To connect a boat to the sentinel ecosystem, it first needs a boat monitor installed on board. This cutting-edge device integrates seamlessly with the vessel's systems, allowing owners to monitor their boat's status in real-time through the

sentinel app. With sentinel's advanced technology, yachts can benefit from enhanced safety, efficiency, and peace of mind. And to make this possible, every boat needs a reliable installation of the boat monitor – that's where you can step in.
