

Full Suite Overview

Why WorkClout?

The very goal for every manufacturer at it's core can be broken down into a few simple questions.

1. What is my operating efficiency and job cost?
2. What can I do to reduce waste and increase my margins?

This is where WorkClout comes in. WorkClout aligns your team on all fronts with a simple-to-use dashboard and portal.

Understand all points of waste throughout production and suggests actions to ensure that your team operates at optimial efficiency.

Our mission is to make production across all manufactuering affordable, quick, and easy. At nearly 10% the cost compared to competitors, WorkClout leverages modern cloud technology to ensure that your IP is secure (beyond regulation standards) and that and your operations are up 99.9% of the time. Our team operates with customers in mind, we continually strive to provide the best support and experience for customers who are using WorkClout to grow their business.

Modern Technology

Quick To Implement

Extremly Affordable

Get Started Quick

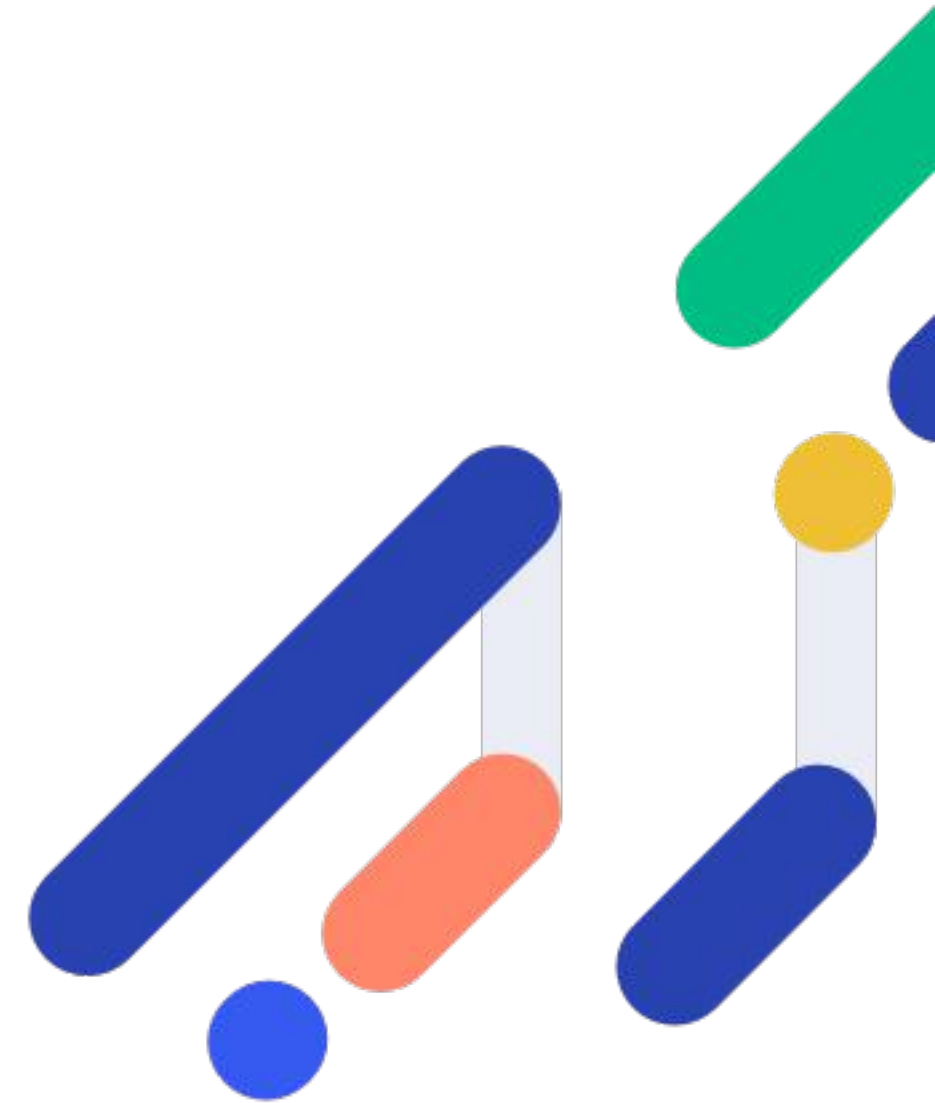

WorkClout was designed to allow your team to hit the ground running and instantly reap the benefits of a fully integrated production management system. Our feature guides allow you to learn the system as you go.

Designed For Manufacturers

Built specifically for manufacturers, WorkClout covers all the scenarios that may evolve from a unique MTO (make-to-order) or MTS (make-to-stock) scenario. Combined, our team has over 15 years of experience in the manufacturing and technology industry. Our team is exactly who you'd want to build great software for your business.

Checking All The Boxes For Your Business

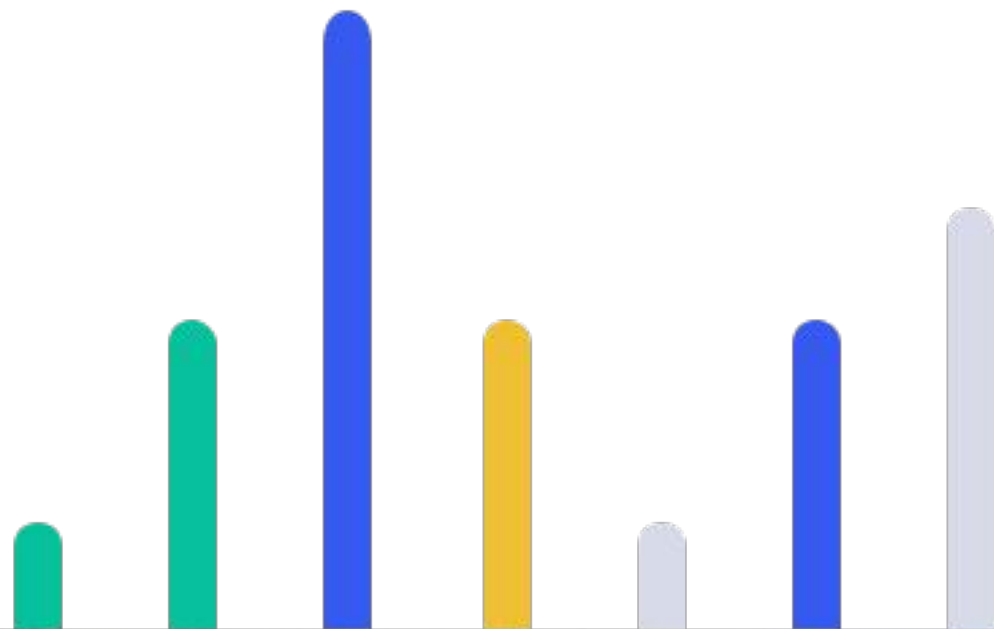

- Improve cycle times, overall equipment effectiveness, and productivity.
- Improve scheduling and make educated insights based on data.
- Mobile ready and available on the go.
- Embrace Six-Sigma and reduce waste from all angles.
- Gain visibility to all aspects of production at any given time.
- Collaborate instantly and easily with any department.
- Supports multiple locations and workflows.

"38% increase in capacity 2 months after use. Solved the problem of communication and transversely improved our production efficiency as well."

— Henry Mann, President at Package 5

Get accurate answers to your most pressing performance and business questions in real-time.

Operational Performance

Which orders should I run?
Are orders completed on time?
Should jobs be combined?
What is causing the waste for this run?
What is the OEE? How can I improve OEE?
How can I increase capacity?
How do I save time on maintenance?

Business Performance

Where am I seeing the most loss?
Which products are selling the most?
What's my production performance?
How can we increase on-time performance?
Which plan is more efficient?
Am I understaffed?

Simple To Use, Easy To Get Started

The next few pages point out some of the key features and benefits in the WorkClout suite. Our product is continually evolving to fit your requirements.

Job Workflows

State Mangement

- Create and manage custom workflows
- Enable triggers for notifications and forms

Job Tickets

- Manage items to produce
- Visualize jobs status within workflows

Take Action

- Delegate tasks to employees
- Know exactly what needs to be done to move the job forward

Advanced Scheduling

Auto Schedule Runs, Real-Time

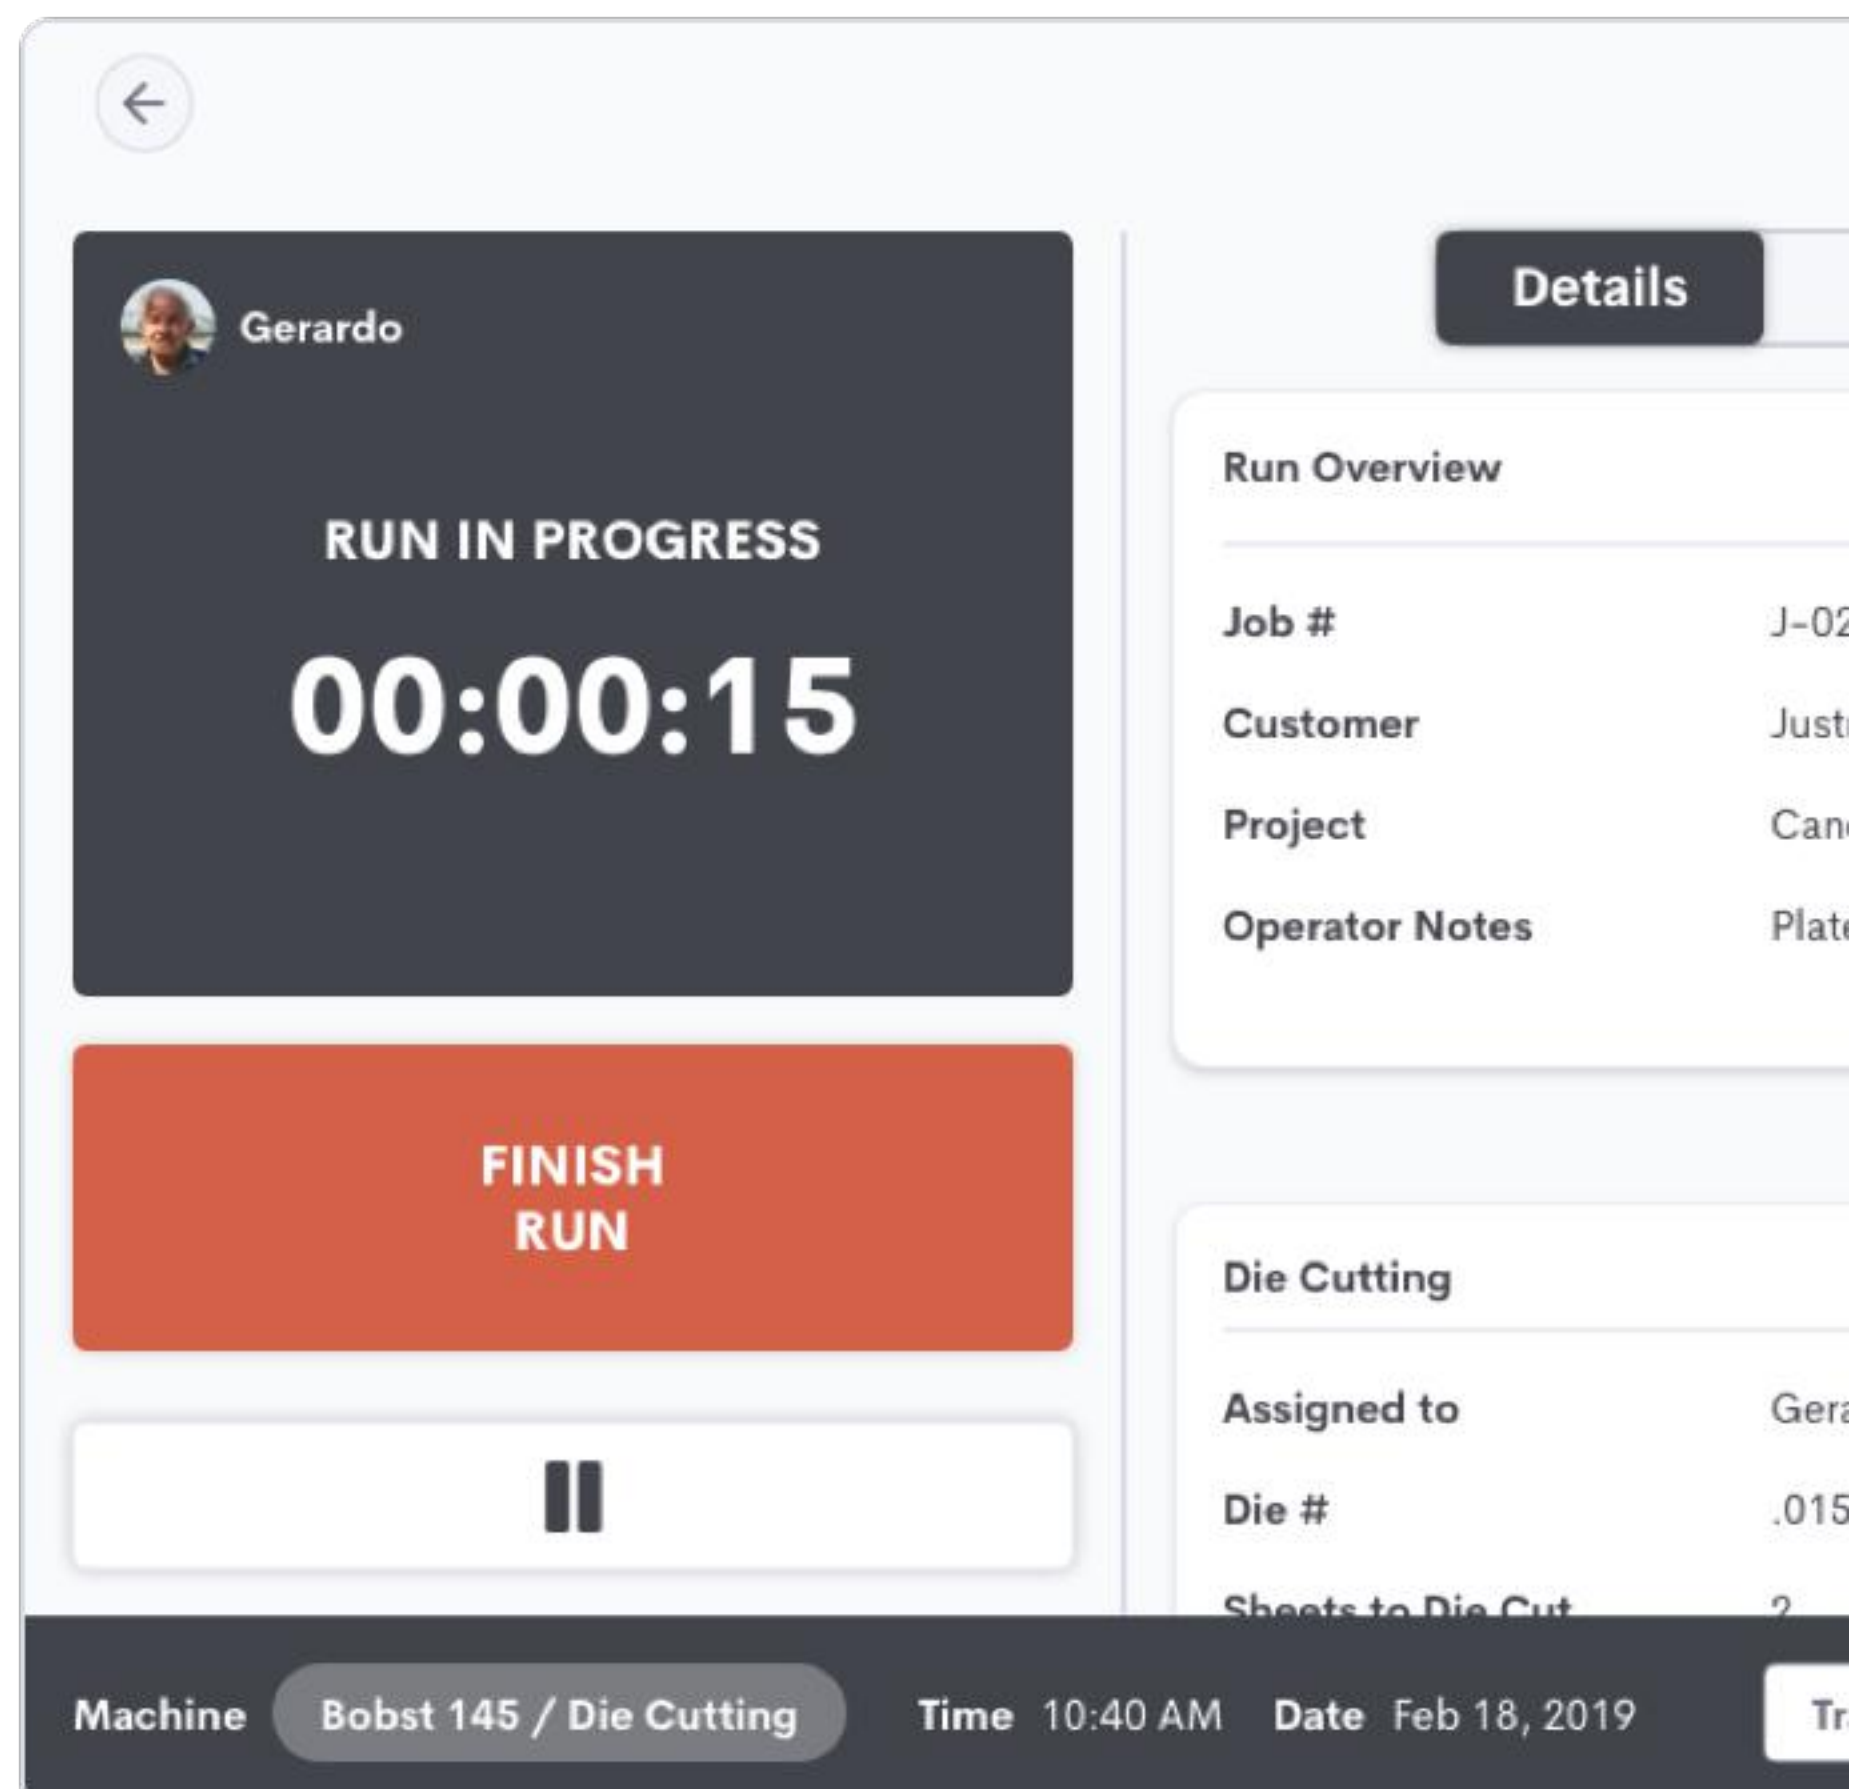

- Easy view of all production
- Visual drag and drop scheduling
- Estimated run times based on job details
- Assisted scheduling based numerous constraints

Operator Portal

Real-Time Data Logging

- Log run times and quantities
- Reference all job information in one view
- Track machine idle times
- Track machine downtimes
- Pauses for shift changes or breaks

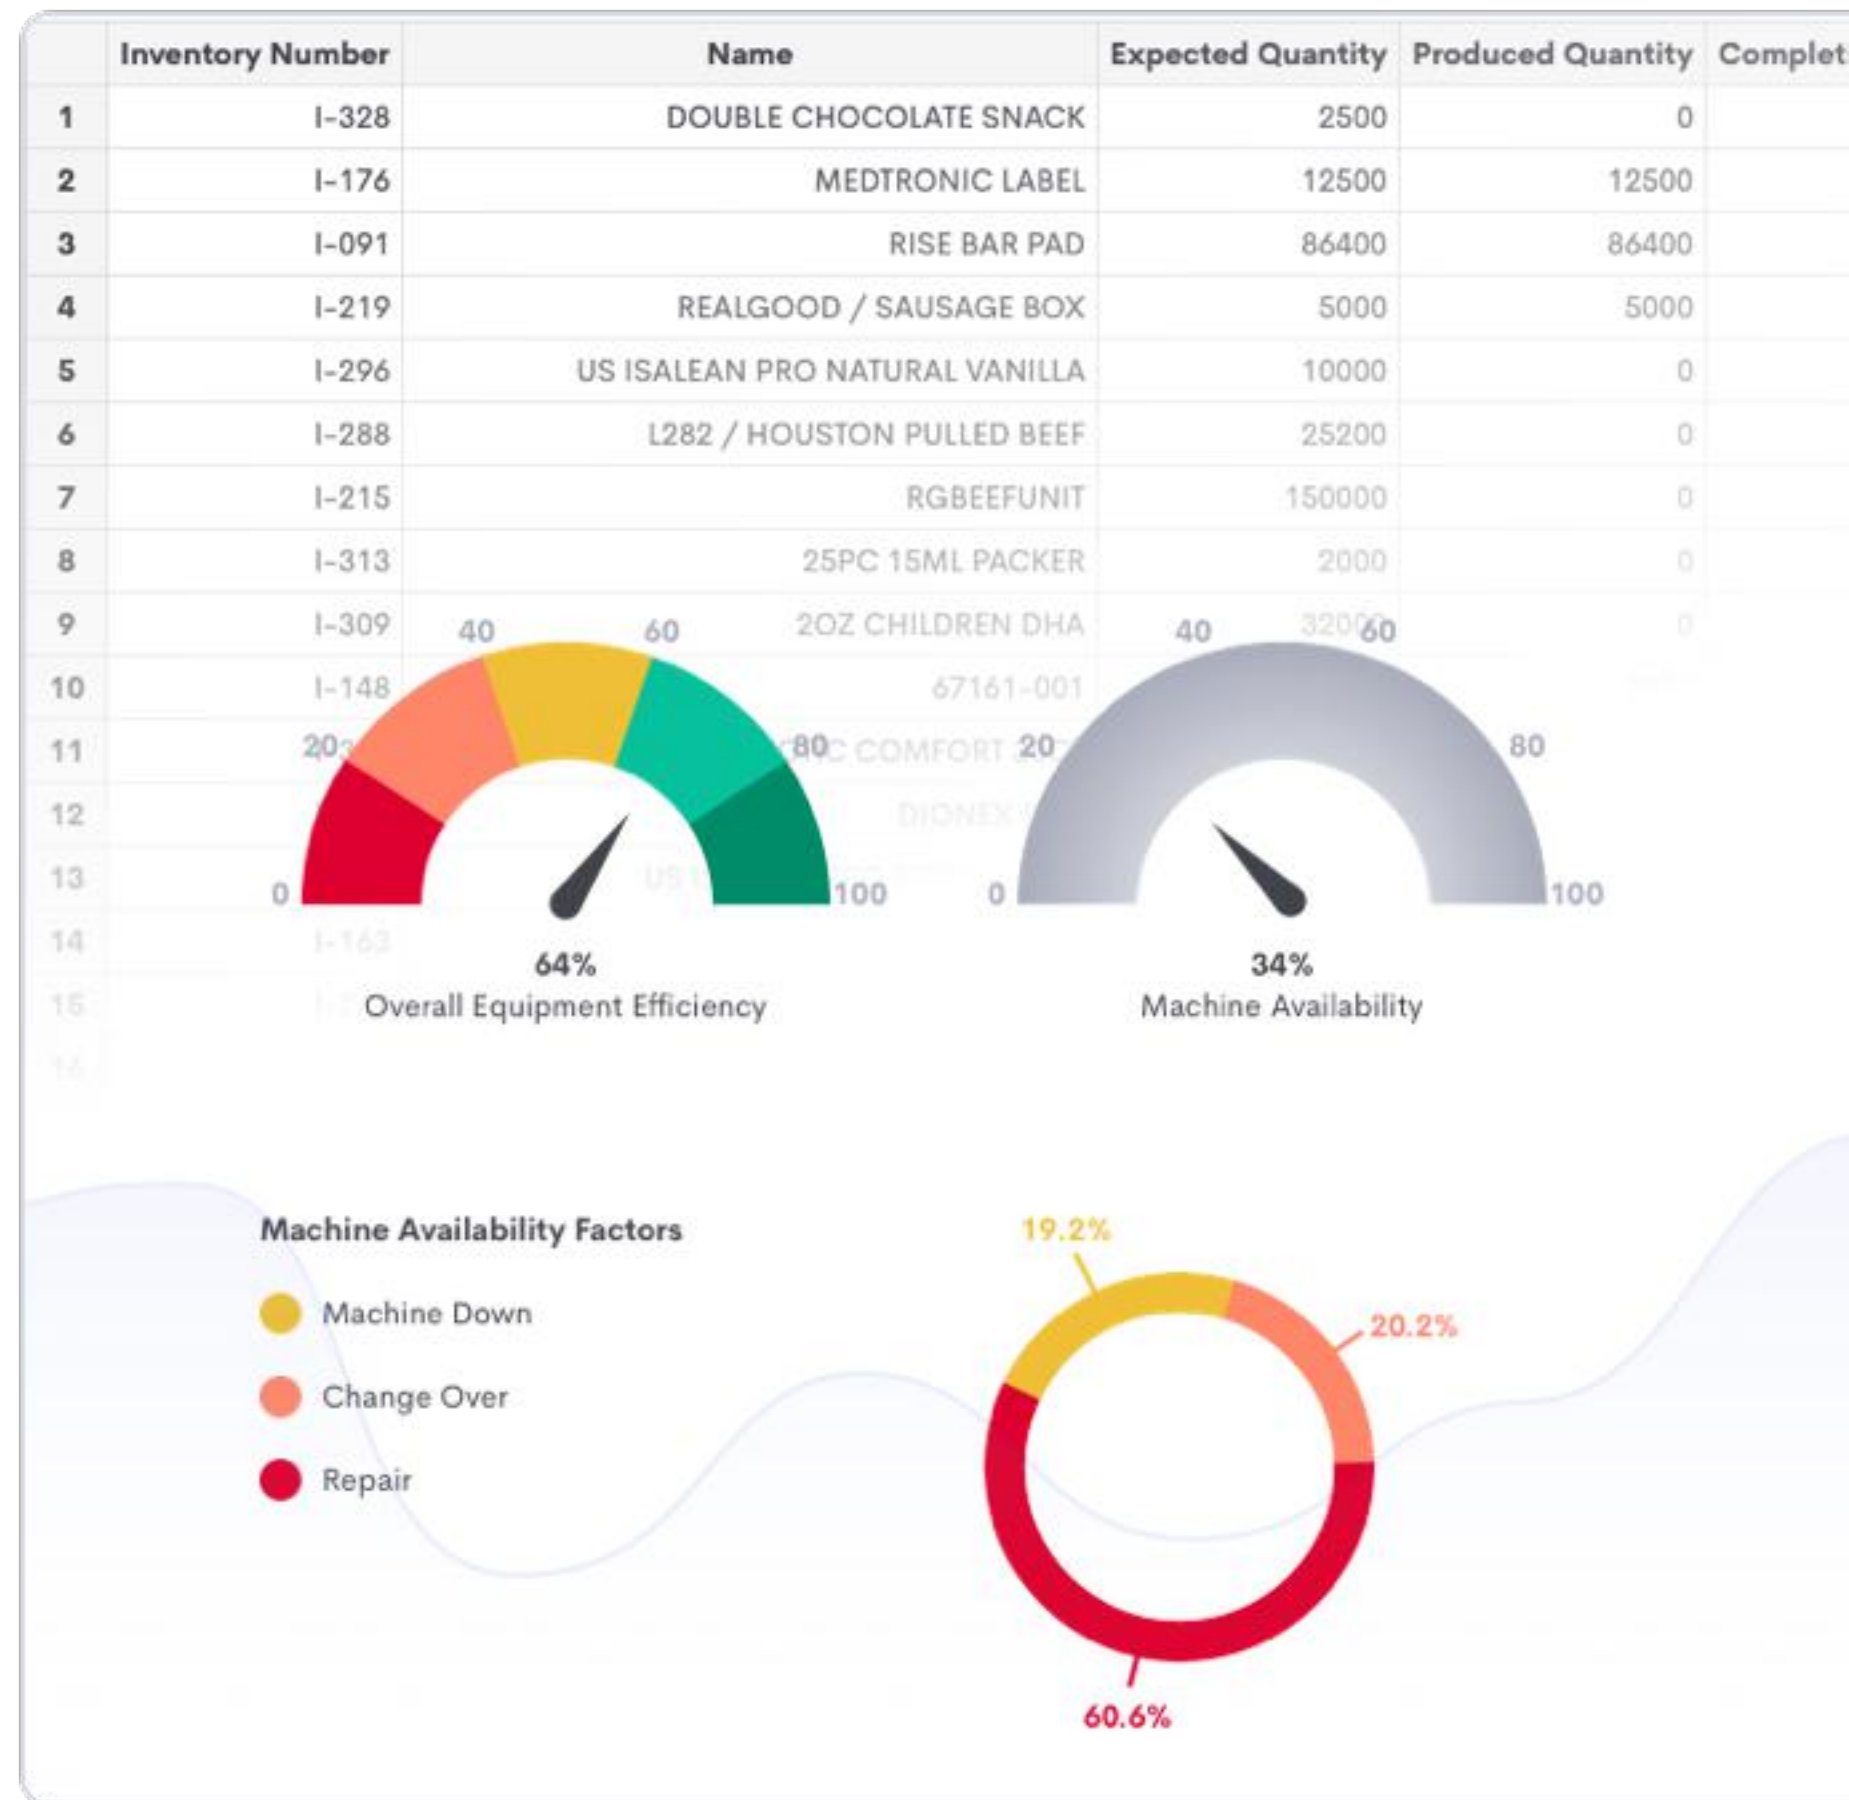

Analyze Reports

Active Dashboard and Reports

- See indication of current activities with modular and custom graphs and charts
- Get Automated OEE and efficiency reports
- View Downtime and Idle analysis
- Check production output reports by company, workflow and work centers

Inventory Management

Spec and categorize all inventory

- Visualize all item movements with an easy to reference ledger for all items
- Batch items into lots and bins
- Automate item movements via the operator portal when jobs are complete
- Build components and reference a BOM for every job
- Associate tooling for operator reference

Integration Friendly

Retrieve and Send Data w/ Integrations

Seamlessly pair WorkCloud w/ your existing system and ensure data across various departments are always updated.

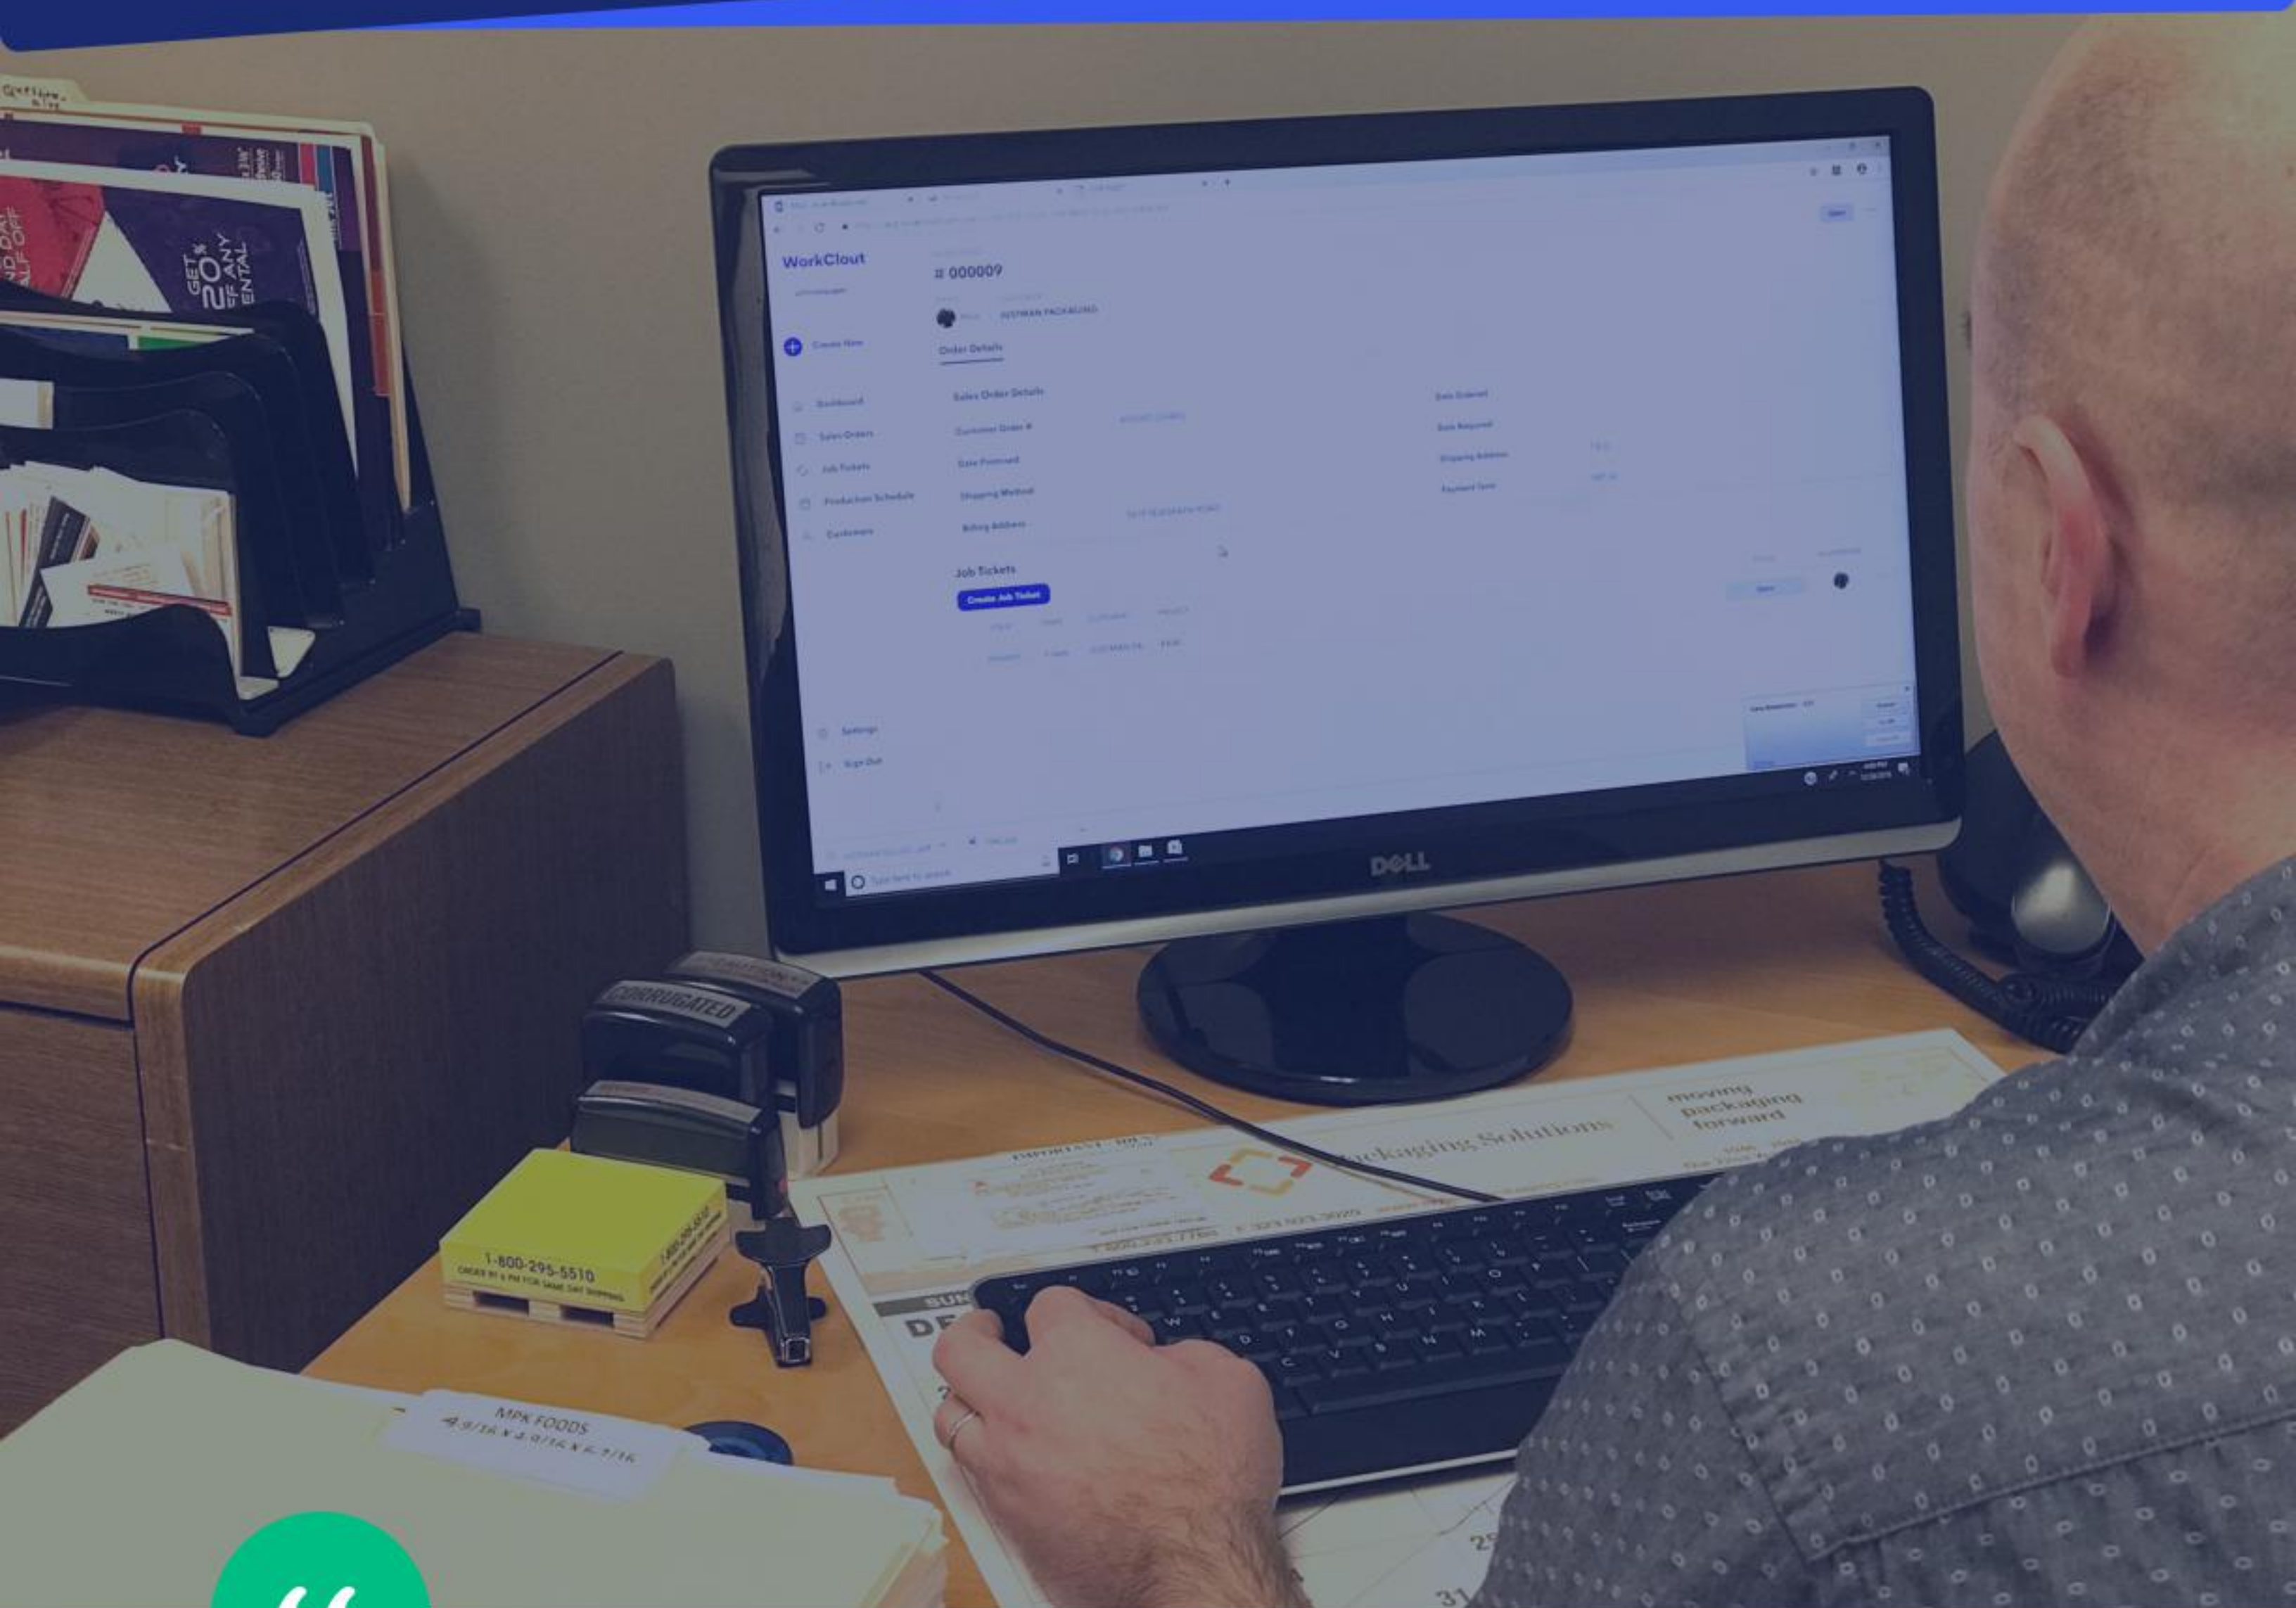

Security

WorkCloud is built with security in mind

- SSL encrypted to keep your sensitive information safe.
- Backed up to the cloud everyday for your production.

“

"One of the biggest problems we faced were coordinating runs and accurately measuring them. WorkClout made it easy to sync all of our existing data and made our process much more simple."

— Jason Walia, Operations Manager at Flex
