How to Utilize This Guide

Transforming your business is no easy feat. Today's software solutions are constantly evolving and expanding their capabilities to accommodate the growing needs of businesses like yours. Whether you are looking to improve the functionality of your current solution or replace it with a more robust option, it is important to know where to start.

Before beginning any software evaluation process, you must first document your challenges, key business objectives, and future goals. It is important to determine what you truly need from your ERP.

Now that you have a clear understanding of what your business needs are, you can begin to compare your options. We have developed this series of comparisons to help you determine the solutions that meet your specific challenges. While most ERP solutions have the same core capabilities and functions, we highlight the differentiators and strengths of the industry's leading ERP solutions.

If you have any questions at all during your review, we are always here to help.

● Assessment of solution strength on a scale of 1–5; in this case, 5 indicates the system is highly proficient in this functional area natively. ○ Requires a third-party solution or integrated add-on to fill this functional gap ✕ Solution lacks this capability entirely
