The Ether Fund

Investment Objectives

The Ether Fund is a closed-end fund incorporated in Canada. The fund seeks exposure to digital currency ether and the opportunity for long-term capital appreciation. The Fund will with a convenient alternative to a direct investment in ether. The Fund will not speculate with regard to short-term changes in ether prices.

On October 19, 2023, the fund commenced staking a portion of the ether held in its portfolio. The Manager believes that the realization of staking activities will provide the fund and its unitholders with an opportunity for yield enhancement. Through staking, the fund will earn rewards in the form of ether, which will be reflected in the net asset value of the fund through accretive yield while augmenting the fund's exposure to ether.
