

NIDS JUMPSTART

Understanding how a Network Intrusion Detection System (NIDS) can help improve your detection capabilities and how to approach it

FOR **IMPACTING** 
BUSINESS **SOLUTIONS**

NIDS JUMPSTART

BxC Security helps you assess if implementing a NIDS is a sound strategic decision for your organization. In a structured workshop, we demonstrate and investigate how it can support you in increasing your detection capabilities, what are its use cases, and its limitations.

At BxC Security, we are committed to providing our clients with first-class cybersecurity services and thereby making a valuable contribution to the resilience of our economy and society.

Preparation

- Together we collect your input to understand your current environment (IT/OT/Cloud)
- Together, we investigate what are your main drivers for implementing a NIDS

Workshop

- Together, we conduct a NIDS strategy workshop with selected stakeholders
- We present you what a NIDS actually does and what are its limitations
- We present you a high-level comparison of tools and vendors
- We showcase specific use cases which are relevant for your environment
- Together, we discuss NIDS placement, visibility requirements, and constraints

Recommendation

- We create tailored recommendations to guide you in deciding if a NIDS is a good fit for your organization
- We suggest a starting point, next steps, and proposed architecture direction

Your advantages at a glance!

- Clear understanding of what NIDS actually delivers (and what not)
- Avoidance of costly investments and wrong expectations
- Vendor-neutral guidance
- Practical recommendations tailored to your environment
- Combination of technical and business expertise

OUR OFFER

We provide you with a structured package that enables a clear and pragmatic introduction to NIDS. The goal is to help you understand the value, limitations, and applicability of NIDS in your specific environment, and to define concrete next steps. Whether you are already considering NIDS or simply want to improve your network detection capabilities, we provide the expertise and methodology you need.

NIDS JUMPSTART

Our NIDS Jumpstart offering provides a fast and structured way to evaluate how NIDS can contribute to your cybersecurity strategy.

Within a short timeframe, we deliver clarity on your current network visibility, detection capabilities, and the realistic role of NIDS in your environment.

We bring the necessary expertise, methodology, and practical experience, and you provide the relevant stakeholders and high-level information.

Within a 1-day workshop, you receive a clear summary that assesses whether implementing a NIDS is a well-grounded decision for you (or not) and where to start your implementation journey.

Price: 2.750 Euro

What we need

- Information about your network, detection capabilities, security goals, and compliance requirements
- Access to relevant stakeholders (up to 10 participants)

What you get

- Clear decision material
- No overengineering
- Realistic understanding
- Actionable next step
