Introduction

I am pleased to present the 2022 Catholic schools' census digest.

This year, the census digest coincides with the 175th anniversary of the Catholic Education Service, which we have been delighted to celebrate. Additionally, for the ninth year in a row the return rate for our census has been 100%. This means that the CES census remains the most accurate report of Catholic education in England but, also, that we are now able to reflect on almost a decade's worth of precise data.

We are grateful to every Catholic school in England, both independent and state-funded, for returning their data in a prompt and timely manner, especially given the speed of changes in the sector, which has seen a 17% increase in the number of Catholic academies.

The CES annual census remains one of the most vital tools in monitoring and promoting the success of the country's largest single provider of secondary school education and second largest provider of primary school education. Not only does the census give us the ability to present highly accurate information about Catholic schools in England but it also provides us with the essential data needed to monitor long-term trends in Catholic education.

As such, the information from the census is invaluable in our discussions with our government partners, parliamentarians, local authorities, and the media.

Collating the census data and creating this digest is no small undertaking, so I would like to thank specifically Robert Rushworth and Rebekah Hayward for the organisation and production of this document.

Definition of terms used in the census digest

Census data are grouped into state-funded and independent schools and colleges. For the purposes of this document the two groups comprise these governance categories:
State-funded: Voluntary Aided; Sixth Form College with a Religious Character; Academy.
Independent: Other Independent; Other Independent Special School; Independent School approved for SEN Pupils; Non-Maintained Special.

1 Schools and colleges

The number of Catholic schools has fallen slightly. There has been an increase in Catholic academies as more dioceses create multi-academy trusts. Catholic primary schools have shown a decrease in size and Catholic secondary schools have continued to see a small increase in size.

1.1 Numbers of schools and colleges

The total number of Catholic schools has fallen by eight, from 2098 to 2090. Five state schools and one independent school have closed. One independent primary school and one sixth form college are no longer Catholic.

The total number of schools nationally (including Catholic schools) has increased by 41 to 24,453.

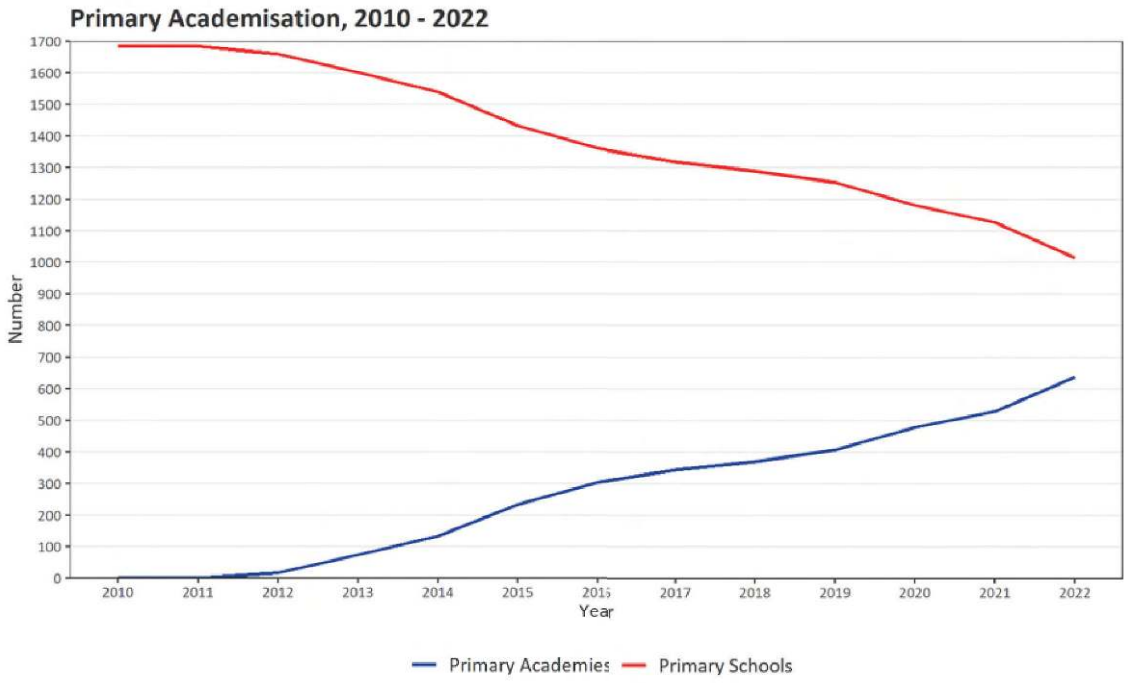

1.1.1 Numbers of schools and colleges by phase

2.8.3 Percentage of pupils eligible for FSM, state-funded secondary schools (trends)

2.8.4 Percentage of pupils eligible for FSM, independent schools (trends)

Whilst the number of pupils eligible for FSM in Catholic independent schools has risen, the overall percentage remains very small.

2.9 Looked-after children

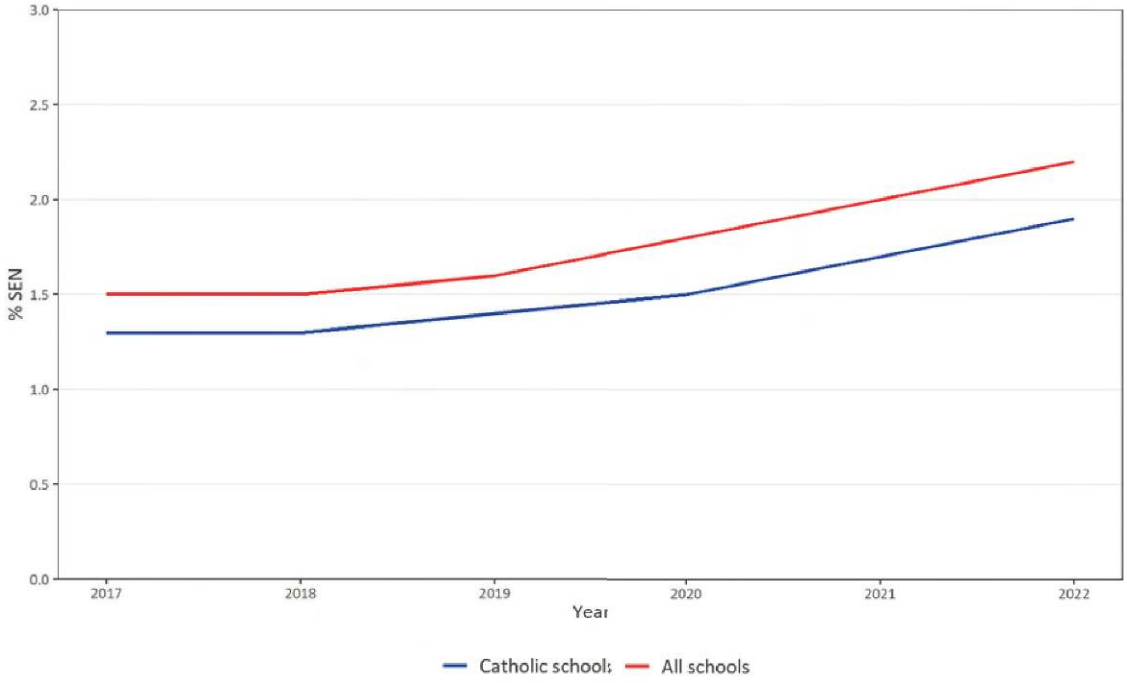

The number of looked-after children in Catholic schools decreased slightly and forms 0.6% of the school population. Across all schools there were 80,850 looked-after children as of March 2021, an increase of 1% compared to 31st March 2020.

	Number of looked-after children	% looked-after children
State funded schools	4,558	0.58
Independent schools	63	0.18

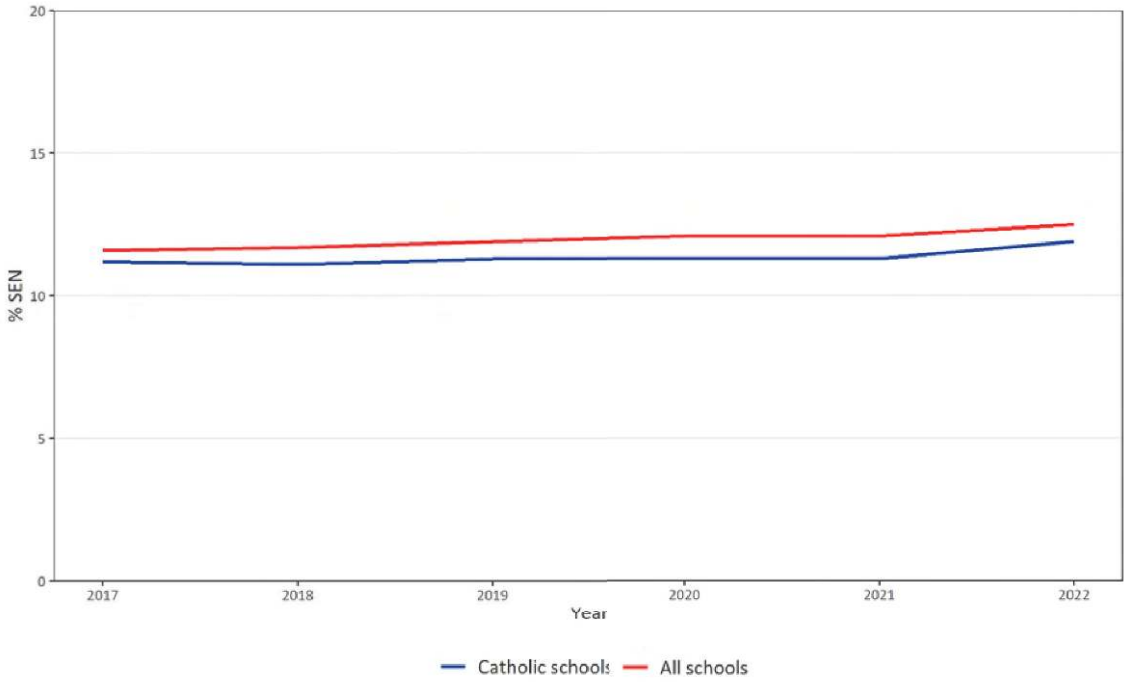

2.10 Special educational needs (SEN)

The figure for pupils in Catholic schools with a statement of SEN or Education Health Care plan (EHC plan) remains marginally below the national figure.

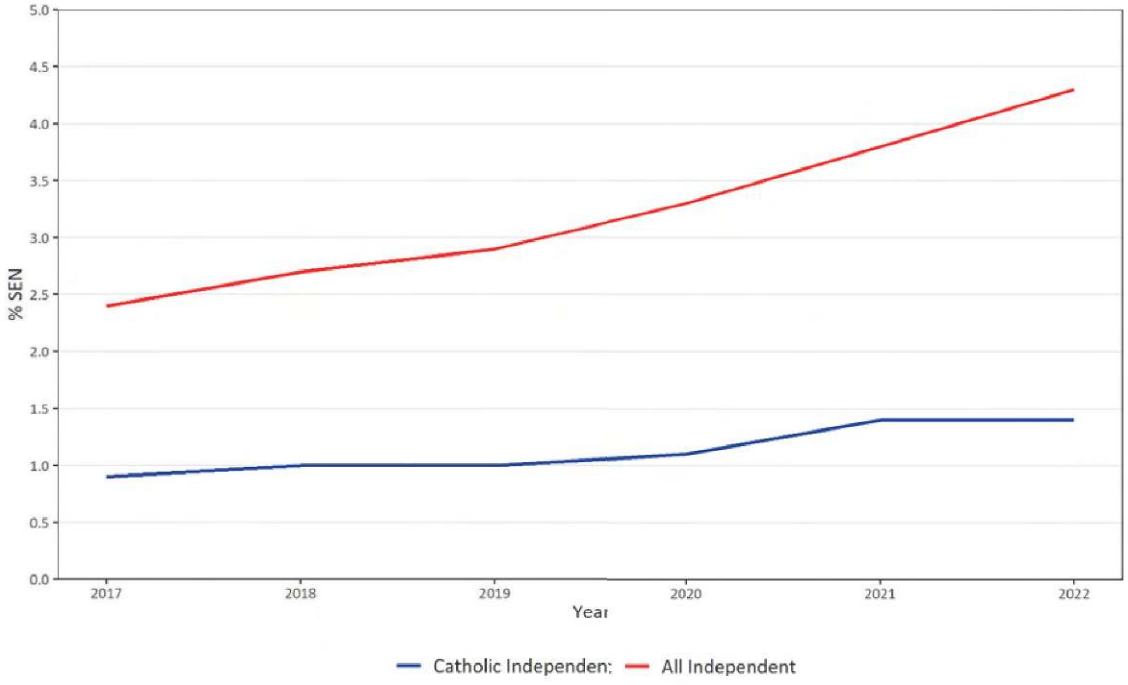

2.10.1 Pupils with EHC plan or statement of SEN, state-funded schools (trends)

2.10.2 Pupils with SEN support, state-funded schools (trends)

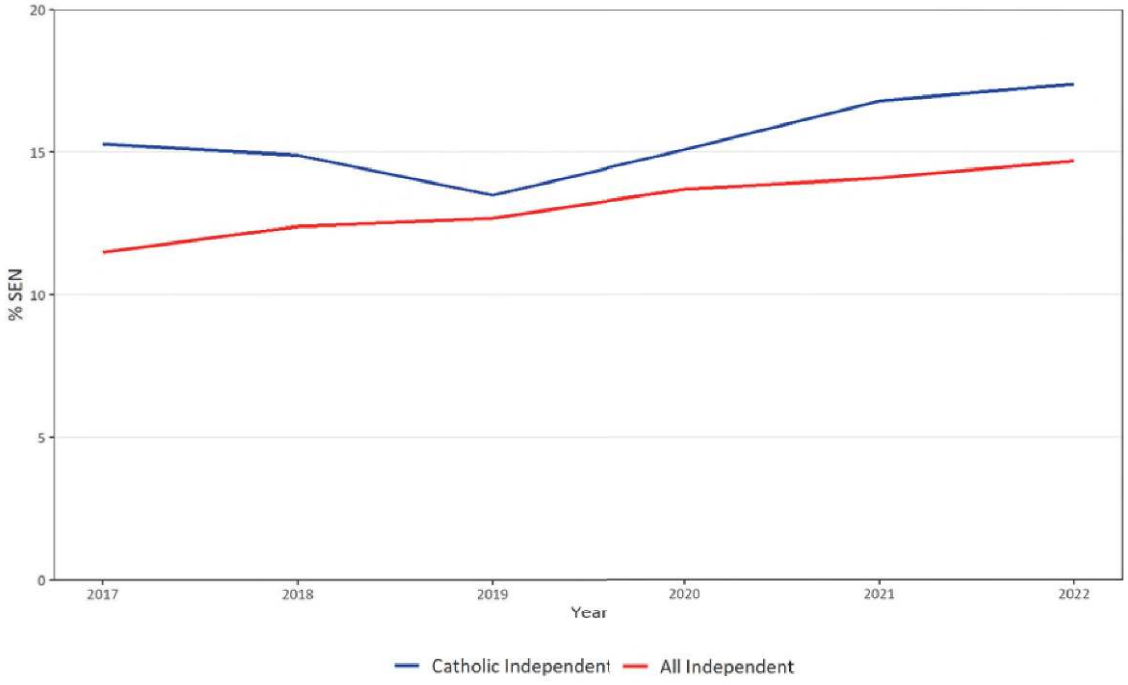

2.10.3 Pupils with EHC plan or statement of SEN, independent schools (trends)

[3] The data for Catholic and national independent schools excludes non-state funded special schools.

2.10.4 Pupils with SEN support, independent schools (trends)

Staff

3 Staff

The number of leadership vacancies in the Catholic sector is higher than last year. The proportion of staff who are Catholics remains relatively constant.

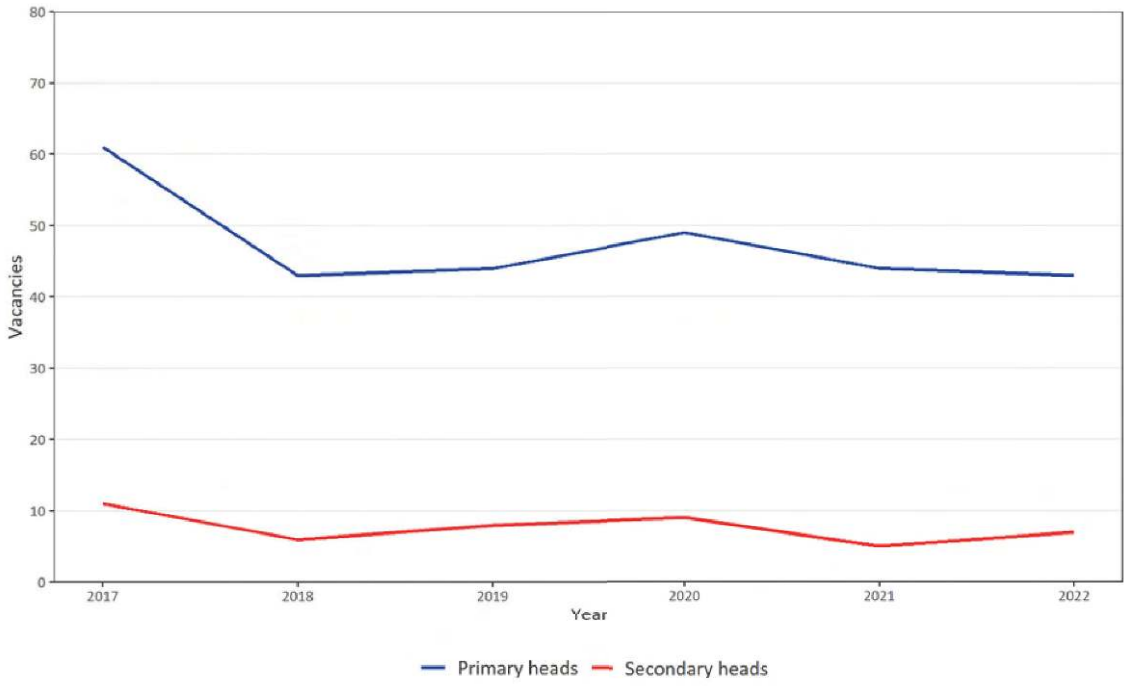

3.1 Leadership teams

3.1.1 Leadership vacancies, NPQH and gender

Headship vacancies have fallen in state funded primary schools and risen in state-funded secondary schools since last year. There is no identifiable trend as is shown in 3.1.2.

A.16 Measures of deprivation

The Income Deprivation Affecting Children Index (IDACI) is a measure of the level of disadvantage experienced by children aged 4-16. It takes account of levels of income deprivation in areas where children live and can be used to chart the proportions of pupils coming from the most deprived 10% of areas, the 10% next most deprived, and so on.

The graphs below, constructed from data provided by the DfE, compare Catholic schools with all schools in England.
