

Staff Product Designer · Infrastructure & AI Workflows

Summary

13 years building products and the systems behind them, across fintech, cybersecurity, enterprise SaaS, and AI platforms. Specializes in design systems, tools, and AI-native workflows that scale impact without scaling headcount. Technically fluent across React, Python, MCP servers, and engineering codebases.

Skills

Design: Design Systems · Product Strategy · Information Architecture · Agentic Workflows · Design Tokens · Accessibility (WCAG 2.2 / APCA) · Design Tokens · Prototyping · Figma

Technical: TypeScript · React · MCP · Claude Code · Python · Storybook · Tailwind CSS · Code Connect · Component Architecture · axe-core

Education

National Aviation University
Ukraine, Kyiv
M.S. & B.S.,
Avionic Systems Interface Design

Beyond Work

Aviation enthusiast working toward a private pilot's license. Drawn to the complexity of flight systems and the interaction design challenges they present. Aspiration: cross the Atlantic in a small plane.

Experience

S&P Global · AI Market Intelligence Platform

Staff Product Designer, Aug 2025 – Now

- Built CorsasDS solo in 10 weeks (est. 6–8 person-months of equivalent work): a 40+ component React library with an MCP server that generates code-backed prototypes, eliminating manual Figma-to-code translation. TypeScript seals non-compliant components at compile time.
- Led UX strategy and product architecture for Spark Assist: audited 5,441 AI tools, designed workflows for AI generation control and structured reasoning, and delivered a 5-mode citizen-developer platform vision to product leadership.
- Defined a 3-phase AI strategy bridging design and engineering: AI tooling adoption, agentic prototyping, and autonomous workflows; presented to product and engineering leadership at a company-wide initiative review.
- Conducted and delivered WCAG 2.2 AA audit covering ΔE2000 color-vision simulation, light/dark contrast, and axe-core checks in Storybook CI.

SBI · Business Strategy & Analytics Platform

Lead Product Designer, Jun 2023 – Aug 2025

- Standardized UX across 4 products with a 100+ component design system, reducing delivery time by 30% across design and engineering teams.
- Built an AI-assisted growth planning tool that automated manual data synthesis steps, reducing analyst prep time and accelerating growth plan delivery for sales teams.
- Launched a product roadmap feature tied to a tiered subscription model, projected to grow recurring revenue by 35%.

Kontron · Device Management Software

Senior Product Designer, Jul 2022 – Jul 2023

- Launched a 40-component design system and led a full website redesign in 3 months, cutting design-to-delivery time by 50% and establishing the first shared component library across the organization.

Coalition Inc. · Cybersecurity SaaS

UX Designer, Dec 2021 – Jul 2022

- Led website redesign at Coalition's \$5B valuation, Series D launch, and Forbes Fintech 50 recognition; built a design system integrating acquired brand assets in under two weeks during M&A integration.

Previous roles

Product Designer / Design Lead, Apr 2013 – Nov 2021

- Built reusable design systems and component workflows across 10+ product teams in 15+ countries (fintech, edtech, enterprise SaaS); led a remote team of 4, mentored designers and developers, 30%+ repeat client rate across 58 clients.
