

NEW ZEALAND PEACHARINES

A Peacharine is a natural blend of both peach and nectarine, the two most popular summer season stone fruits.

A medium to large fruit, they have an intense perfume and a sweet, juicy old-fashioned flavour.

Combining the smooth, soft skin of a nectarine, and the firm golden orange flesh of a peach, you get the best of both fruits rolled into one.

NB: Label not to scale.

Whilst delicious eaten fresh, they are also stunning stewed/preserved or as an ingredient in a range of sweet and savoury dishes, where any stone fruit would be used.

Peacharines are high in carotene and vitamin C and other health giving properties.
