Blytheco™

Transforming Companies

Inventory and Warehouse Management
Solution Guide

For companies in the manufacturing, distribution, and retail sector, effectively managing your inventory and streamlining distribution processes is crucial to the overall success and growth of your business. Visibility, efficiency, and automation are a few areas in which small improvements can produce tremendous ROI in the business. Although basic inventory management capabilities come standard in most Enterprise Resource Planning (ERP) solutions, there are plenty of third-party solutions and add-ons designed to enhance your functionality and performance.

We have developed this guide to highlight some of the industry's strongest solutions for warehouse management, inventory management, scanning, and barcoding available for the ERP solutions listed below.

Acumatica The Cloud ERP | ORACLE NETSUITE | sage X3 | sage 100cloud | sage 500

Acumatica
OFFICIAL PARTNER

Scanco

Product Overview

For over 26 years, Scanco has remained one of the industry's top solutions for warehouse automation, manufacturing automation, inventory management, scanning, barcoding hardware, and software. The Scanco apps automatically validate every piece of information it scans, enters, or looks up, thus removing human error and guess work.

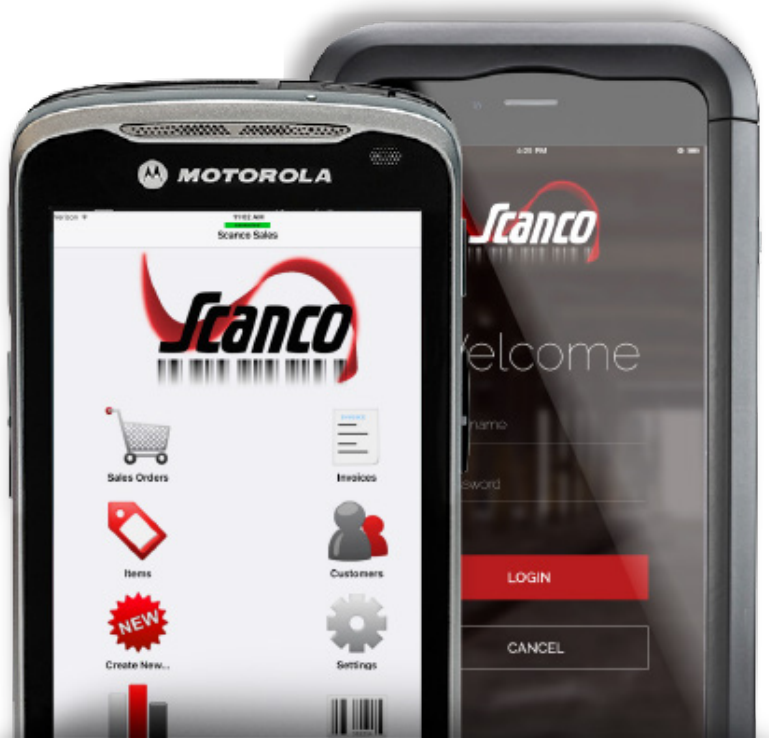

Key Features and Benefits

- Seamless real-time integration to Acumatica
- Automate receiving processes, physical counts, and cycle counts
- Runs on rugged scanners, phones, tablets, and even desktops
- Application is compatible with iOS, Android, and Windows devices
- Wave picking and shipping
- Select and create batches—multiple users can pick and ship
- Inventory transfers between locations and warehouses
- Automated bin transfers, alias item entry, and live validation
- Decrease ship time and errors while increasing inventory accuracy
- Pick, pack, and ship same orders

Acumatica
OFFICIAL PARTNER

savant
SOFTWARE

Product Overview

Savant WMS software allows businesses to manage and track the movement of inventory from receiving through shipping. The Savant WMS dramatically cuts warehouse costs by eliminating paper work and costly shipping errors, improving staff productivity, and providing accurate inventory levels to all intercompany departments.

Key Features and Benefits

- Advanced directional put-away methodologies
- Code date tracking
- Automatic replenishment of picking locations
- Free process reviews and needs analysis
- Wave picking
- Capture catch-weights and verify weights at picking
- Recall reporting by product
- Automatic replenishment of picking locations
- ABC classification
- Unlimited number of storage levels per product

Acumatica
OFFICIAL PARTNER

FUSION
SOFTWARE

Product Overview

Fusion Warehouse Management provides both store-level inventory management and full warehouse capabilities. This includes shipping, receiving, physical count, FedEx/UPS integration, and more. Connect to virtually any Windows CE device and manage inventory with ease.

Key Features and Benefits

- Verify receiving, picking, and shipping of sales orders via handhelds
- Easy bin content look-ups
- UOM barcodes and barcode printing
- Restock and down stock capabilities
- Multi sales order wave picking
- Cycle count and physical counts
- Independent inventory moves
- Pack with contents and EDI integration
- Paperless picking options

ORACLE®
NETSUITE

SNAPFULFIL™

Product Overview

Snapfulfil is a comprehensive, best-of-breed, tier 1 cloud warehouse management system that seamlessly integrates with NetSuite ERP. This warehouse automation platform is scalable to fit the supply chain needs of any size business at a fraction of cost for most on-premise WMS solutions.

Key Features and Benefits

- RF directed put-away
- Multiple picking methodologies including wave, multi-zone, pick, and pass
- Task interleaving based on priority, permissions, and proximity
- Demand and rule-based replenishment
- Comprehensive tracking capabilities for serial number, country of origin, expiration, and production date control and batch code traceability
- Built-in integration to most major parcel carriers
- Dashboard reporting analytics and performance KPIs
- WMS integration with NetSuite ERP

ORACLE®
NETSUITE

WAER

Product Overview

Waer is a powerful cloud-based warehouse management system designed to support the complicated supply chain needs of many growing businesses. This solution seamlessly integrates bi-directionally with NetSuite ERP managing inbound warehouse data, outbound actions, master data, and adjustments.

Key Features and Benefits

- More than 20 bi-directional interfaces into NetSuite ERP
- Supports all barcode and RFID tag formats
- Simplified receiving processes and ASN compliance
- Cross-docking and automated bulk put-away capabilities
- Fulfill intercompany transfers and manage multiple warehouses
- Track multiple ship-to destinations, create kits and BOMs
- Operator controls and supervisor approvals
- Easily view stock counts and improve inventory accuracy
- One-click replenishment and storage optimization
- Barcode driven packing and item scan validation
- Courier interfacing and return/reverse logistics
