

Transform Your Senior Living Financial Operations

Purpose-built account solutions for multi-entity senior living organizations

Sage Intacct

Blytheco + Sage Intacct

Blytheco combines 45+ years of ERP expertise and Sage Intacct technical specialization ensuring you get a solution tailored to how senior living organizations operate, not just generic accounting software.

Cloud-Native Financial Management

Sage Intacct is the AICPA's preferred financial management solution, built for growing organizations that need functionality in the cloud.

Multi-Entity

Manage multiple entities, facilities, and departments within a single system. Automated consolidation occurs in real time.

Intelligent Automation

Reduce manual data entry and errors with automated workflows for approvals, allocations, billing, and recurring journal entries.

Dimensional Reporting

Track financial performance across multiple dimensions simultaneously by facility, by care level, by payer type, by service line all without a complex chart of accounts structures.

Revenue Recognition

Handle complex billing scenarios, including entrance fee amortization, care level adjustments, ancillary service billing, and various payer types with built-in revenue recognition rules.

Occupancy & Performance Metrics

Link financial data with operational metrics to track revenue per occupied bed, average daily rate, and other KPIs critical to senior living success.
