GT Oxy 3%

For plant health and clean growing.

Benefits

GROW, TREAT, CONTROL AND CLEAN.

- ✓ **Strengthens roots** by increasing oxygen in the root zone for healthier, more vigorous growth and stronger plants.
- ✓ **Treats root rot** by targeting harmful bacteria and fungi that thrive in low-oxygen root zones.
- ✓ **Helps prevent algae** by reducing green water and build-up in reservoirs and tanks.
- ✓ **Sanitises growing spaces** by breaking down organic build-up on pots, trays and equipment.
- ✓ **Controls fungus gnat larvae** in the growing medium with regular drenching.
- ✓ **Supports plantlets** by maintaining hygiene and root development during acclimatisation.
- ✓ **Breaks down cleanly** into water and oxygen, leaving no harmful residues behind.

growth technology

GUIDE

GT Oxy 3% is a 3% hydrogen peroxide solution, developed for horticultural use. It breaks down cleanly into water and oxygen, leaving no harmful residues.

GROW / ROOT HEALTH

50ml per litre of water

Mix and water into growing medium every second watering to boost oxygen and support root development.

TREAT / ROOT ROT

Equal parts GT Oxy 3% and water

Drench the medium to eliminate anaerobic pathogens and aid recovery, repeating after 7 days if symptoms persist.

CONTROL / FUNGUS GNAT LARVAE

150ml per litre of water

Drench the growing medium thoroughly, then repeat after 7 days to eliminate any larvae still present.

CONTROL / ALGAE

15ml per litre of water

Add to the hydroponic reservoir to help prevent algae build-up and maintain a clean, healthy system.

CLEAN / EQUIPMENT

Use undiluted

Soak, wipe and rinse pots, tools and trays to leave equipment clean, sanitised and ready to use.

PLEASE NOTE

SPOT TEST BEFORE FULL APPLICATION.
DO NOT APPLY UNDILUTED TO FOLIAGE.

STORE SECURELY IN A WELL-VENTILATED, COOL
PLACE AWAY FROM SUNLIGHT. CAUTION: KEEP OUT
OF REACH OF CHILDREN. REFER TO THE SDS AND
READ SAFETY DIRECTIONS BEFORE USE.

"Since incorporating GT Oxy 3% into our propagation and tissue culture work, it's become an essential part of our routine. We now have clean tools, clean media, and healthy roots from lab to nursery production."

ROB / PIKIE'S PLANTS / AUSTRALIA

the oxygen effect

Every use of GT Oxy 3% draws on the same principle: as a powerful oxidiser, it releases oxygen wherever it's applied. That oxygen feeds roots through regular watering, disrupts the low-oxygen conditions behind root rot, and clears algae and organic build-up from water and equipment. The same product, applied at different strengths, handles each task. This is what GT Oxy 3% is designed to do: grow, treat, control and clean. It suits hydroponics, propagation and tissue culture, at every stage of growing.

AVAILABLE IN 1 LITRE / 5 LITRES
