

How to save the my360 rewards site as an 'app' on your phone

Yes, you can save my360 rewards to your phone as a **PWA (Progressive Web App)**, but the steps differ slightly between **iPhone and Android**.

iPhone / iPad — Safari

1. Open the website in **Safari**.
2. Tap the **Share** button (square with the upward arrow).
3. Scroll down and tap **Add to Home Screen**.
4. Edit the name if you want.
5. Tap **Add**.

The website will now appear on your Home Screen like an app. If the site supports PWA features, it can open in its own app-style window without the normal Safari interface.

Tip: If you don't see **Add to Home Screen**, scroll further down the Share menu or tap **Edit Actions** to add it.

Android — Chrome

1. Open the URL in **Chrome**.
2. Tap the **:** menu in the top-right.
3. Look for **Add to Home screen** or **Install app**.
4. If you see **Install app**, choose that — this is the proper PWA installation.
5. If you see **Add to Home screen**, tap it and confirm.

If the website is a genuine PWA, Chrome will generally show **Install app**. Otherwise, **Add to Home screen** simply creates a shortcut.
