

PKI: Zero to Hero

Secure key processes and scale identity interoperability with confidence

FOR **IMPACTING** 
BUSINESS **SOLUTIONS**

PKI: Zero to Hero

BxC Security helps you define the right PKI starting point for your organization. In a structured workshop, we go over the PKI fundamentals, identify key use cases, assess requirements and constraints, and shape a practical PKI foundation plan with a focused, realistic scope.

At BxC Security, we are committed to providing our clients with first-class cybersecurity services and thereby making a valuable contribution to the resilience of our economy and society.

What can you expect?

- Expert PKI guidance to power your organization's automated, trusted digital identities
- We tailor a set of learning sessions according to your current team's experience

What do we deliver?

- We bring curated materials, best practices, and real field examples from industrial environments. You leave with experience, not just theory
- We guide you through a high-level PKI design adapted to your specific needs and environment
- Through a 2-day workshop, we help you make conscious technical decisions and define where to start

Your advantages at a glance!

- Fast entry point with visible results
- Better insight into your PKI with clear decision parameters
- High level PKI foundation design concept for future growth
- Practical recommendations tailored to your environment
- A good combination of technical and business expertise

What is our aim?

- Build a focused and aligned foundation for you to manage your digital identities
- To provide guidance with expertise and support your team needs to achieve their security objectives

OUR OFFER

Through a focused 2-day workshop, we help you uncover your security needs and deliver a tailored high-level PKI design document, giving you the clarity and confidence to make the right decisions for your organization.

PKI: Zero to Hero

Our PKI offering provides a secure, structured way to explore how PKI can support your security strategy through a 2-day workshop. Together we evaluate and detail your trust architecture, and the role PKI can realistically play in your environment. We bring the expertise and practical experience. You bring the will to learn and your security requirements & concerns. With this jumpstart, you gain a clear starting point for your PKI journey, reducing uncertainty, supporting confident early decisions, and creating a practical foundation for both today's needs and future growth.

What we need

- Current security concerns in your business
- Your approximate level of understanding of PKI; specific doubts of concepts

What you get

- Clear starting point
- Strong & scalable PKI high-level foundation concept design document
- Oversight over your enterprise security
- Decision making skills in regard of your enterprise security
