Safeye PTZ and Bullet Camera System

The Safeye PTZ (Pan/Tilt/Zoom) and bullet camera system is designed for use in pressure test bays and other areas of a workshop environment.

Benefits:

This plug-and-play system offers clear video of monitored locations, reducing the number of personnel needed and increasing safety and security.

The bullet cameras have a magnetic base which allows them to be placed strategically, attached to any steel location.

The system is fully cabled meaning that no local power is required so the camera can be placed where needed.

Typical Applications:

Well head; BOP, flowhead; coil tubing; crane monitoring

Features:

- Full continuous 360 degree pan, 90 degree tilt, and 20x optical zoom, 16 x digital zoom
- No local power required
- Interference free image
- Day/night cameras work in all lighting conditions
- Compact, with single cable for easy installation
- Zoom with auto-focus
- Can be configured as per client requirements
- Split screen option shows feeds from up to six cameras

Basic operation:

- Camera begins sending video as soon as system is plugged in and switched on
- Display screen can show up to x6 cameras with the option to bring individual video feeds to full screen
- Control interface allows for Pan/Tilt/Zoom control of domed camera

Improve efficiency.
Increase safety.
Reduce costs.
