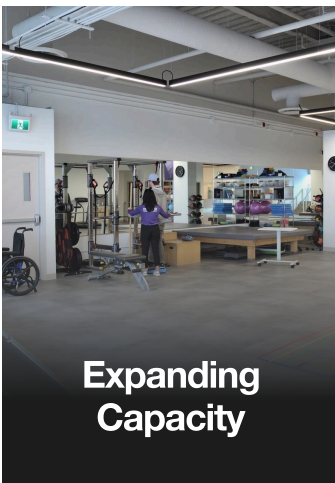

Donors at every level sustain this work. Monthly contributions, one-time gifts, corporate sponsorships, and legacy giving each play an essential role in strengthening access to coordinated neuro rehabilitation.

This model also helps keep care more accessible, so individuals don't have to choose between treatment and groceries. Together, this collective generosity ensures people receive care when it is needed most.

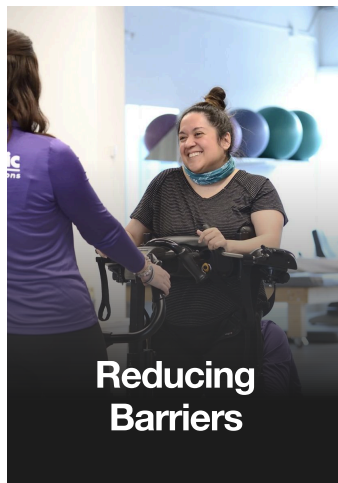

Strengthening Access in 2026

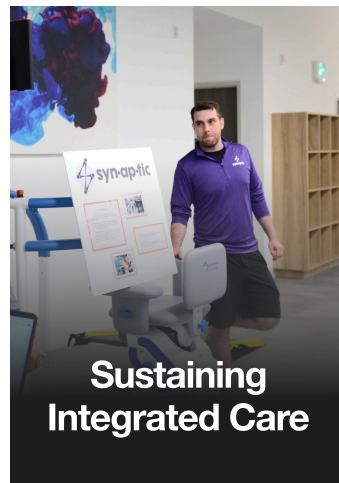

Care when it's needed most only happens because of the community supporting Synaptic.
