3iQ Ether Staking ETF

Investment Objectives

The 3iQ Ether Staking ETF's (formerly 3iQ Ether ETF) investment objectives are to seek to provide unitholders of the ether ETF with exposure to the digital currency ether, and the daily price movements of the US dollar price of ether and the opportunity for long-term capital appreciation.

On October 19, 2023, the fund commenced staking a portion of the ether held in its portfolio. The Manager believes that the realization of staking activities will provide the fund and its unitholders with an opportunity for yield enhancement. Through staking, the fund will earn rewards in the form of ether, which will be reflected in the net asset value of the fund through accretive yield while augmenting the fund's exposure to ether.
