

Aureo® S 700 Granular

Type A Medicated Article

Product Description

Aureo® S 700 (chlortetracycline and sulfamethazine) Type A Medicated Article supports newly weaned, stressed and incoming cattle with the maintenance of weight gains in the presence of respiratory disease. Aureo S 700 contains 35 g chlortetracycline (CTC) and 35 g sulfamethazine per pound of product.

Indications for Use in Cattle

- As an aid in the maintenance of weight gains in the presence of respiratory disease such as shipping fever.

FDA Status

- Category II drug and requires an FDA-approved medicated feed mill license for mixing and manufacturing medicated feeds.
- Veterinary Feed Directive (VFD) required.
- Approved for use in combination with Bovatec®.

Withdrawal Periods and Residue Warnings

- Withdraw 7 days prior to slaughter. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal.

Packaging

- 50-pound, multiwall paper bag with protective barrier ply.

Key Points

- Combination antibiotic with dual mode of action for effective respiratory disease control.
- Reduces morbidity and maintains weight gain in stressed (lightweight or high-risk) cattle.
- 28-day in-feed treatment window for seamless integration into feeding programs.
- Decreases the need for therapeutic treatments,¹ which helps to lower medication costs.

See reverse side for complete non-combination use directions, product claims and additional information on this product.
