THE
AMBOOO
STORY IN 90
SECONDS

Our sales team Germany

THE AMBOOO STORY

Even from a young age, I was drawn to the wide world. My international journey began as an exchange student in the US and, after graduating from high school, I took up a commercial apprenticeship focusing on foreign trade.

In 1993, my first professional trip took me to China, where I was fascinated by the versatility of bamboo as a plant, food and material.

This fascination became my vocation and: I made it my goal to become a pioneer and establish the rapidly renewable raw material bamboo as a high-quality building material in Germany. While still employed at an international trading company, I immersed myself in the world of bamboo in my free time. From a vision to reality.

The first milestone involved setting up the company. This was followed by a container full of bamboo parquet flooring, which I unloaded myself in a friend's garage - my first improvised warehouse - while my apartment served as my office.

This was followed by years of intensive research, numerous test series, and setbacks, but also constant improvements.

In 2002, we achieved a breakthrough with equestrian sports systems and bamboo decking, and in 2007, we launched our export business. Over the past three decades, I have remained innovative and willing to take risks, and I have learned from failures while continuing and persevere.

The road to success has been characterized by the support of my family, friends, and investors, the commitment of my employees, the loyalty of my suppliers, and the trust of my customers.

Our pioneering work as the first importer of bamboo parquet in Germany, the use of bamboo in equestrian sports and decking construction, as well as the development of the Top Clip and innovative care products have consolidated our pioneering role.

In 2023, we founded AMBOOO Canada in Toronto and are now also active on the American market. That same year, a dream came true with the opening of our new company headquarters in Achim.

Although we have achieved so much with AMBOOO up to now, I still feel that this story is far from over!

Götz Schmitt & Julia Schmitt-Kolrep

QUALITY AND BEAUTY COMBINED

Bamboo, valued for thousands of years as a reliable building material, is now combined with innovative technology to create aesthetic and environmentally friendly products.

Sustainable and natural

Our bamboo stands for the highest ecological standards. It binds more carbon dioxide (CO₂) than is released during production and transportation.

With a growth rate of up to one meter per day, it is one of the fastest growing raw materials in the world. What's more, our bamboo comes exclusively from managed plantations, ruling out any deforestation of conflict timber.

Our products are made of purely natural materials and yet offer outstanding properties. They are flame-retardant and comply with a tested fire protection class. Due to the natural technical manufacturing process, our bamboo products are also characterized by a straight shape, with low swelling and shrinkage, which makes processing as easy as possible and offers more application possibilities.

Innovative production process

Our HCS production process guarantees the highest quality. After the bamboo is harvested, it is cut into thin strips and defibered. This is followed by thermal treatment in which sugar and moisture are removed. A resin is then added to the fibers and pressed with 4000t of pressure into the panels. The profiles are then treated with our care oils produced in Germany.

The result is a material with an exceptional density of up to 1250 kg/m³.

We use it to manufacture a wide range of products - from standard elements to custom-made products. Thanks to our flexible production, we can manufacture almost any desired product from our bamboo panels.

The combination of selected raw materials, pressure, thermal treatment and oil is what ensures the quality and special properties of our AMBOOO products.

HIGHLAND BAMBOO

Are you looking for a reason not to build with bamboo?
We've been doing just that for 30 years and have yet to
come up with one. We do, however, have many reasons
for building with AMBOOO bamboo products and here
are just some:

Variety of colors

With 6 best-selling shades, AMBOOO offers the largest selection on the market -
from natural Sand to elegant Granite Grey.

Dimensional stability

Low swelling and shrinkage behavior;
thanks to AMBOOO HCS technology

Custom made

If you have any special requests,
such as material thickness or color, that you cannot find in the
catalog, please contact us!

Flame retardant

according to fire protection classes EN13501 and ASTM84

Easy-care surface

One quick maintenance session per year is all it takes.
The compacted structure prevents dirt and moisture from penetrating.

Extreme hardness

With 1,250 kg/m³ and a Brinell of 9.7, our bamboo outperforms even tropical hardwoods and will bring you joy for generations.

The mark of
responsible forestry
FSC® C108302

Sustainable future

Bamboo from well-managed forests. Ready for harvest in just five years, binds more CO₂ than wood and protects valuable forest resources. It couldn't be greener. Many of our products are already from FSC®-certified stock.

Up to 25 years warranty

With the right care, a companion for life.
AMBOOO boasts premium quality
and real longevity.

Slip-resistant

The surface of our decking profiles is
slip-resistant according to DIN 51097 (evaluation group C)
and DIN 51130 - R12.

SAND

Our latest and at the same time lightest color "Sand" not only enables new designs, but also impresses with its absolutely natural appearance. The special play of colors of bamboo comes into its own and is not a flaw.

Color:	Sand	
Material:	Highland bamboo	
Dimensions:	20x140x1870mm	20x200x1870mm
	3/4''x 5 1/2''x 6' 1 5/8''	3/4''x 7 7/8''x 5 1/2''
Article number:	555910001_L	555910002_L

WALKING ON SAND

ESPRESSO

Espresso, our darkest material with a particularly smooth, silky matt finish, is produced using a manufacturing process specially developed by AMBOOO. The bamboo is heated longer and more intensively, similar to a good espresso bean. This elegant classic gives your project an elegant and high-quality appearance and enhances both modern new buildings and existing buildings.

Color:	Espresso
Material:	Highland bamboo
Dimensions:	20x140x1870mm 3/4'' x 5 1/2'' x 6' 1 5/8''
Article number:	553954223_L

CLASSIC ELEGANCE

IPE

Ipe, also known as "Brazilian walnut wood" or "ironwood", stands for aesthetics and durability. Our "Ipe" color brings exactly these properties to your outdoor area - without cutting down a single tree that has grown over decades.

Color:	Ipe
Material:	Highland bamboo
Dimensions:	20x140x1870mm 3/4'' x 5 1/2'' x 6' 1 5/8''
Article number:	553954225_L

TROPICAL WOOD AESTHETICS

GRANITE GREY

Your patio appears modern, straightforward and integrates between the herb beds of a wild garden as well as between gabions and your pool. Granite Grey forms the bridge between nature and contemporary architecture.

Color:	Granite Grey
Material:	Highland bamboo
Dimensions:	20x140x1870 mm 3/4'' x 5 1/2'' x 6' 1 5/8''
Article number:	553954224_L

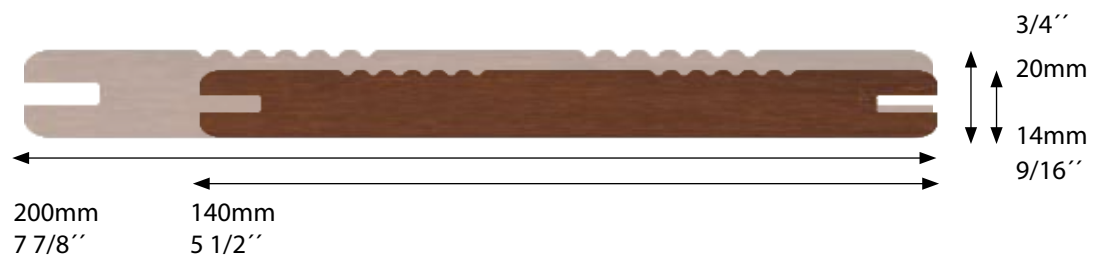

SUBTLE HARMONY

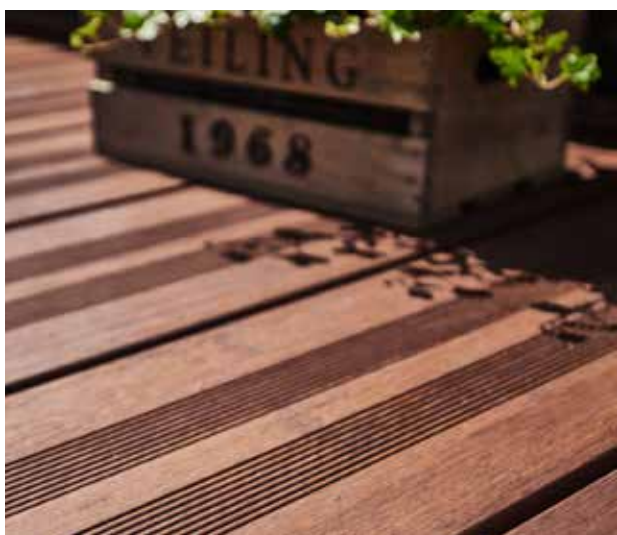

COFFEE

Red-brown tropical woods such as Bangkirai have always been a favorite for decking. Unfortunately, however, valuable rain-forest is sacrificed for this. Our "Coffee" color not only offers a sustainable alternative without wood, but also impresses with its aesthetics and durability. It's not for nothing that Coffee is one of our most popular colors.

Color:	Coffee	
Material:	Highland bamboo	
Dimensions:	20x140x1870mm	20x200x1870mm
	3/4''x 5 1/2''x 6' 1 5/8''	3/4''x 7 7/8''x 6' 1 5/8''
Article number:	555910000_L	552023296_L

ELEGANT WARMTH FOR YOUR DECKING

CLOSED DECKING

The perfect solution for an elegant, seamless decking design. With specially developed bamboo profiles, a robust aluminum substructure and invisible clips, Closed Decking achieves a look reminiscent of elegant parquet flooring.

Just large enough to guarantee water drainage, the small gap prevents unwanted objects from falling through. Functionality combined with elegance make Closed Decking the solution of choice for private terraces and conservatories, but also for hotel and restaurant projects.

Just a 3mm gap.
Ensuring that
nothing is lost.

CUSTOMER FEEDBACK ON THE TOP CLIP

My customers in Scandinavia love the Top Clip!
Whether for decking made of bamboo, WPC,
or thermowood - one clip for all applications!
Klaus Radenbach | Sales representative Scandinavia

I particularly appreciate the Top Clip: the pre-assembled screw saves
an enormous amount of time - making the installation of decking
boards much quicker and less complicated. The clip also ensures an
almost invisible fastening.
Jens Lindert | Crosscuts Toronto

The Top Clip is super. Installation is quick and easy. I only
need one clip for 90% of deckings. Fewer bearings and
errors due to missing or incorrect fastening.
Fritjof Meyer | Gardeners and landscapers Bremen

THE IDEAL SOLUTION

Our Top Clip is the ideal solution if you want to install decking boards quickly and easily.

Thanks to the pre-assembled screw, you not only save time, but also benefit from an invisible screw connection. The black color of the clip ensures that it virtually disappears in the shadow of the joints. The result? An aesthetically perfect terrace with no visible fixings.

In addition, the Top Clip enables even spacing between the planks, which ensures a harmonious joint pattern - a detail that makes all the difference.

Whether for our high-quality AMBOOO decking boards or other double-sided grooved boards made of bamboo, wood or WPC: the clip is versatile and gives your decking an elegant finish.

SUBSTRUCTURE

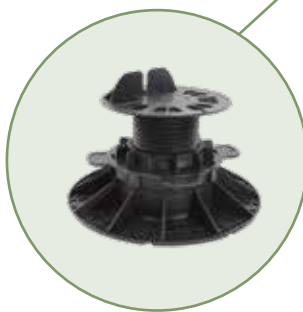

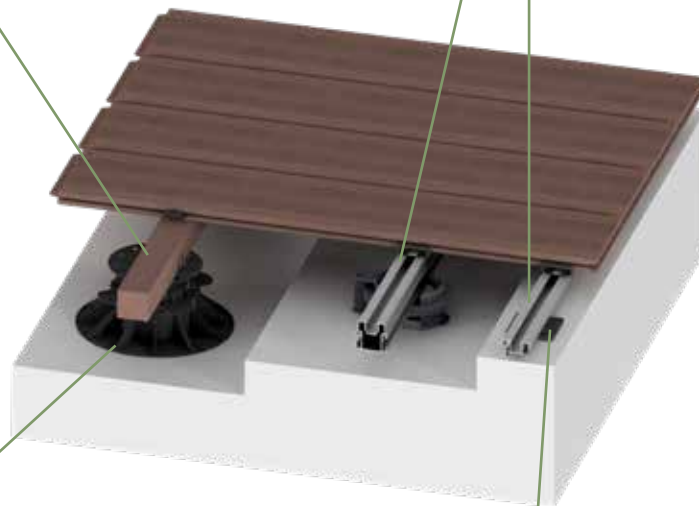

A professionally installed substructure is essential for a stable and durable bamboo deck. A substructure provides structural material protection and creates a gap between the substrate and the floor covering. We offer a choice of bamboo or aluminum substructure, with or without adjustable feet.

The bamboo substructure remains in the material ensuring durability, simple processing as well as very good cost-benefit ratio.

The Aslon aluminum system involves less preparatory work, enabling even faster installation.

Stilt supports are ideal for greater installation heights and height compensation. The pedestal supports enable precise alignment of the substructure.

Installation with rubber pads is particularly suitable for low installation heights.

EASY TO CARE FOR BY NATURE

Bamboo decking is naturally low-maintenance, but as with any high-quality surface, regular care is the key to lasting beauty.

Basic care begins with regular sweeping to remove dirt and dust. More stubborn dirt can be removed by rinsing thoroughly with water.

For tougher deep cleaning, we recommend our specially developed decking cleaner. Our anti-slip cleaner is the ideal choice for stubborn stains. These products are perfectly tailored to the needs of your bamboo decking.

Cleaning is followed by all-important oil care. Our bamboo care oil acts like a moisturizer for your decking, protecting against the weather and refreshing the color.

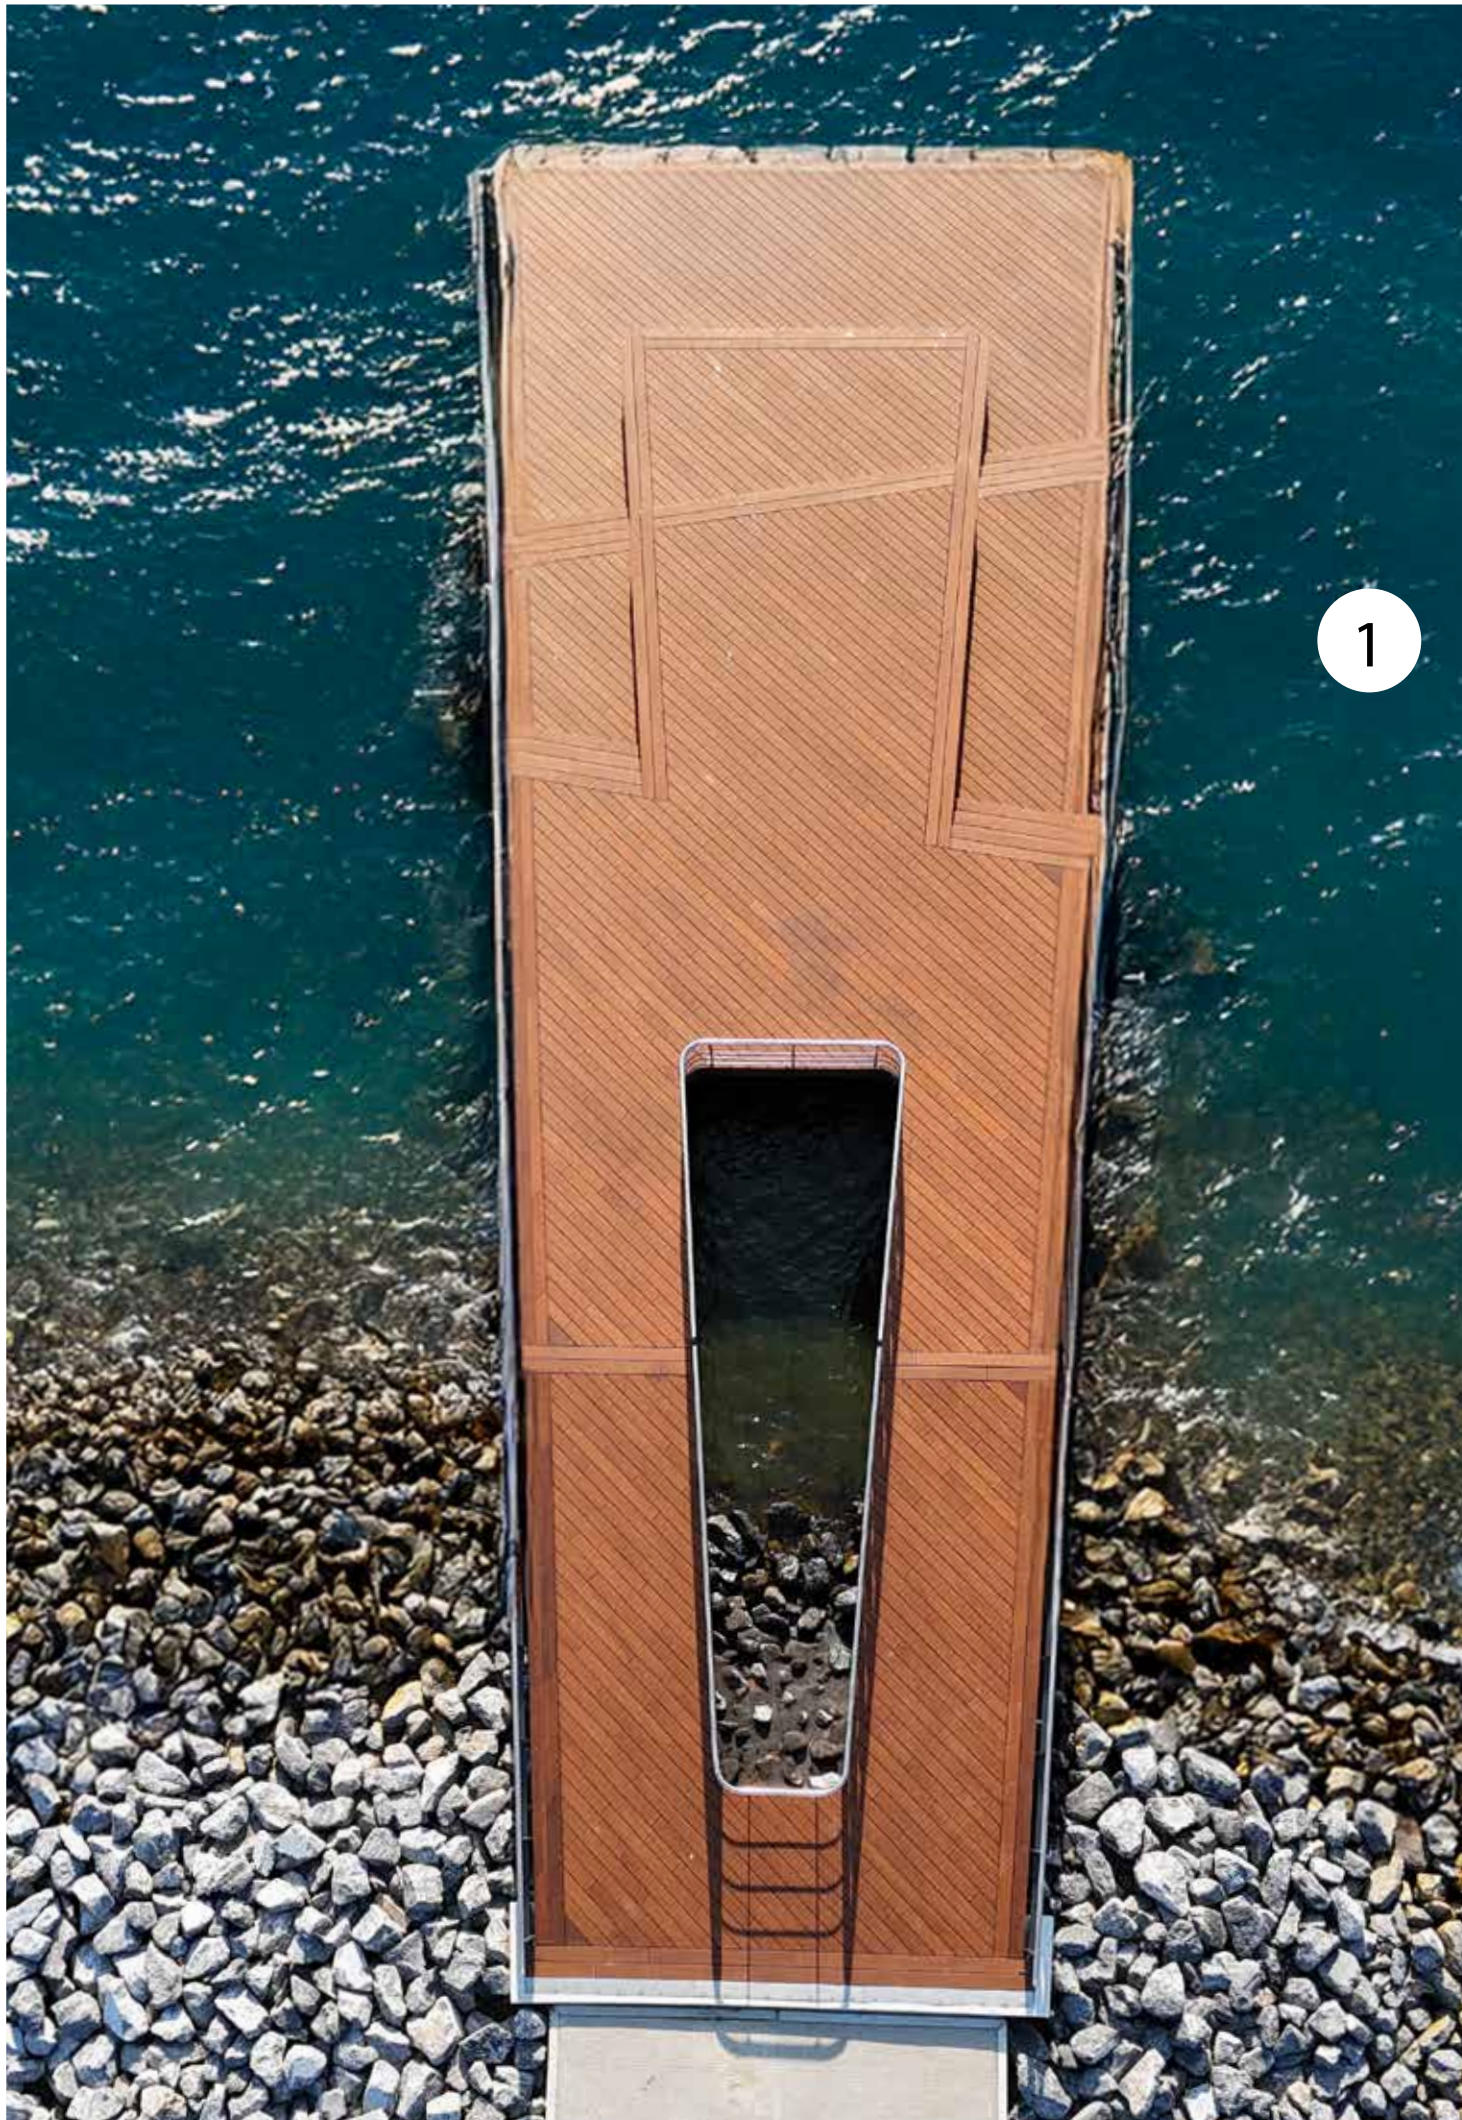

The oil should be applied thinly and evenly. Normally, once year is sufficient. However, more heavily used surfaces or pool surrounds should be treated more frequently.

But even if maintenance has been neglected, help is at hand to restore bamboo to its natural beauty. Thorough cleaning and subsequent oil treatment, will bring your terrace back to life.

Your AMBOOO bamboo terrace will reward your care with years of beauty and durability. With minimal effort - regular sweeping, occasional cleaning and annual oiling - you can create a place where you will always feel at home.

Enjoy your terrace! It's not just a piece of nature on your doorstep, but also a testament to sustainable and stylish living.

OUR PROJECTS

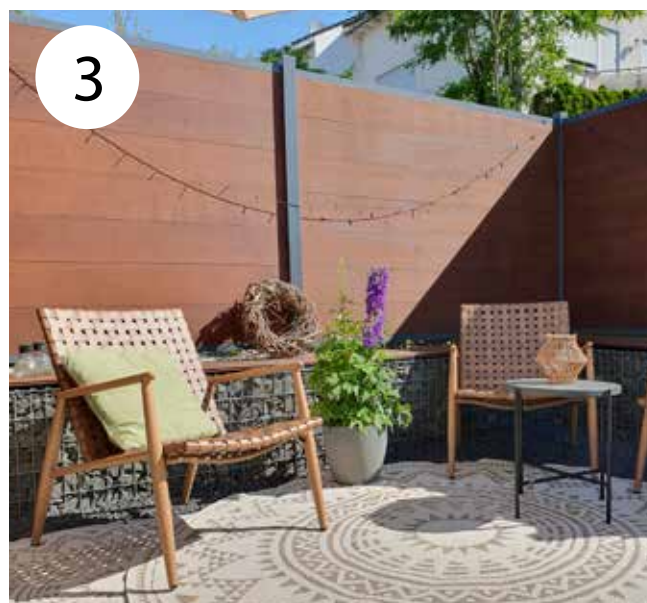

We at AMBOOO are always impressed by how creative our customers are when it comes to our products.

From classic applications to unusual projects, the examples below highlight how versatile bamboo can be and the potential our material has to offer.

But that's not all: we are happy to go one step further and also fulfill individual customer requests. Whether it's special designs, made-to-measure sizes or even completely new products such as bamboo flooring - we can develop custom solutions tailored precisely to your requirements.

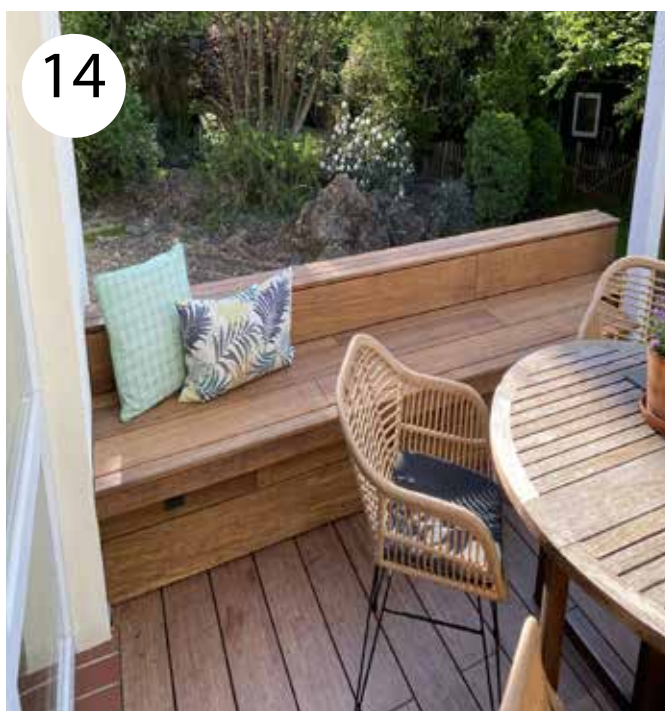

Be inspired by our creative projects and discover the almost limitless possibilities that bamboo offers for your own ideas!

TERRACE PLANNER

Plan your decking with our AMBOOO terrace planner - your assistant for the perfect bamboo terrace!

WITH JUST A FEW CLICKS YOU ARE READY FOR
YOUR CUSTOMIZED TERRACE PROJECT:

Simply draw in the floor plan for your decking and select your preferred material and installation method. Then choose the appropriate substructure type.

Our terrace planner will take care of the rest and draw up a detailed material list of all the parts you need together with an instant price preview. This will save you both time and effort when planning your Amboooo bamboo terrace. Visit our website today and discover how easy terrace planning can be!
