

NIDS HEALTH CHECK

Evaluate how effectively your existing NIDS is deployed, configured, and used — and identify gaps, blind spots, and improvement potential

FOR **IMPACTING**
BUSINESS **SOLUTIONS**

NIDS HEALTH CHECK

BxC Security helps you understand if your NIDS is used to the best of its capabilities. We assess if your network coverage is optimal, how alerts can be used to and what the detection gaps are.

At BxC Security, we are committed to providing our clients with first-class cybersecurity services and thereby making a valuable contribution to the resilience of our economy and society.

Preparation

- Together, we review the provided documentation about your network and NIDS setup
- Together, we review your SOC/monitoring processes
- Together, we identify the relevant stakeholders for our assessment

Assessment Workshop

- Together, we conduct a workshop with selected stakeholders to understand the current visibility gaps
- Together, we review the current detection capabilities of your NIDS and how alerts are treated
- Together, we review your operational model to understand who is monitoring the alerts and which actions are taken after identification

Evaluation

- We evaluate the maturity level of your NIDS implementation
- We identify critical gaps, inefficiencies, and misconfigurations
- We define clear prioritized improvement actions

Your advantages at a glance!

- Clear understanding of what your NIDS actually delivers (and what not)
- Practical recommendations tailored to your environment
- Combination of technical and business expertise

OUR OFFER

We provide you a structure package that provides a clear and pragmatic overview of your current detection capabilities.

The goal is to help you understand where your current visibilities gaps are and define actionable next steps which would ensure a large visibility with no blind spots.

NIDS HEALTH CHECK

Our NIDS Health Check offering provides a fast and structured way to evaluate if you are using your NIDS to the best of its capabilities.

Within a short timeframe, we deliver clarity on your current network visibility, detection capabilities, and the realistic role of NIDS in your environment.

We bring the necessary expertise, methodology, and practical experience, you provide the relevant stakeholders and high-level information.

Within 2 weeks, you receive a clear assessment and actionable recommendations.

What we need

- High- and low-level network architecture overview (diagrams)
- Access to relevant stakeholders (up to 10 participants)
- Existing documentation (monitoring, SOC, network information)

What you get

- Structured NIDS 1-day deep dive workshop & knowledge transfer
- Documentation of discussions and findings
- Assessment of your network detection readiness
- Identified gaps and improvement areas
- Final report including: key insights, recommendations, high-level roadmap

Price: 9.925 Euro
