

3iQ Solana Staking ETF

SOLQ

Investment Objectives

The 3iQ Solana Staking ETF's investment objectives are to seek to provide unitholders of the 3iQ Solana Staking ETF with exposure to the digital asset Solana ("SOL"), and the daily price movements of the US dollar price of SOL and the opportunity for long-term capital appreciation.

The Manager believes that the realization of staking activities will provide the fund and its unitholders with an opportunity for yield enhancement. Through staking, the fund will earn rewards in the form of SOL, which will be reflected in the net asset value of the fund through accretive yield while augmenting the fund's exposure to SOL.

Certain statements in this document are forward-looking statements, including those identified by the expressions "anticipate", "believe", "plan", "estimate", "expect", "intend", "target", "seek", "will" and similar expressions to the extent they relate to the Fund and the Manager. Forward-looking statements are not historical facts but reflect the current expectations of the Fund and the Manager regarding future results or events. Such forward-looking statements reflect the Fund's and the Manager's current beliefs and are based on information currently available to them. Forward-looking statements are made with assumptions and involve significant risks and uncertainties. Although the forward-looking statements are based upon assumptions that the Fund and the Manager believe to be reasonable, neither the Fund or the Manager can assure investors that actual results will be consistent with these forward-looking statements. As a result, readers are cautioned not to place undue reliance on these statements as a number of factors could cause actual results or events to differ materially from current expectations. Some of these risks, uncertainties and other factors are described in the offering documents for the Funds under the heading "Risk Factors". These factors – many of which are beyond the Manager's control and the effects of which can be difficult to predict – include: no assurance in achieving investment objectives, loss of investment, volatility and fluctuation in value of cryptoassets, concentration risk, reliance on the Manager, no ownership interest in the cryptoasset portfolio, changes in legislation, conflicts of interest, valuation, significant redemptions, limited liquidity in the units, limited operating history, exchange rate risk, liquidity constraints on cryptoasset markets, tax risk, risks associated with blockchain networks and forks, risks associated with digital asset platforms and cybersecurity.
