Reliable

- **5+ years of battery life!** Monitors powered with solar panel + li-ion battery.
- **No long trips to replace batteries** or turn off monitors after the season.

Flexible

- **Designed for every size sugarbush** — monitors connect to any base station, so easily add more for full coverage.
- **Cover any number of site locations**, with 3 to 10,000 devices per base station. Easily add more any time.

Solid

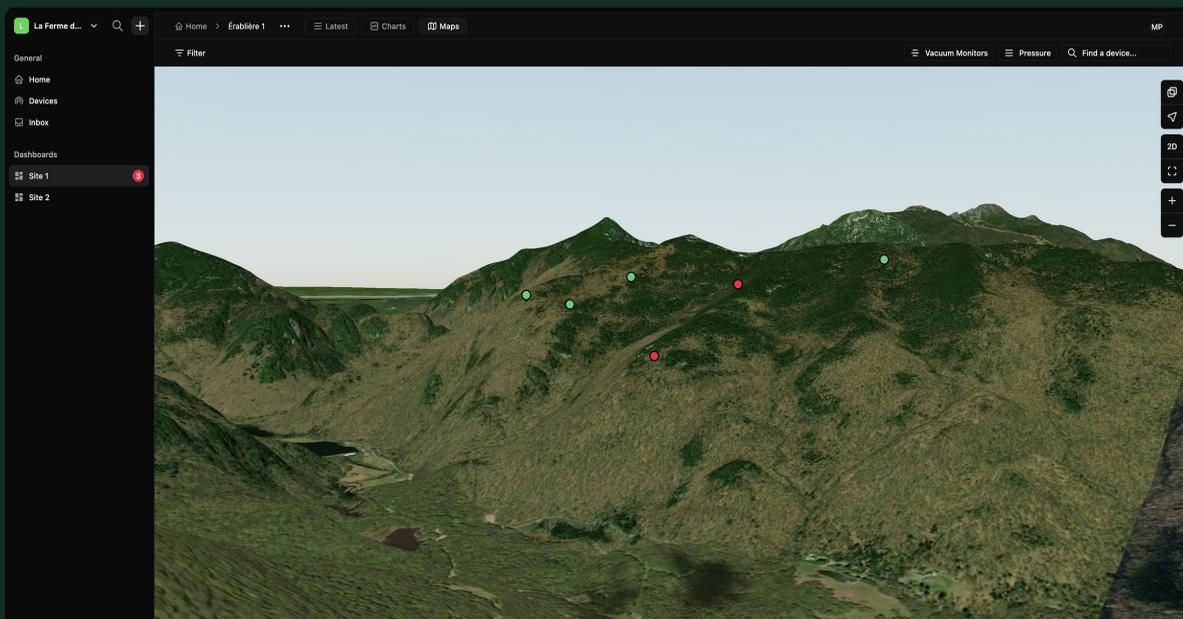

- **No external antenna** that can easily break.
- **Leave it out year-round** — even in extreme cold or heat.

Accurate

- **Field data available in minutes** via the app, so you can make better decisions more quickly.
- **Strong and stable connection** designed for even the most remote locations with minimal cellular coverage.

Simple

- **Install in 3 minutes or less** — easy “Plug and Play.”
- **Customizable** to support your unique orchard operation. Design your perfect solution.
- **Easy to service** by replacing an individual sensor or monitor.

Products

Combine the right sensors to monitor your sugarbush. Add more of any type of sensor at any time - however many you need.

Universal Base Station

Transmit your monitor data to the cloud. Solar power kit available. Connects via cellular, ethernet, or base station mesh.

Universal Monitor

Plug in any sensor and wirelessly monitor your sugarbush, connecting to the Universal Base Station.

Vacuum Pressure Sensor

Measure the vacuum pressure of your mainlines. Connects to the Universal Monitor.

Pressure Sensor

Measure pressure across RO membranes, transfer pump lines, or track level of enclosed tanks. Connects to the Universal Monitor.

ATMOS Weather Station

Measure weather conditions across your sugarbush with ATMOS by METER Group. Connects to the Universal Base Station.

Ultrasonic Level Sensor

Track the fill level of your open top tanks. Get Automatic alerts for critical tank levels. Connects to the Universal Monitor.
