01	Date of Notification	2025-06-17
02	Statement in accordance with Article 6(3) of Regulation (EU) 2023/1114	This crypto-asset white paper has not been approved by any competent authority in any Member State of the European Union. The offeror of the crypto-asset is solely responsible for the content of this crypto-asset white paper.
03	Compliance statement in accordance with Article 6(6) of Regulation (EU) 2023/1114	This crypto-asset white paper complies with Title II of Regulation (EU) 2023/1114 of the European Parliament and of the Council and, to the best of the knowledge of the management body, the information presented in the crypto-asset white paper is fair, clear and not misleading and the crypto-asset white paper makes no omission likely to affect its import.
04	Statement in accordance with Article 6(5), points (a), (b), (c) of Regulation (EU) 2023/1114	The crypto-asset referred to in this crypto-asset white paper may lose its value in part or in full, may not always be transferable and may not be liquid.
05	Statement in accordance with Article 6(5), point (d) of Regulation (EU) 2023/1114	The utility token referred to in this white paper may not be exchangeable against the good or service promised in the crypto-asset white paper, especially in the case of a failure or discontinuation of the crypto-asset project.

06	Statement in accordance with Article 6(5), points (e) and (f) of Regulation (EU) 2023/1114	The crypto-asset referred to in this white paper is not covered by the investor compensation schemes under Directive 97/9/EC of the European Parliament and of the Council or the deposit guarantee schemes under Directive 2014/49/EU of the European Parliament and of the Council.
<b>SUMMARY</b>		
07	Warning in accordance with Article 6(7), second subparagraph, of Regulation (EU) 2023/1114	<p style="text-align: center;"><b>Warning</b></p> <p>This summary should be read as an introduction to the crypto-asset white paper.</p> <p>The prospective holder should base any decision to purchase this crypto-asset on the content of the crypto-asset white paper as a whole and not on the summary alone.</p> <p>The offer to the public of this crypto-asset does not constitute an offer or solicitation to purchase financial instruments and any such offer or solicitation can be made only by means of a prospectus or other offer documents pursuant to the applicable national law.</p> <p>This crypto-asset white paper does not constitute a prospectus as referred to in Regulation (EU) 2017/1129 of the European Parliament and of the Council or any other offer document pursuant to Union or national law.</p>
08	Characteristics of the crypto-asset	<p><b>8.1 Brief Description and Purpose</b></p> <p>The tokenforge Token (“TKFG” or “TKFG tokens”) is a utility token designed for use within the tokenforge platform (“platform”). It allows issuers, who are clients of tokenforge GmbH and want to issue tokenized real-world assets (“Issuers”), to receive a 20% discount on</p>

		<p>platform service fees from tokenforge GmbH by staking TKFG tokens. The TKFG token is not mandatory for using the platform, and all services remain accessible under standard pricing.</p> <p>To benefit from the discount, Issuers must stake TKFG tokens equivalent to 20% of the estimated service costs at the time of issuance. The required amount is determined based on the average market price of TKFG on from tokenforge GmbH chosen decentralized exchanges (DEXs) at the time of staking. A liquidity pool for the TKFG token will initially be established on Uniswap. Additional decentralized exchanges (DEXs) may be integrated depending on market conditions and strategic considerations. Staked TKFG tokens remain locked for the issuance period and are released once all of the contractual obligations of the specific project are met.</p> <p>After the Token Generation Event (TGE), TKFG will be listed on the decentralized exchange (DEX) Uniswap. The initial listing price will be 0,14 € per token. Once listed, the price will fluctuate based on market supply and demand.</p> <p>The Ecosystem Growth Reserve will be managed by tokenforge GmbH and strategically support ecosystem expansion through marketing campaigns, partnerships, and grants for issuers. To maintain market stability, all token distributions from this fund will include appropriate vesting periods tailored to each partnership or initiative. This structured approach ensures that ecosystem participants remain aligned with long-term platform success while preventing concentrated selling pressure in the market.</p> <p><b><u>8.2 Rights and Obligations</u></b></p> <p>The rights and obligations associated with TKFG tokens arise from:</p> <ul style="list-style-type: none"> <li>• This white paper, outlining the token's purpose and functionality.</li> <li>• The Terms and Conditions (T&amp;C) of tokenforge GmbH, defining staking requirements and benefits.</li> </ul>
--	--	--

		<p>Holders of TKFG tokens are entitled to:</p> <ul style="list-style-type: none"> <li>• A 20% discount on platform service fees when staking the required amount at the beginning of an issuance.</li> <li>• The ability to freely transfer unstaked tokens, while staked tokens remain locked for the agreed period.</li> <li>• No redemption rights for fiat or other crypto-assets. TKFG is solely used for platform discounts.</li> <li>• To qualify for the discount, issuers must stake a sufficient amount of TKFG tokens, equivalent to 20% of the estimated service costs at the time of issuance, determined by the average market price of TKFG on decentralized exchanges (DEXs). The token will be listed on the DEX Uniswap after the Token Generation Event (TGE) with an initial price of 0,14 € per token.</li> </ul> <p><b><u>8.3 Modification of Rights and Obligations</u></b></p> <p>The agreed rights and obligations are binding for the duration of an clients issuance. Any changes to the discount model or staking requirements apply only to future agreements and do not affect TKFG tokens already staked.</p> <p><b><u>8.4 Transferability and Staking Mechanism</u></b></p> <p>Unstaked TKFG tokens are freely transferable. Staked TKFG tokens remain locked in a smart contract until the issuance period ends. Upon completion, they are released and can be reused for future staking, transferred, or withdrawn.</p> <p><b><u>8.5 Gas Fees</u></b></p> <p>All blockchain transactions related to TKFG, including staking, unstaking, and transfers, require gas fees paid by the token holder. These fees depend on Base blockchain network conditions and must be covered in Ethereum (ETH). Since the staking amount is based on</p>
--	--	---

		<p>the prevailing average market price on decentralized exchanges (DEXs), issuers should be aware of potential price fluctuations before committing their tokens.</p> <p><b><u>8.6 Future Developments</u></b></p> <p>Tokenforge GmbH may introduce additional functionalities for TKFG in compliance with regulatory requirements. Possible future use cases include:</p> <ul style="list-style-type: none"> <li>• Extended platform utilities</li> <li>• Incentive programs for ecosystem growth</li> </ul> <p>All changes will be transparently communicated to token holders.</p>
09	Information about the quality and quantity of goods or services to which the utility tokens give access and restrictions on the transferability	<p>The TKFG token is a utility token designed to provide issuers on the tokenforge platform with cost benefits when using tokenization services. While the TKFG token is not required to access the platform, issuers can stake TKFG tokens to receive a 20% discount on platform service fees.</p> <p>The discount applies to the issuance, placement, sales, and ongoing management of tokenized financial instruments and Real-World Assets (RWA) on the tokenforge platform, including:</p> <ul style="list-style-type: none"> <li>• Bonds, funds, and equity tokens structured as regulated financial instruments.</li> <li>• Asset-referenced tokens (ARTs) and utility tokens issued in compliance with Regulation (EU) 2023/1114 on Markets in Crypto-Assets (MiCAR).</li> <li>• Digitalization of key processes such as corporate actions, dividend payments, and, prospectively, shareholder voting through tokenization.</li> </ul> <p>The 20% discount is applicable to various platform services, including:</p> <ul style="list-style-type: none"> <li>• Onboarding and setup fees, covering the initial configuration of a new issuance.</li> <li>• Ongoing operational and maintenance fees, including smart contract updates and regulatory compliance.</li> </ul>

		<ul style="list-style-type: none"><li>Transaction-based fees, including one-time signing fees and annual administrative fees for corporate actions, such as interest payments.</li></ul> <p>To receive the discount, Issuers must stake TKFG tokens equivalent to 20% of their estimated service costs for the full duration of the issuance. The required amount is determined based on the average market price of TKFG on decentralized exchanges (DEXs) at the time of staking. Staked tokens remain locked during the contract period and are released upon completion.</p>																									
10	Key information about the offer to the public or admission to trading	<p><b><u>10.1 Total Maximum Supply and Allocation</u></b></p> <p>The total maximum supply of <b>TKFG tokens</b> is <b>1.000.000.000 TKFG</b>, allocated as follows:</p> <table><tr><th>Allocation</th><th>Percentage</th><th>Tokens</th><th>Cliff (Weeks)</th><th>Vesting (Weeks)</th></tr><tr><td>Early Backers (Private Sale)</td><td>10%</td><td>100.000.000</td><td>0</td><td>48</td></tr><tr><td>Public Offering</td><td>10%</td><td>100.000.000</td><td>0</td><td>48 (phase 1) 32 (phase 2)</td></tr><tr><td>VC-Pool</td><td>20%</td><td>200.000.000</td><td>0</td><td>78</td></tr><tr><td>Team</td><td>10%</td><td>100.000.000</td><td>12</td><td>78</td></tr></table>	Allocation	Percentage	Tokens	Cliff (Weeks)	Vesting (Weeks)	Early Backers (Private Sale)	10%	100.000.000	0	48	Public Offering	10%	100.000.000	0	48 (phase 1) 32 (phase 2)	VC-Pool	20%	200.000.000	0	78	Team	10%	100.000.000	12	78
Allocation	Percentage	Tokens	Cliff (Weeks)	Vesting (Weeks)																							
Early Backers (Private Sale)	10%	100.000.000	0	48																							
Public Offering	10%	100.000.000	0	48 (phase 1) 32 (phase 2)																							
VC-Pool	20%	200.000.000	0	78																							
Team	10%	100.000.000	12	78																							

		<b>Advisors</b>	2%	20.000.000	12	78
		<b>Ecosystem Growth Reserve</b>	38%	380.000.000	0	Individual terms
		<b>Liquidity</b>	10%	100.000.000	0	0
		<b>Total</b>	<b>100%</b>	<b>1.000.000.000</b>	-	-
		<p>The Ecosystem Growth Reserve initially consists of 38% of the total supply (380.000.000 TKFG tokens). However, any unsold tokens from the Public Offering will be added to this allocation, ensuring that the total supply remains unchanged and optimally allocated for ecosystem expansion.</p> <p><b><u>10.2 Details of the Private Sale and Public Offering</u></b></p> <ul style="list-style-type: none"> <li>• <b>Early Backers (Private Sale):</b> <b>100.000.000 TKFG (10% of total supply)</b> were allocated to early backers in a private sale. These tokens are subject to a <b>48-week vesting period</b>.</li> <li>• <b>Public Offering:</b> The <b>Public Offering</b> will distribute <b>100.000.000 TKFG tokens (10% of total supply)</b> over <b>two structured phases</b>, each with increasing prices (from 0,02 € - 0,04 €) and decreasing vesting periods. <ul style="list-style-type: none"> <li>○ <b>Public Offering Vesting:</b> TKFG tokens unlock progressively over <b>32 to 48 weeks</b>, depending on the purchase phase.</li> </ul> </li> <li>• <b>Other Allocations (Not part of the Public Offering):</b></li> </ul>				

		<ul style="list-style-type: none"> <li>○ <b>Team Tokens (10%)</b> are subject to a <b>78-week vesting period including a 12-week cliff</b>, to ensure long-term commitment.</li> <li>○ <b>Advisor Tokens (2%)</b> follow the same <b>vesting schedule as team tokens</b>, rewarding strategic contributions.</li> <li>○ <b>VC-Pool Tokens(20%)</b> These tokens are retained for strategic long-term institutional partnerships and are subject to a <b>78-week vesting period</b>. One institutional investor has already entered into a binding commitment to purchase TKFG tokens from the VC Pool. This purchase obligation is structured as a commitment linked to future market prices and will be executed in accordance with the terms of the investment agreement. The commitment does not affect the public offering and does not include any guarantee regarding the future market price or liquidity of the TKFG token.</li> <li>○ <b>Ecosystem Growth Reserve (38%)</b> may be allocated through individually negotiated agreements to optimally support strategic projects and partnerships. This flexible approach allows tailored vesting schedules to match the specific needs of ecosystem growth initiatives, user adoption programs, and long-term collaborations.</li> <li>○ <b>Liquidity Reserve (10%)</b> is <b>fully unlocked at listing</b> to ensure a stable market environment and efficient trading conditions. The tokens will be used for the liquidity pool on the decentralized exchanges DEXs.</li> </ul> <p><b><u>10.3 Listing Price and Trading Availability</u></b></p> <p>The Token Generation Event (TGE) does not mark the immediate start of trading. Instead, TKFG tokens will become tradable once a liquidity pool is deployed on the decentralized exchange (DEX) Uniswap, with an initial listing price of 0,14 € per TKFG token.</p> <p>Key details on TKFG trading availability:</p> <ul style="list-style-type: none"> <li>● TGE initiates token distribution but does not provide immediate liquidity.</li> <li>● A liquidity pool for the TKFG token will initially be established on Uniswap, allowing the community to engage in open-market trading.</li> </ul>
--	--	---

		<ul style="list-style-type: none"> <li>• The initial market price of 0,14 € per TKFG will be set through this liquidity pool mechanism.</li> <li>• Further exchange listings will be announced separately, based on market demand and strategic partnerships.</li> </ul>

A.7	Another identifier required pursuant to applicable national law	Not applicable.

A.8	Contact telephone number	+49 40 999 941 54	
A.9	E-Mail address	info@tokenforge.io	
A.10	Response time (Days)	5	
A.11	Parent company	Not applicable.	
A.12	Members of the management body	Markus Kluge Managing Director	Hohe Bleichen 8, 20354 Hamburg
		Moritz Stumpf Managing Director	Hohe Bleichen 8, 20354 Hamburg
A.13	Business activity	tokenforge GmbH develops and operates a white-label platform for the tokenization of Real-World Assets (RWA) and financial products. Its main activity is providing an infrastructure that enables issuers to create and manage various types of tokens securely and in compliance with regulations.	
A.14	Parent Company Business Activity	Holding, development and distribution of software solutions in the fintech sector, as well as consulting services for companies in this industry.	
A.15	Newly Established	False	
A.16	Financial Condition for the Past Three Years	tokenforge GmbH was founded in 2021 with a share capital of 25.000,00 €. Over the past three years, tokenforge GmbH has operated in a challenging market environment, shaped by evolving regulations and varying levels of adoption for tokenization solutions. Despite these	

		<p>external factors, the company has remained committed to continuous innovation and platform development.</p> <p>The figures below reflect the total operational performance of the company, including revenues and internally generated intangible assets (IGIA), such as the development of proprietary tokenization infrastructure.</p> <p>The internally generated intangible assets (IGIA) of tokenforge GmbH comprise the company's proprietary software stack, which includes smart-contract frameworks, tokenization APIs, front-end applications and integrations with regulated institutions to enable compliant investment workflows.</p> <p>These assets represent the technological foundation of all tokenforge activities and revenues.</p> <p>All revenues of tokenforge GmbH are directly derived from the commercialization and operation of these internally generated investments – including licensing of the platform, implementation projects, and service fees related to token issuance and management.</p> <p>The fluctuations are largely attributable to external market conditions and strategic reinvestments in platform development. tokenforge GmbH did not aim to generate profit in the past and all resources have been reinvested to build the tokenization infrastructure. This leads to an operational loss in 2023 and 2024.</p> <p>Operational performance and EBIT according Profit and Loss Statement (P&amp;L):</p> <ul style="list-style-type: none"> <li>• 2022: 1.289.009,11 € (Revenue.: 779.594,43 €, IGIA: 509.414,68 €), EBIT 20.385,41 €</li> <li>• 2023: 1.030.865,62 € (Revenue: 664.758,95 €, IGIA: 366.106,67 €), EBIT -247.678,31 €</li> <li>• 2024: 1.176.127,19 € (Revenue: 767.536,91 €, IGIA: 408.590,28 €), EBIT -80.635,56 €</li> </ul> <p>To support its growth and innovation, tokenforge GmbH secured 882.665,00 € in external financing in 2022 and 2024. These funds were allocated primarily to product development,</p>
--	--	--

		<p>regulatory compliance, and expanding operational capabilities.</p> <p>The company has adopted a prudent financial strategy, ensuring sufficient liquidity to cover ongoing obligations without accumulating long-term debt. As of December 31, 2024, tokenforge GmbH maintains a positive cash position, allowing for continued investment in product enhancements and market expansion.</p> <p>tokenforge GmbH remains focused on technological advancements and sustainable growth, prioritizing long-term platform development while adapting to an evolving regulatory and economic landscape.</p>
A.17	Financial Condition Since Registration	Not applicable, as tokenforge GmbH has been established for more than three years.

**Part B Information about the issuer, if different from the offeror or person seeking admission to trading**

Not applicable

**Part C - Information about the operator of the trading platform in cases where it draws up the crypto-asset white paper and information about other persons drawing the crypto-asset white paper pursuant to Article 6(1), second subparagraph, of Regulation (EU) 2023/1114**

Not applicable

Part D – Information about the crypto-asset project														
D.1	Crypto-asset project name	tokenforge GmbH's White-Label Tokenization Platform												
D.2	Crypto-assets name	tokenforge Token												
D.3	Abbreviation	TKFG												
D.4.	Crypto-asset project description	The tokenforge platform provides a white-label solution for tokenized Real-World Assets (RWA), such as financial products and tangible assets. The primary function of the TKFG token is to offer users, particularly issuers, a 20% discount on service fees associated with token issuance and management on the tokenforge platform. This discount is activated by staking TKFG tokens equivalent to 20% of the total expected fees for a given issuance period.												
D.5	Details of all natural or legal persons involved in the implementation of the crypto-asset project	<table> <thead> <tr> <th>Name</th><th>Role</th><th>Business Address</th></tr> </thead> <tbody> <tr> <td>tokenforge GmbH</td><td>Project Developer</td><td>Hohe Bleichen 8, 20354 Hamburg, Germany</td></tr> <tr> <td>Markus Kluge</td><td>Managing Director</td><td>Hohe Bleichen 8, 20354 Hamburg, Germany</td></tr> <tr> <td>Moritz Stumpf</td><td>Managing Director</td><td>Hohe Bleichen 8, 20354 Hamburg,</td></tr> </tbody> </table>	Name	Role	Business Address	tokenforge GmbH	Project Developer	Hohe Bleichen 8, 20354 Hamburg, Germany	Markus Kluge	Managing Director	Hohe Bleichen 8, 20354 Hamburg, Germany	Moritz Stumpf	Managing Director	Hohe Bleichen 8, 20354 Hamburg,

Moritz Stumpf	Managing Director	Hohe Bleichen 8, 20354 Hamburg,												

		Germany
D.6	Utility Token Classification	True
D.7	Key Features of Goods/Services for Utility Token Projects	<p>The TKFG token is a utility token that provides issuers using the tokenforge platform with access to discounted platform services. The primary benefit is a 20% cost reduction on eligible service fees when staking TKFG tokens.</p> <ol style="list-style-type: none"> <li>Discount on platform fees for the issuance and management of tokenized financial instruments The discount applies to the platform services used for the issuance and lifecycle management of tokenized financial instruments, including: <ul style="list-style-type: none"> <li>Bonds – Digital fixed-income instruments issued and managed on the tokenforge platform.</li> <li>Funds – Tokenized investment vehicles structured on the platform.</li> <li>Equity tokens – Digital shares issued via smart contracts.</li> <li>Asset-referenced tokens (ARTs) – Crypto-assets linked to underlying assets such as commodities or real estate.</li> <li>Utility tokens – Digital assets granting access to decentralized ecosystems and services.</li> </ul> </li> <li>Platform services eligible for the discount</li> </ol> <p>The 20% discount applies to fees related to the setup, operation, and management of tokenized instruments on the tokenforge platform, including:</p>

		<ul style="list-style-type: none"> <li>○ Onboarding and setup fees – One-time costs for configuring an issuance.</li> <li>○ Operational and maintenance fees – Monthly costs for infrastructure, compliance, and smart contract maintenance.</li> <li>○ Transaction-based fees: <ul style="list-style-type: none"> <li>▪ Signing fees – One-time charge at issuance.</li> <li>▪ Administrative fees – Annual charge for corporate actions, such as interest payments.</li> </ul> </li> </ul> <p>3. Staking requirements for discount eligibility</p> <p>To access the discount, Issuers must stake TKFG tokens equivalent to 20% of their estimated service costs, based on the token's average market price on decentralized exchanges (DEXs) at the time of staking.</p>
D.8	Plans for the token	<p>The TKFG token is designed as a utility token within the tokenforge ecosystem, providing Issuers with a 20% discount on platform service fees when staked. The TKFG token will be distributed through a structured multi-phase Public Offering, followed by a Token Generation Event (TGE) and a listing on decentralized exchange (DEX) Uniswap via a liquidity pool.</p> <p>Unsold TKFG tokens from the Public Offering will be allocated to the Ecosystem Growth Reserve, supporting adoption and strategic initiatives. While TKFG is initially focused on providing discounts, tokenforge GmbH reserves the right to expand its utility in the future, potentially including additional platform benefits. TKFG is integrated into the long-term roadmap of tokenforge GmbH, ensuring continuous development and adoption.</p>
D.9	Resource allocation	<p>The development and operation of the tokenforge platform and TKFG token are supported by the following resource allocations:</p>

		<ol style="list-style-type: none"> <li>1. Financial resources <ul style="list-style-type: none"> <li>○ tokenforge GmbH has secured funding through previous investments and company resources to ensure the platform's continued development and regulatory compliance.</li> <li>○ Additional financial support is provided through revenue generated by platform fees and services.</li> </ul> </li> <li>2. Technological resources <ul style="list-style-type: none"> <li>○ The tokenforge platform operates on Ethereum Virtual Machine (EVM) - compatible blockchains, ensuring flexibility, interoperability, and security for tokenized financial instruments.</li> <li>○ Smart contracts and tokenization infrastructure are developed in-house, with regular security audits conducted by independent firms to ensure reliability and compliance.</li> </ul> </li> <li>3. Human capital and strategic partnerships <ul style="list-style-type: none"> <li>○ The development team consists of blockchain engineers and regulatory specialists, ensuring both technical robustness and compliance with financial regulations.</li> <li>○ tokenforge GmbH collaborates with regulated financial service providers and legal experts to ensure that tokenized assets comply with MiFID and MiCAR requirements.</li> </ul> </li> </ol> <p>These resource allocations ensure the long-term scalability, security, and regulatory compliance of the tokenforge platform, enabling issuers to efficiently tokenize financial instruments across multiple EVM-compatible networks.</p>
D.10	Planned use of Collected funds or crypto-Assets	Funds collected from the Public Offering will be used strategically to enhance platform capabilities and ecosystem growth. The primary areas of allocation include:

		<ol style="list-style-type: none"> <li>1. Platform development and compliance – Ongoing infrastructure improvements, security audits, and regulatory alignment.</li> <li>2. Liquidity provisioning – Funding of the decentralized exchanges (DEXs) Liquidity Pool to support trading stability.</li> <li>3. Operational costs – Supporting the expansion of tokenization services and platform maintenance.</li> <li>4. Ecosystem incentives – Growth initiatives, strategic partnerships, and issuer adoption programs.</li> </ol> <p>This structured approach ensures that collected funds are used efficiently to scale the platform, enhance liquidity, and drive ecosystem adoption.</p>
--	--	---

Part E – Information about the offer to the public of crypto-assets or their admission to trading		
E.1	Public offering or admission to trading	OTPC (offer to the public)
E.2	Reasons for public offer or admission to trading	The reason for the public offer of TKFG tokens is to fund further development and scaling of the TKFG platform. Funds raised will be allocated to enhancing platform security, scalability, and expanding tokenization features.
E.3	Fundraising target	2.800.000,00 €
E.4	Minimum subscription goals	Not applicable

E.5	Maximum subscription goal	3.000.000,00 €																							
E.6	Oversubscription acceptance	False																							
E.7	Oversubscription allocation	Not applicable																							
E.8	Issue price	<p>The price of TKFG during the Public Offering follows a structured pricing model, from 0,02 € per token at the beginning of the Public Offering with the final phase reaching 0,04 € per token. After the Token Generation Event (TGE), TKFG will be listed on the decentralized exchange (DEX) Uniswap at an initial price of 0,14 € per token, after which the price will be determined by market forces.</p> <p>tokenforge GmbH reserves the right to terminate the Public Offering before all allocated tokens are sold. The Public Offering will conclude either when the full allocation is sold or at the discretion of tokenforge GmbH, depending on market conditions.</p> <table><tr><th>Public Offering Phase</th><th>Price per Token (€)</th><th>Tokens Offered</th><th>Total Value (€)</th><th>Cliff</th><th>Vesting Period (Weeks)</th></tr><tr><td>Phase 1</td><td>0,02 €</td><td>50.000.000</td><td>1.000.000,00 €</td><td>none</td><td>48 weeks</td></tr><tr><td>Phase 2</td><td>0,04 €</td><td>50.000.000</td><td>2.000.000,00 €</td><td>none</td><td>32 weeks</td></tr></table>						Public Offering Phase	Price per Token (€)	Tokens Offered	Total Value (€)	Cliff	Vesting Period (Weeks)	Phase 1	0,02 €	50.000.000	1.000.000,00 €	none	48 weeks	Phase 2	0,04 €	50.000.000	2.000.000,00 €	none	32 weeks
Public Offering Phase	Price per Token (€)	Tokens Offered	Total Value (€)	Cliff	Vesting Period (Weeks)																				
Phase 1	0,02 €	50.000.000	1.000.000,00 €	none	48 weeks

		<p>To comply with investor withdrawal rights under MiCAR (Article 13), the Token Generation Event (TGE) will occur on 2026-02-16, which is the first business day following the expiry of the 14-day withdrawal period after 2026-01-31.</p> <p><b>Vesting Terms</b></p> <p>To ensure market stability, vesting conditions apply to all TKFG tokens purchased in the Public Offering:</p> <ul style="list-style-type: none"><li>• Purchasers in earlier phases receive a lower price per token but accept a longer vesting period.</li><li>• Tokens are gradually unlocked over the respective vesting schedule, preventing large immediate sell-offs.</li><li>• The vesting period decreases in later phases, allowing purchasers closer to TGE to access liquidity sooner.</li></ul> <p><b>Justification for Differentiated Pricing</b></p> <p>The tiered pricing model ensures that early participants are compensated for their increased</p>					

		<p>market risk and longer vesting periods:</p> <ul style="list-style-type: none"> <li>• Early-phase purchasers accept longer lock-up periods, which delays their ability to transfer tokens. In return, they receive a lower purchase price as compensation.</li> <li>• Later-phase purchasers pay higher prices but benefit from earlier liquidity access.</li> </ul> <p>This model balances incentives between early adopters and later-stage purchasers while maintaining fair price discovery.</p> <p><b>Impact on Other Purchasers</b></p> <p>The Public Offering pricing model is structured to ensure fairness for all participants:</p> <ul style="list-style-type: none"> <li>• No dilution effect – The total token supply remains fixed at 1.000.000.000 TKFG, ensuring that pricing variations do not impact the total number of tokens available.</li> <li>• Market Stability – The vesting schedules prevent sudden mass sell-offs, protecting later purchasers from excessive volatility caused by early participants.</li> <li>• Price Alignment at Listing – Regardless of purchase phase, all purchasers eventually converge to the market-driven price once the token is listed, ensuring fair price discovery.</li> </ul>
E.9	Official currency or any other crypto-assets determining the issue price	EUR
E.10	Subscription fee	No applicable.
E.11	Offer price determination method	The offer price of TKFG tokens is determined through a multi-phase Public Offering model, where purchasers receive discounted pricing in earlier phases in exchange for longer vesting

		periods. The price increases by 0,02 € in each phase, starting at 0,02 € and going up to 0,04 €.
E.12	Total number of offered/traded crypto-assets	<p>The total supply of TKFG tokens is 1.000.000.000 TKFG. Of this, up to 100.000.000 TKFG tokens (10% of total supply) are allocated for sale in the Public Offering.</p> <p>The remaining tokens are allocated as follows:</p> <ul style="list-style-type: none"> <li>• 100.000.000 TKFG (10%) for Early Backers (Private Sale)</li> <li>• 100.000.000 TKFG (10%) for the tokenforge GmbH Team</li> <li>• 20.000.000 TKFG (2%) for Advisors</li> <li>• 200.000.000 TKFG (20%) for strategic Partners (VC pool token)</li> <li>• 380.000.000 TKFG (38%) for the Ecosystem Growth Reserve, plus any unsold tokens from the Public Offering</li> <li>• 100.000.000 TKFG (10%) allocated for Liquidity Provisioning</li> </ul> <p>If the full allocation of 100.000.000 TKFG is not sold during the Public Offering, the remaining unsold TKFG tokens will be transferred to the Ecosystem Growth Reserve.</p>
E.13	Targeted holders	ALL (all types of investors)
E.14	Holder restrictions	Not applicable.
E.15	Reimbursement notice	Purchasers participating in the offer to the public of crypto-asset will be able to be reimbursed if the minimum target subscription goal is not reached at the end of the offer to the public, if

		they exercise the right to withdrawal provided for in Article 13 of Regulation (EU) 2023/1114 of the European Parliament and of the Council or if the offer is cancelled.
E.16	Refund mechanism	<p>Refunds may occur under two distinct circumstances in accordance with Regulation (EU) 2023/1114 (MiCAR):</p> <p>(1) in the event of a purchaser's withdrawal under Article 13 MiCAR, or</p> <p>(2) in the event of a cancellation of the offer prior to the Token Generation Event (TGE). Both cases follow the same refund infrastructure and are handled transparently by tokenforge GmbH.</p> <p>(1) Withdrawal under Article 13 MiCAR</p> <ul style="list-style-type: none"> <li>• Purchasers may submit refund requests by e-mail to tkfg@tokenforge.io or in writing to tokenforge GmbH, Hohe Bleichen 8, 20354 Hamburg, Germany.</li> <li>• Each request is reviewed by management to confirm the purchaser's identity, eligibility and payment details.</li> <li>• Refunds are authorized under the dual-control principle by two members of the management team and executed by the person responsible for payments.</li> <li>• Refunds are processed using the same payment method (fiat or crypto).</li> <li>• All refund operations are recorded in the company's internal refund log to ensure auditability and compliance with Article 13 MiCAR.</li> <li>• A monthly report on refund activities is prepared for internal review.</li> </ul> <p>(2) Cancellation of the Offer</p> <p>A cancellation of the public offer may occur only prior to the Token Generation Event (TGE) and follows a structured process:</p> <ul style="list-style-type: none"> <li>• Decision on Cancellation: A cancellation can only be decided unanimously by all</li> </ul>

		<p>appointed managing directors (<i>Geschäftsführer</i>) of tokenforge GmbH or by resolution of the shareholders' meeting (<i>Gesellschafterversammlung</i>).</p> <ul style="list-style-type: none"> <li>• Immediate Notification of Purchasers: All purchasers will be notified without undue delay through the same communication channels used for the offer (e-mail or platform notification). The notification specifies the reason for cancellation and outlines the applicable refund process.</li> <li>• Refund Execution: Refunds in the event of cancellation are executed under the same process and governance as withdrawal refunds:</li> <li>• Temporal Limitation: As cancellation can occur only before the TGE, no tokens have been generated or distributed at that point. Therefore, no on-chain reversals or token transactions are required.</li> </ul> <p>Internal Oversight and Recordkeeping</p> <p>Both withdrawal and cancellation refunds are executed under the same internal controls, including dual authorization, logging, and monthly reporting. These measures ensure that all investors are treated fairly, transparently, and in compliance with Articles 7 and 13 of the MiCAR Regulation.</p>
E.17	Refund timeline	<p>tokenforge GmbH ensures that any refunds requested by retail purchasers exercising their right to withdraw from the purchase of TKFG tokens will be processed without undue delay.</p> <p>Refunds will be executed promptly and, in any case, no later than 14 days from the date on which tokenforge GmbH is notified of the purchaser's decision to withdraw from the purchase agreement.</p>
E.18	Offer phases	<p>The Public Offering is divided into two structured phases, with prices increasing progressively</p>

		<p>and vesting periods decreasing per phase.</p> <ul style="list-style-type: none"> <li>• Total Public Offering allocation: 100.000.000 TKFG tokens (10% of total supply)</li> <li>• Phase duration: Two distinct phases, each offering 50.000.000 TKFG tokens. Phase 1 ends, when the provided tokens are completely sold, Phase 2 ends on 2026-01-31 or when all tokens have been sold.</li> <li>• The price in the first phase will be 0,02 € per token and will increase to 0,04 € in the second and last phase.</li> <li>• Vesting structure: Longer vesting in early phases to reward early supporters while ensuring market stability.</li> </ul>
E.19	Early purchase discount	<p>The public offering of TKFG tokens is structured into two phases, each with a different price and vesting period. Purchasers in earlier phases receive a lower price per token, reflecting their long-term commitment to the project and the extended vesting schedule.</p> <p>The structured pricing and vesting model are as follows:</p> <ul style="list-style-type: none"> <li>• Phase 1: 0,02 € per token, 50.000.000 tokens, 48-week vesting</li> <li>• Phase 2: 0,04 € per token, 50.000.000 tokens, 32-week vesting</li> </ul> <p>Purchasers who acquire tokens during earlier phases receive a lower purchase price, but their tokens are subject to vesting, ensuring a gradual release over time.</p> <p>Justification for differentiated pricing: The early purchase discount rewards early adopters who support the project at an initial stage. The vesting mechanism aligns incentives by preventing immediate market liquidation, ensuring stability in the token economy.</p> <p>Impact on other purchasers: The structured pricing and vesting ensure that all purchasers participate under predefined conditions. Earlier investors accept longer lock-up periods in exchange for a lower price, while later-stage purchasers benefit from reduced vesting durations. The listing price ensures a balanced entry point for all participants after the public</p>

		offering is complete.
E.20	Time-limited offer	True
E.21	Subscription period beginning	2025-07-01 (intended)
E.22	Subscription period end	2026-01-31 (intended) or when all TKFG tokens allocated for the offer are sold.
E.23	Safeguarding arrangements for offered funds/crypto-assets	<p>tokenforge GmbH has implemented effective safeguarding measures for funds and crypto-assets collected during the public offering period.</p> <p>During the public offering, all funds and crypto-assets received from purchasers will be securely monitored and safeguarded by one or more of the following entities:</p> <ul style="list-style-type: none"> <li>• A licensed credit institution (currently Volksbank Mittelhessen in Germany), in cases where fiat funds are collected during the public offering.</li> <li>• A regulated crypto-asset service provider (CASP) that is authorized to hold and manage crypto-assets on behalf of clients. The wallet addresses will be disclosed to purchasers upon request to enable independent verification of balances.</li> </ul> <p>The safeguarding of funds is ensured through internal treasury management controls, including segregation of operational and liquidity-pool accounts and a dual-authorization procedure for outgoing payments.</p>
E.24	Payment methods for crypto-asset purchase	Purchasers wishing to acquire TKFG tokens during the Public Offering must complete the purchase through the designated tokenforge GmbH sales platform

		<p>(<a href="https://presale.tokenforge.io">https://presale.tokenforge.io</a>). The acquisition process consists of the following steps:</p> <ol style="list-style-type: none"> <li>1. Accessing the sales platform (<a href="https://presale.tokenforge.io">https://presale.tokenforge.io</a>) <ul style="list-style-type: none"> <li>● Purchasers have to register with email address for further communication.</li> <li>● Purchasers can connect a compatible self-custody EVM wallet via WalletConnect.</li> <li>● Alternatively, purchasers may provide a cold wallet or a custodian wallet for token allocation.</li> </ul> </li> <li>2. Selection of purchase option <ul style="list-style-type: none"> <li>● Purchasers select the number of TKFG tokens they wish to acquire based on availability in the current phase of the Public Offering.</li> <li>● The price per token is determined by the structured multi-phase offering model.</li> </ul> </li> <li>3. Payment methods <ul style="list-style-type: none"> <li>● Accepted payment methods include: <ul style="list-style-type: none"> <li>▪ Crypto-assets like USDC, ETH and potentially other stable coins.</li> <li>▪ Potentially Fiat currency (EUR) via credit card and payment provider.</li> </ul> </li> <li>● Payment confirmation is required before token allocation.</li> </ul> </li> <li>4. Finalization of purchase <ul style="list-style-type: none"> <li>● Once payment is received and verified, TKFG tokens will be allocated to the purchaser's registered wallet.</li> <li>● Tokens subject to vesting will be locked and gradually released according to the predefined vesting schedule.</li> </ul> </li> </ol> <p>Purchasers must ensure that their wallet is compatible with the token standard and remains accessible for token distribution. Failure to complete any of the required steps may result in the cancellation of the purchase request.</p>
--	--	---

E.25	Value transfer methods for reimbursement	Not applicable
E.26	Right of withdrawal	<p>Purchasers participating in the Public Offering of TKFG tokens have the right to withdraw their commitment during the specific offer period of the Public Offering phase in which they purchased tokens, in accordance with Article 13 of Regulation (EU) 2023/1114.</p> <p>The withdrawal period begins on the day the investor bindingly agrees to purchase the TKFG token and ends at the end of 14 calendar days. It is irrelevant whether the withdrawal period ends on a weekday, a Sunday or a public holiday. Withdrawal is possible in any form and without giving reasons and can be addressed to the following e-mail address: <a href="mailto:tkfg@tokenforge.io">tkfg@tokenforge.io</a></p> <p>Once a Public Offering phase has ended, the right of withdrawal for that phase expires, and commitments become final.</p>
E.27	Transfer of purchased crypto-assets	<p>TKFG tokens purchased during the Public Offering will be transferred to the purchaser's designated wallet after the completion of the Public Offering and the Token Generation Event (TGE).</p> <ol style="list-style-type: none"> <li>1. Wallet options <ul style="list-style-type: none"> <li>○ Purchasers using self-custody wallets can connect their EVM-compatible wallet via WalletConnect on the sales platform.</li> <li>○ Alternatively, purchasers may provide a cold wallet address or designate a custodian wallet for token allocation.</li> </ul> </li> <li>2. Token allocation timing <ul style="list-style-type: none"> <li>○ Tokens will be allocated after the Public Offering ends and the TGE takes place.</li> </ul> </li> </ol>

		<ul style="list-style-type: none"> <li>○ Tokens subject to vesting will remain locked and will be released gradually according to the predefined schedule.</li> </ul> <p>3. Smart contract execution</p> <p>Transfers will be executed automatically via smart contracts. Failure to provide a valid wallet or maintain access may result in delays or inability to receive TKFG tokens.</p>
E.28	Transfer time schedule	2026-04-30
E.29	Purchaser's technical requirements	<p>Purchasers must provide a compatible wallet for receiving TKFG tokens. The following wallet options are available:</p> <ol style="list-style-type: none"> <li>1. Self-custody wallets <ul style="list-style-type: none"> <li>○ Purchasers may connect their own EVM-compatible wallet via WalletConnect to ensure seamless interaction with the sales platform.</li> </ul> </li> <li>2. Cold wallets <ul style="list-style-type: none"> <li>○ TKFG tokens can be allocated to cold wallets, provided the purchaser ensures compatibility with ERC-20 standard tokens and transaction accessibility.</li> </ul> </li> <li>3. Custodian wallets <ul style="list-style-type: none"> <li>○ Institutional or managed custodian wallets can be designated for TKFG token allocation. Purchasers using custodian services must ensure that the wallet provider supports token deposits and withdrawals.</li> </ul> </li> </ol> <p>It is the purchaser's responsibility to ensure access to the designated wallet for future transactions.</p>

------	--------------------	--

Part G - Information on the rights and obligations attached to the crypto-assets		
G.1	Purchaser Rights and Obligations	<p>Purchasers of the TKFG token acquire property over the asset, which includes the bundle of rights under the applicable legal systems (right to use, right to transfer, etc.).</p> <p>Purchasers of the TKFG token are entitled to a 20% discount on Tokenforge platform service fees for token issuance and management, provided they meet the staking requirements. The TKFG token does not confer any ownership, voting rights, or dividend entitlements within tokenforge GmbH.</p> <p>Obligations are determined by the applicable legal system but there are no obligations intrinsic to the purchase of the TKFG token itself.</p>
G.2	Exercise of Rights and Obligations	<p>To exercise the right to a 20% discount, holders must stake TKFG tokens equal to 20% of the total expected service costs. The required number of tokens is determined based on the average market price of TKFG on a decentralized exchanges (DEXs) at the time of staking. Staking must be completed at the start of the issuance period, and tokens must remain locked for the entire period to maintain the discount.</p> <p><b>Example 1: Staking TKFG Tokens for a Single Bond Issuance on the tokenforge Platform</b></p> <p><b>Key Assumptions:</b></p> <ol style="list-style-type: none"> <li>1. Issuance Volume: 10.000.000,00 €</li> </ol>

		<p>2. Bond Duration: 4 years</p> <p>3. Annual Platform Fees: 24.000,00 € per year</p> <p>4. Signing Fee: 0.4% of the issuance volume = 40.000,00 € (one-time)</p> <p>5. Administrative Fee: 0.3% of the issuance volume per year = 30.000,00 € per year</p> <p>6. Setup Fee for the Platform: 20.000,00 € (one-time fee)</p> <p><b>Cost Breakdown:</b></p> <ul style="list-style-type: none"> <li>• Setup Fee: 20.000,00 € (allocated entirely to Bond 1)</li> <li>• Signing Fee: 40.000,00 € (one-time)</li> <li>• Platform Fees: 24.000,00 € per year × 4 years = 96.000,00 €</li> <li>• Administrative Fees: 30.000,00 € per year × 4 years = 120.000,00 €</li> </ul> <p><b>Total Costs:</b>  20.000,00 € (setup) + 40.000,00 € (signing) + 96.000,00 € (platform) + 120.000,00 € (administration) = <b>276.000,00 €</b></p> <p><b>Discount with TKFG (20%):</b>  276.000,00 € × 20% = <b>55.200,00 € savings</b></p> <p><b>TKFG Tokens Required for Staking:</b>  55.200,00 € ÷ 0,14 € per token = <b>394.286 TKFG tokens</b></p> <p><b>Unstaking of Tokens:</b></p> <p>The <b>394.286 staked TKFG tokens</b> remain locked for the <b>4-year duration</b> of the bond and are unstaked at the end of year 4, provided all conditions are met.</p>
--	--	--

		<hr/> <p><b>Example 2: Staking of TKFG Tokens for an Additional Bond Issuance on the tokenforge Platform</b></p> <p><b>Key Assumptions:</b></p> <ol style="list-style-type: none"> <li>1. Issuance Volume: 10.000.000,00 € per bond</li> <li>2. Bond Durations: <ul style="list-style-type: none"> <li>○ Bond 1: 4 years (Years 1 to 4)</li> <li>○ Bond 2: 4 years (Years 3 to 6)</li> </ul> </li> <li>3. Annual Platform Fees: 24.000,00 € per year (only once, regardless of the number of bonds)</li> <li>4. Signing Fee: 0.4% of the issuance volume = 40.000,00 € per bond (one-time)</li> <li>5. Administrative Fee: 0.3% of the issuance volume per year = 30.000,00 € per bond, per year</li> <li>6. Setup Fee for the Platform: 20.000,00 € (one-time, allocated only to Bond 1)</li> </ol> <p><b>Cost Calculation for Bond 1 (Years 1 to 4):</b></p> <ul style="list-style-type: none"> <li>• Setup Fee: 20.000,00 € (allocated entirely to Bond 1)</li> <li>• Signing Fee: 40.000,00 € (one-time)</li> <li>• Platform Fees: 24.000,00 € per year × 4 years = 96.000,00 €</li> <li>• Administrative Fees: 30.000,00 € per year × 4 years = 120.000,00 €</li> <li>• <b>Total Costs for Bond 1:</b> 20.000,00 € + 40.000,00 € + 96.000,00 € + 120.000,00 € =</li> </ul>
--	--	---

		<p><b>276.000,00 €</b></p> <ul style="list-style-type: none"> <li>• <b>Discount with TKFG (20%):</b> <math>276.000,00 \text{ €} \times 20\% = 55.200,00 \text{ € savings}</math></li> <li>• <b>Required TKFG Tokens for Staking:</b> <math>55.200,00 \text{ €} \div 0,14 \text{ €} = 394.286 \text{ TKFG tokens}</math></li> </ul> <p><b>Unstaking of tokens for Bond 1:</b> Staked <b>394.286 TKFG tokens</b> are unstaked at the <b>end of year 4.</b></p> <p><b>Cost Calculation for Bond 2 (Years 3 to 6):</b></p> <ul style="list-style-type: none"> <li>• Setup Fee: <b>0,00 €</b> (no setup fee allocated to Bond 2)</li> <li>• Signing Fee: <b>40.000,00 €</b> (one-time)</li> <li>• Platform Fees: <ul style="list-style-type: none"> <li>◦ Years 3 and 4: <b>covered by Bond 1</b></li> <li>◦ Years 5 and 6: <math>24.000,00 \text{ € per year} \times 2 \text{ years} = 48.000,00 \text{ €}</math></li> </ul> </li> <li>• Administrative Fees: <math>30.000,00 \text{ € per year} \times 4 \text{ years} = 120.000,00 \text{ €}</math></li> <li>• <b>Total Costs for Bond 2:</b> <math>40.000,00 \text{ €} + 48.000,00 \text{ €} + 120.000,00 \text{ €} = 208.000,00 \text{ €}</math></li> <li>• <b>Discount with TKFG (20%):</b> <math>208.000,00 \text{ €} \times 20\% = 41.600,00 \text{ € savings}</math></li> <li>• <b>Required TKFG Tokens for Staking:</b> <math>41.600,00 \text{ €} \div 0,14 \text{ €} = 297.143 \text{ TKFG tokens}</math></li> </ul> <p><b>Unstaking of tokens for Bond 2:</b> Staked <b>297.143 TKFG tokens</b> are unstaked at the <b>end of year 6.</b></p> <p><b>Combined Costs and Savings</b></p> <p><b>Total Costs for Both Bonds (Standard):</b></p> <ul style="list-style-type: none"> <li>• Bond 1: 276.000,00 €</li> </ul>
--	--	---

		<ul style="list-style-type: none"> <li>Bond 2: 208.000,00 €</li> <li><b>Total: 484.000,00 €</b></li> </ul> <p><b>Combined Savings with TKFG (20%):</b></p> <ul style="list-style-type: none"> <li>Bond 1: 55.200,00 €</li> <li>Bond 2: 41.600 €</li> <li><b>Total: 96.800,00 €</b></li> </ul> <p><b>Total Required TKFG Tokens for Both Bonds:</b></p> <ul style="list-style-type: none"> <li>Bond 1: 394.286 TKFG tokens</li> <li>Bond 2: 297.143 TKFG tokens</li> <li><b>Total Tokens Staked: 691.429 TKFG tokens</b></li> </ul> <p><b>Purpose of the Administrative Fee</b></p> <p>The administrative fee of 0.3% per year covers:</p> <ul style="list-style-type: none"> <li><b>Corporate actions</b>, including annual interest payments to bondholders</li> <li><b>Investor communication</b>, including updates, reports, and notifications</li> </ul> <p><b>Summary</b></p> <p>With the inclusion of market-standard fees (0.4% signing fee, 0.3% annual administrative fee), the issuer's costs and savings are as follows:</p> <p><b>Bond 1:</b></p>
--	--	--

		<ul style="list-style-type: none"> <li>• Total Costs: 276.000,00 €</li> <li>• Savings with TKFG: 55.200,00 €</li> <li>• TKFG Tokens Staked: 394.286 tokens (unstaked at the end of year 4)</li> </ul> <p><b>Bond 2:</b></p> <ul style="list-style-type: none"> <li>• Total Costs: 208.000,00 €</li> <li>• Savings with TKFG: 41.600,00 €</li> <li>• TKFG Tokens Staked: 297.143 tokens (unstaked at the end of year 6)</li> </ul> <p>Combined, the issuer saves 96.800,00 € in fees over the duration of both bonds by staking <b>691.429 TKFG tokens</b>. All staked tokens are returned at the end of each bond's term, ensuring flexibility for future projects.</p>
G.3	Conditions for modifications of rights and obligations	<p>The rights and obligations associated with the TKFG token are determined at the time of purchase and staking. Any modifications to discount rates, staking requirements, or other token-related conditions will apply exclusively to future staking agreements and will not affect tokens that are already staked under pre-existing terms.</p> <p>Each staking event constitutes a separate contractual commitment. This means that clients who have staked TKFG tokens under specific conditions retain those conditions for the entire staking period. Any adjustments to staking requirements or discount rates will only apply to new issuances where staking has not yet commenced.</p>
G.4	Future public offers	Not applicable.
G.5	Issuer retained crypto-assets	A portion of the TKFG token supply is retained by the issuer and key stakeholders, following structured vesting schedules to ensure long-term commitment to the platform's development.

		<p>The retained allocations are distributed as follows:</p> <ul style="list-style-type: none"> <li>• Team Allocation (10%): <ul style="list-style-type: none"> <li>• Subject to a 78-week vesting period including a 12-week cliff.</li> <li>• Ensures alignment with platform growth and development milestones.</li> <li>• (For full details, see F.6 Crypto-Asset Characteristics.)</li> </ul> </li> <li>• Advisors (2%): <ul style="list-style-type: none"> <li>• Same vesting structure as the team allocation (78-week vesting including a 12-week cliff).</li> <li>• Designed to retain experienced professionals supporting the ecosystem.</li> </ul> </li> <li>• VC Pool (20%): <ul style="list-style-type: none"> <li>• The VC Pool consists of 200,000,000 TKFG tokens and is subject to a 78-week vesting period. These tokens are retained for strategic long-term institutional partnerships and remain non-transferable until the vesting schedule applies. One institutional investor has already entered into a binding commitment to purchase TKFG tokens from this pool. This commitment is linked to future market prices and will be executed in accordance with the terms of the investment agreement. The commitment does not affect the public offering and does not include any guarantee regarding the future market price or liquidity of the TKFG token.</li> </ul> </li> <li>• Ecosystem Growth Reserve (38%): <ul style="list-style-type: none"> <li>• Strategic reserve to support partnerships, incentives, and long-term ecosystem development.</li> <li>• Vesting will be governed by individual agreements tailored to the specific requirements and timelines of the supported projects or partners.</li> <li>• (See F.6 Crypto-Asset Characteristics for allocation details.)</li> </ul> </li> <li>• Liquidity Reserve (10%): <ul style="list-style-type: none"> <li>• Fully unlocked at the Token Generation Event (TGE).</li> <li>• Provides initial liquidity for exchange listings and market stability.</li> </ul> </li> </ul>
--	--	--

G.6	Utility token classification	True
G.7	Key features of goods/services of utility tokens	The TKFG token provides access to discounted platform services for clients. This includes a 20% reduction in fees related to token issuance and management on the tokenforge platform, which can be accessed by staking TKFG tokens.
G.8	Utility tokens redemption	The TKFG token is redeemed indirectly by providing staking-based discounts within the tokenforge platform. Tokens staked by users do not represent a direct exchange for services but enable access to discounts, improving cost efficiency for clients.
G.9	Non-trading request	True
G.10	Crypto-assets purchase or sale modalities	After the offer to the public, the TKFG token can be purchased or sold on designated decentralized exchanges (DEXs).
G.11	Crypto-assets transfer restrictions	<p>Pre-TGE: No TKFG tokens exist before the Token Generation Event (TGE); consequently, no transfer is possible before the TGE.</p> <p>At TGE (mint and allocation): Upon TGE, all TKFG tokens — including presale allocations — are minted or transferred into audited vesting smart contracts in accordance with the vesting schedule described in the token allocation and vesting plan of this whitepaper.</p> <p>Vesting restrictions: Tokens that have not yet vested remain non-transferable. Transferability is automatically enabled once the respective vesting milestone or linear release condition has been reached. Vested tokens become freely transferable to the holder's designated wallet.</p> <p>Presale tokens: Presale tokens are included in the audited vesting contracts and become transferable only upon vesting, as defined in the allocation and vesting plan.</p> <p>VC Pool tokens are subject to a 78-week vesting period and remain non-transferable until the respective vesting releases have been reached.</p>

		<p>Staking for utility discount: To activate the TKFG utility discount, holders may stake tokens in the amount and for the duration defined in the applicable project-specific discount terms. During the staking period, staked tokens are non-transferable. They become transferable again automatically after the end of the staking term.</p> <p>Technical enforcement: All vesting and staking restrictions are implemented and verifiable on-chain via the respective smart contracts. Transfers of locked or staked tokens are technically restricted through contract-level whitelisting and transfer-hook logic until the release or unstaking conditions are met.</p>
G.12	Supply adjustment protocols	False
G.13	Supply adjustment mechanisms	Not applicable.
G.14	Token value protection schemes	False
G.15	Token value protection scheme description	Not applicable.
G.16	Compensation schemes	False
G.17	Compensation scheme description	Not applicable.
G.18	Applicable law	German law, unless otherwise required by mandatory provisions of applicable consumer protection or private international law.
G.19	Competent court	The competent court for any legal disputes shall be the courts of Hamburg, Germany, unless

		otherwise required by mandatory provisions of applicable consumer protection or private international law.
--	--	--

Part H — Information on the underlying technology		
H.1	Distributed ledger technology (DLT)	<p>The TKFG token is issued on Base, a Layer 2 network built on Ethereum using the OP Stack developed by Optimism. The token complies with the ERC-20 standard, enabling compatibility with the Ethereum ecosystem, including wallets, smart contracts, and decentralized applications.</p> <p>Base is a public and permissionless network, allowing unrestricted access for users and developers. This ensures transparency, interoperability, and broad usability of the token infrastructure.</p>
H.2	Protocols and technical standards	<p>The TKFG token adheres to the ERC-20 token standard as defined within the Ethereum ecosystem. This includes standardized functions for token transfers, approvals, and balance management, enabling seamless integration with compliant wallets, custody providers, and decentralized applications. Smart contract code is publicly verifiable and deployed on a transparent and auditable infrastructure.</p>
H.3	Technology used	<p>Base utilizes the OP Stack, an open-source framework maintained by Optimism, to implement an Optimistic Rollup architecture. This design allows for off-chain transaction execution with periodic submission of data to Ethereum for finality and data availability. The OP Stack ensures modularity, Ethereum compatibility, and scalability, while retaining full access to Ethereum's tooling and security assurances.</p>
H.4	Consensus mechanism	<p>Base does not operate its own consensus mechanism. Instead, it relies on Ethereum for settlement, finality, and security. Ethereum uses a Proof of Stake (PoS) consensus model, in</p>

		<p>which validators confirm transactions and secure the network. While Base currently uses a centralized sequencer operated by Coinbase to order transactions, the underlying infrastructure remains public and permissionless, and long-term decentralization of sequencing is anticipated within the rollup roadmap.</p>
H.5	Incentive mechanisms and applicable fees	<p>Users on Base pay Layer 2 transaction fees for execution and Layer 1 posting fees for data availability on Ethereum. These fees are significantly lower than on Layer 1 due to batching and compression.</p> <p>Fee structures may include:</p> <ul style="list-style-type: none"> <li>• L2 execution fees</li> <li>• L1 data posting fees</li> <li>• Application-specific service fees (e.g. token issuance)</li> </ul> <p>Base leverages the efficiency of the OP Stack while maintaining Ethereum-grade security, ensuring scalability and economic sustainability for applications built on top.</p>
H.6	Use of Distributed Ledger Technology	False.
H.7	DLT Functionality Description	Not applicable.
H.8	Audit	False.
H.9	Audit outcome	Not applicable.

Part I — Information on risks		
I.1	Offer-related risks	<p><b><u>Issuer-related Risks:</u></b></p> <p>The value and functionality of the TKFG token are directly tied to the actions and success of tokenforge GmbH. If tokenforge GmbH fails, ceases operations, or cannot maintain its platform and services, the TKFG token may lose its intended utility and could become worthless.</p> <p><b><u>Financial Stability and Operational Risks:</u></b></p> <p>The TKFG token's value depends on the financial health and operational capabilities of tokenforge GmbH. If the company faces liquidity shortages, funding difficulties, or rising operational costs, it may impact the platform's development and service continuity, thereby reducing the token's usability and demand.</p> <p><b><u>Dependence on Key Personnel:</u></b></p> <p>The success of tokenforge GmbH heavily relies on its leadership and technical expertise. The loss of key personnel – especially those in executive or technology roles – could disrupt operations and impact the company's ability to meet its commitments. A lack of succession planning could exacerbate this risk.</p> <p><b><u>Strategic and Business Model Risks:</u></b></p> <p>The tokenization industry is highly dynamic, requiring continuous adaptation to evolving regulations, customer needs, and technological advancements. If tokenforge GmbH fails to align its business model with market trends, it may experience reduced platform adoption, negatively affecting the demand and utility of the TKFG token.</p> <p><b><u>Risk of Competitors:</u></b></p>

		<p>Other companies may replicate or improve upon tokenforge GmbH's business model, potentially reducing its market share. Increased competition could limit platform adoption and the effectiveness of the TKFG token's discount mechanism.</p> <p><b><u>Regulatory Compliance and Legal Risks (MiCAR Compliance):</u></b></p> <p>As the issuer of a utility token, tokenforge GmbH must comply with Markets in Crypto-Assets Regulation (MiCAR) and other relevant financial regulations. Changes in regulatory frameworks specific to token issuance, tokenized financial instruments, or financial services may impose additional compliance obligations, operational constraints, or legal risks. Regulatory non-compliance could impact the functionality of TKFG and its market acceptance.</p> <p><b><u>Custodial and Reimbursement Risks:</u></b></p> <p>The TKFG token is primarily designed for self-custody, meaning purchasers are responsible for securing their assets. If tokens are stored with third-party custodians, there is a risk of insolvency, security breaches, or operational failures affecting token retrieval. Additionally, reimbursement mechanisms mandated under MiCAR require proper execution, and delays or technical issues may affect timely refunds.</p> <p><b><u>Team Vesting Risks:</u></b></p> <p>A portion of TKFG tokens is allocated to the team and advisors, with a structured vesting period to ensure long-term alignment. However, potential risks include unforeseen departures, changes in management, or strategic misalignment, which could impact market confidence and tokenholder trust.</p> <p><b><u>Price Risk and Token Allocation:</u></b></p> <p>The public offering comprises only a fraction of the total TKFG tokens in circulation. A significant portion of tokens was allocated at earlier, lower prices (or for free), which could impact price stability. Any large-scale sales by early holders or team members after vesting periods could create downward pressure on the token price.</p>
--	--	--

		<p><b><u>Liquidity and Listing Risks:</u></b></p> <p>While TKFG will be listed on a decentralized exchange (DEX), listing does not guarantee active market participation or liquidity. Purchasers may experience difficulty in selling their TKFG tokens at desired prices due to no or low trading volumes or price slippage.</p> <p><b><u>Risk of Conflicts of Interest:</u></b></p> <p>tokenforge GmbH retains a significant portion of TKFG tokens for ecosystem development and liquidity provision. The company's decisions regarding token sales, strategic reserves, or buybacks may impact the market price and investor confidence.</p> <p><b><u>Management and Governance Risks:</u></b></p> <p>Poor strategic decisions, lack of governance oversight, or mismanagement of financial and operational resources could affect the long-term viability of tokenforge GmbH and, consequently, the TKFG token. In an extreme case, insolvency of tokenforge GmbH could render the TKFG token non-functional.</p> <p><b><u>Reputation Risk:</u></b></p> <p>Negative publicity, legal disputes, regulatory investigations, or service failures could impact the reputation of tokenforge GmbH, leading to loss of confidence in the platform and the TKFG token. A deterioration in public perception may reduce demand and adoption of the token.</p> <p><b><u>Market Concentration and Liquidity Risk:</u></b></p> <p>The introduction of a 20% VC Pool leads to the fact that a significant share of the token supply may be held by a small number of holders. Their sales, transfers, or changes in liquidity provision can materially affect market price and tradable liquidity, leading to sharp volatility and potential losses, especially around vesting unlocks or in stressed markets. You may be unable to exit positions without substantial price impact.</p>
--	--	--

I.2	Issuer-related risks	Not applicable, as the issuer is the same as the offeror (see I.1).
I.3	Crypto-assets-related risks	<p>The TKFG token, as a utility token, is subject to various risks that may affect its valuation, liquidity, security, regulatory status, and overall usability. The following risks outline key factors that could impact the token and its holders.</p> <p><b><u>Market Volatility:</u></b></p> <p>The market price of TKFG (if any) may fluctuate significantly due to demand within the tokenforge platform and broader crypto-market conditions. Volatility may result from external economic factors, regulatory changes, or shifts in investor sentiment. These fluctuations can cause token prices to drop and even become worthless within a very short period of time.</p> <p><b><u>Limited Fungibility and Trading Risks:</u></b></p> <p>At the time of the public offering of TKFG tokens, there is no established market price, as the tokens will not be immediately listed on an exchange. The token is planned to be listed on the decentralized exchange (DEX) Uniswap after the Token Generation Event (TGE). However, there is no guarantee of sufficient liquidity or trading volume, which could impact the ability of holders to sell or trade TKFG tokens at desired prices. Additionally, price discovery in early trading phases may be subject to high volatility, price slippage, and potential market manipulation.</p> <p><b><u>Limited Utility and Usability Outside the Platform:</u></b></p> <p>The TKFG token serves as a discount mechanism for tokenforge platform services. The prices for these services are determined directly by tokenforge GmbH. While TKFG tokens will be freely transferable after vesting, their value and demand are directly tied to platform adoption and service usage, determined by tokenforge GmbH. A decline in user engagement or tokenization services could reduce token demand. The TKFG token is not redeemable for fiat currency within the platform, and its usability in external ecosystems remains limited.</p> <p><b><u>Dependence on Blockchain Infrastructure:</u></b></p> <p>The TKFG token operates on the Base blockchain (ERC-20 standard), meaning its functionality is dependent on the stability, security, and efficiency of the blockchain network.</p>

		<p>Risks associated with blockchain infrastructure include:</p> <ul style="list-style-type: none"> <li>• Network congestion or technical failures, which may impact transaction speed and increase transaction costs.</li> <li>• Potential blockchain forks or protocol changes, which could require adjustments to TKFG's smart contracts.</li> <li>• Reliance on third-party nodes and validators, introducing risks related to centralization, validator failures, or malicious activities.</li> </ul> <p><b><u>Blockchain Security Risks:</u></b></p> <p>As a blockchain-based asset, the TKFG token is exposed to cybersecurity risks, including hacking, data breaches, or smart contract vulnerabilities. If the underlying smart contracts contain flaws, they could be exploited by malicious actors, leading to financial losses for token holders. Despite security audits, unforeseen vulnerabilities could still pose risks to token security and functionality.</p> <p><b><u>Jurisdictional Restrictions:</u></b></p> <p>Regulations regarding crypto-assets vary across different jurisdictions. Some countries may impose restrictions on the trading, holding, or usage of TKFG tokens. Purchasers must ensure that they comply with local legal requirements before acquiring or using the token.</p> <p><b><u>Innovation and Market Relevance Risk:</u></b></p> <p>The blockchain and tokenization industry is evolving rapidly. Emerging technologies, new regulatory frameworks, or competitive solutions may affect the long-term relevance of the TKFG token. If tokenforge GmbH fails to continuously adapt to industry trends, the token's value and demand may decline over time.</p> <p><b><u>Lack of Ownership or Governance Rights:</u></b></p> <p>Holding TKFG tokens does not grant equity, voting rights, or decision-making control over tokenforge GmbH. Token holders have no influence over business strategies, pricing models, or platform governance. Changes to platform fees, services, or token utility may occur without direct input from TKFG holders.</p>
--	--	---

I.4	Project implementation-related risks	<p><b><u>Development and Deployment Risk</u></b></p> <p>The success of the TKFG token depends on the effective and timely development of the tokenforge platform. Delays in development, unforeseen technical challenges, or failure to implement planned features could negatively affect the platform's ability to deliver services as intended. If core functionalities are not developed or deployed as planned, the token's utility may be diminished.</p> <p><b><u>Scalability and Performance Risk</u></b></p> <p>As adoption of the tokenforge platform increases, scalability and performance limitations may emerge. High transaction volumes or unexpected demand surges could lead to network congestion, slower processing times, or degraded platform performance. These issues could limit the usability of the TKFG token, affecting user experience and overall market confidence.</p> <p><b><u>Dependence on External Partnerships and Service Providers</u></b></p> <p>tokenforge GmbH relies on third-party service providers and technology partners for critical functions, including blockchain infrastructure, liquidity provision, and regulatory compliance services. Failures, security breaches, insolvency, or operational issues affecting these external providers could disrupt platform services, impacting the utility and availability of the TKFG token.</p> <p><b><u>Funding Risks</u></b></p> <p>The further development and maintenance of the tokenforge platform require sufficient financial resources. tokenforge GmbH depends on revenues from platform services, external funding, and market adoption. Economic downturns, reduced investor confidence, or unexpected financial challenges could impact the company's ability to sustain platform operations and technological advancements. If tokenforge GmbH is unable to secure sufficient funding, it may be forced to scale back platform development, reducing the TKFG token's long-term viability.</p> <p><b><u>Technological and Integration Risk</u></b></p> <p>Integrating blockchain-based infrastructure with existing financial and legal systems presents technological and compatibility challenges. Changes in blockchain protocols, security vulnerabilities, or unforeseen technical constraints could delay or restrict platform features,</p>
-----	--------------------------------------	---

		<p>directly affecting the usability of the TKFG token.</p> <p><b><u>Regulatory Compliance for Project Implementation</u></b></p> <p>The legal and regulatory landscape for tokenization and blockchain services continues to evolve. New regulatory requirements or changes in interpretation could impose additional compliance burdens on tokenforge GmbH. This may include restrictions on token offerings, modifications to token-based services, or new licensing requirements. Non-compliance with these regulations could lead to penalties, service limitations, or operational restrictions, all of which could affect the functionality and marketability of the TKFG token.</p>
I.5	Technology-related risks	<p><b><u>Blockchain and Smart Contract Vulnerability</u></b></p> <p>The TKFG token's smart contracts are susceptible to coding vulnerabilities, bugs, or security flaws that could be exploited by malicious actors. A breach in the smart contract could result in unauthorized transactions, token loss, or manipulation of staking mechanisms, affecting the token's security and trust among holders. Even though security audits are conducted, unforeseen vulnerabilities may still pose a risk.</p> <p><b><u>Cybersecurity and Data Breach Risks</u></b></p> <p>As a blockchain-based asset, the TKFG token is exposed to cybersecurity threats such as hacking, phishing attacks, and data breaches. If attackers compromise tokenforge GmbH's infrastructure or the wallets of token holders, this could result in financial losses, operational disruptions, and reputational damage.</p> <p><b><u>Dependency on Underlying Blockchain Stability and Performance</u></b></p> <p>The TKFG token operates on the Base blockchain (ERC-20 standard), meaning its functionality depends on the stability and efficiency of this network. Risks include:</p> <ul style="list-style-type: none"> <li>• Network congestion, which may lead to higher transaction fees or slower confirmation times.</li> <li>• Technical failures, blockchain reorgs, or forks, which could impact token transfers and</li> </ul>

		<p>staking mechanisms.</p> <ul style="list-style-type: none"> <li>• Reliance on third-party validators and node operators, which may introduce security vulnerabilities or service disruptions.</li> </ul> <p><b><u>Wallet and Private Key Risk</u></b></p> <p>TKFG token holders are responsible for the custody of their tokens in a compatible cryptographic wallet and for securing their private keys. Loss of a private key means permanent loss of access to the TKFG tokens, with no possibility of recovery. If a holder connects their wallet to malicious applications or platforms, they risk unauthorized access to their assets.</p> <p><b><u>Technology Obsolescence Risk</u></b></p> <p>Blockchain technology is rapidly evolving. If tokenforge GmbH's platform does not adapt to new standards, interoperability solutions, or emerging security protocols, the TKFG token's utility and competitive relevance may diminish over time. New blockchain innovations could introduce more efficient tokenization models, potentially reducing demand for the TKFG token.</p> <p><b><u>Risk of Technical Failures and Downtime</u></b></p> <p>Technical issues, such as server outages, software bugs, or API failures, could lead to platform downtime, transaction delays, or staking errors. If prolonged, such failures may disrupt user confidence and limit access to the TKFG token's functionality.</p> <p><b><u>Data Privacy and Compliance Risk</u></b></p> <p>tokenforge GmbH processes user data in compliance with applicable data protection laws, such as the General Data Protection Regulation (GDPR). Failure to adequately protect user information could lead to regulatory penalties, loss of user trust, and potential restrictions on platform operations. Any data breaches or non-compliance with privacy regulations may impact the long-term adoption of TKFG token-based services.</p>
--	--	--

I.6	Mitigation measures	<p><b><u>Smart Contract Audits and Security Measures</u></b></p> <p>All smart contracts related to the TKFG token have undergone an independent security audit conducted by SolidProof GmbH, a German blockchain-security firm specializing in smart-contract verification.</p> <p>The audit was completed prior to the Token Generation Event (TGE) and covered the full source code base of all relevant contracts, including staking, vesting, transfer, and discount mechanisms.</p> <p>It verified compliance with established security standards, reviewed access-control logic, and confirmed the integrity of contract interactions and upgrade paths.</p> <p>The public audit summary is available at:</p> <p><a href="https://app.solidproof.io/projects/tokenforge">https://app.solidproof.io/projects/tokenforge</a></p> <p>In addition to the external audit, tokenforge GmbH conducts regular internal code reviews, test deployments, and version-control monitoring to ensure that all deployed contracts remain consistent with the audited code base and maintain operational integrity over time.</p> <p><b><u>Cybersecurity Framework</u></b></p> <p>tokenforge GmbH has implemented a multi-layered cybersecurity strategy, including encryption, regular security assessments, and robust access control measures. Protection against phishing attacks, malware, and unauthorized access is prioritized to safeguard both platform operations and user assets.</p> <p><b><u>ISO 27001 Certification and Information Security Compliance</u></b></p> <p>tokenforge GmbH is certified under ISO 27001:2025, confirming compliance with internationally recognized information-security management standards for risk assessment, data protection, and cybersecurity resilience. This certification ensures adherence to internationally recognized information security management standards, including risk</p>
-----	---------------------	--

		<p>assessment, data protection, and cybersecurity resilience.</p> <p><b><u>Incident Response and Contingency Planning</u></b></p> <p>A structured incident response plan is in place to address potential security breaches, smart contract failures, and operational disruptions. This includes predefined escalation procedures, forensic analysis protocols, and corrective action mechanisms to minimize potential damages.</p> <p><b><u>Compliance with Regulatory Standards</u></b></p> <p>The TKFG token is issued under the Markets in Crypto-Assets Regulation (MiCAR) framework and aligns with applicable EU regulations for crypto-assets. Compliance measures include monitoring regulatory developments, implementing necessary legal adjustments, and ensuring adherence to financial and anti-money laundering (AML) obligations.</p> <p><b><u>Blockchain Stability and Redundancy Measures</u></b></p> <p>To mitigate risks associated with blockchain network congestion or disruptions, the TKFG token is issued on the Base blockchain, an Ethereum Layer-2 solution with high transaction efficiency. The platform maintains contingency protocols to address potential forks, blockchain failures, or network security concerns.</p> <p><b><u>Private Key and Custody Risk Awareness</u></b></p> <p>tokenforge GmbH provides guidance and educational materials to users on securing their wallets and private keys. The platform supports wallet connection mechanisms, reducing the risk of manual errors when entering wallet addresses. While tokenforge GmbH does not offer custodial services, users are encouraged to adopt secure storage solutions such as hardware wallets or trusted third-party custodians.</p> <p>On the issuer side, all company-controlled wallets and treasuries are secured through multi-signature SAFE smart-contract architecture, requiring joint authorization for any outgoing transaction. This on-chain control mechanism prevents unilateral transfers, ensures transparent transaction governance, and mitigates key-compromise risk at the organizational</p>
--	--	---

		<p>level.</p> <p><b><u>Governance and Internal Risk Management</u></b></p> <p>To address risks related to financial stability, operational continuity, and strategic decision-making, tokenforge GmbH has established internal governance structures and risk monitoring frameworks. Key areas of focus include liquidity management, revenue planning, and continuous evaluation of business risks.</p> <p><b><u>Vesting Mechanisms for Team and Early Backers (Private Sale)</u></b></p> <p>To align the interests of key stakeholders with the long-term success of the TKFG token, a structured vesting schedule has been implemented. Team allocations, advisor grants, and early backer distributions are subject to predefined vesting periods to prevent excessive token supply from entering the market at once. This mechanism reduces short-term price volatility and ensures that contributors remain engaged with the project. The vesting schedule provides gradual token unlocks over a set period, mitigating risks related to sudden token dumps and ensuring a sustainable market.</p> <p><b><u>Continuous Market Monitoring and Ecosystem Adaptation</u></b></p> <p>The tokenforge platform actively monitors market conditions, technological advancements, and competitive developments to ensure long-term relevance. Adjustments to platform features, pricing models, and token utility will be made in response to evolving industry trends and regulatory requirements.</p> <p><b><u>Safeguarding during offer and withdrawal period</u></b></p> <p>Collected fiat funds are held in segregated collection accounts at a CRR institution with dual authorisation for outgoing payments. Collected crypto-assets are received to issuer-controlled wallets (information made available upon request) and secured via SAFE/multisig.</p>

<b>Part J – Information on the sustainability indicators in relation to adverse impact on the climate and other environment-related adverse impacts</b>		
J1	Adverse impacts on climate and other environment-related adverse impacts	Information referred to Commission Delegated Regulation (EU) 2025/422 with regard to regulatory technical standards specifying the content, methodologies and presentation of information in respect of sustainability indicators in relation to adverse impacts on the climate and other environment-related adverse impacts (see S.1 – S.36)

<b>Mandatory information on principal adverse impacts on the climate and other environment-related adverse impacts of the consensus mechanism</b>		
N	Field	Content
General Information		
S.1	Name	tokenforge GmbH
S.2	Relevant legal entity identifier	LEI 52990019QB3NF3E16D03
S.3	Name of the crypto assets	TKFG Token
S.4	Consensus Mechanism	N/A. Tokens do not have their own consensus mechanisms. TKFG's consensus mechanism relies on its base layer, Base is an L2 network which also does not have a consensus mechanism (it leverages the OP Stack) but relies on Ethereum as its own base layer, ultimately utilising a Proof of Stake (PoS) consensus mechanism.
S.5	Incentive Mechanisms and Applicable Fees	N/A. Tokens do not have incentive mechanisms to secure transactions nor associated fees, as this is handled by the base layers.

S.6	Beginning of the period to which the disclosure relate	N/A as this token has not yet been minted
S.7	End of the period to which the disclosure relates	N/A as this token has not yet been minted
Mandatory key indicator on energy consumption		
S.8	Energy consumption	0,36829 kWh per calendar year
S.9	Energy consumption sources and methodologies	<a href="http://www.micacryptoalliance.com/methodology">www.micacryptoalliance.com/methodology</a>
Supplementary key indicators on energy and GHG emissions		
S.10	Renewable energy consumption	0,3431249554
S.11	Energy intensity	0,0000013423 kWh per transaction
S.12	Scope 1 DLT GHG emissions – controlled	0,00 t CO <sub>2</sub> eq per calendar year
S.13	Scope 2 DLT GHG emissions – purchased	0,00012 t CO <sub>2</sub> eq per calendar year
S.14	GHG Intensity	0,0000004474 kg CO <sub>2</sub> eq per transaction
Sources and methodologies		
S.15	Key energy sources and methodologies	<a href="http://www.micacryptoalliance.com/methodology">www.micacryptoalliance.com/methodology</a>
S.16	Key GHG sources and methodologies	<a href="http://www.micacryptoalliance.com/methodology">www.micacryptoalliance.com/methodology</a>

Optional information on the principal adverse impacts on the climate and on other environment-related adverse impacts of the consensus mechanism			
N	Field	Content	
Optional Indicators			
S.17	Energy mix	Energy source	Percentage {DECIMAL-11/10}
		Bioenergy	0,0327551658
		Coal	0,1841243121
		Gas	0,3130247892
		Hydro	0,0963914923
		Nuclear	0,1323794138
		Other Fossil	0,0273465295
		Other Renewables	0,0026209419
		Solar	0,0610944953
		Wind	0,1502628600
S.19	Carbon intensity	0,33330 kg CO2eq per kWh	
S.22	Generation of waste electrical and electronic equipment (WEEE)	0,0000000805 t per calendar year	

S.23	Non-recycled WEEE ratio	0,6055006672
S.24	Generation of hazardous waste	0,00000000004 t per calendar year
S.25	Generation of waste (all types)	0,0000000805 t per calendar year
S.26	Non-recycled waste ratio (all types)	0,6055006672
S.27	Waste intensity (all types)	0,0000002935 g per transaction
S.29	Impact of the use of equipment on natural resources	Land use: 0,89491 m <sup>2</sup>
S.31	Water use	0,00158 m <sup>3</sup> per calendar year
S.32	Non-recycled water ratio	0,7228903252
