

## Immunisation in pregnancy – resources to support positive conversations

There are a wide range of resources available for vaccinators administering antenatal immunisations.

The links below will help you to check you are using up-to-date resources that are most appropriate for the vaccines you administer and the community you serve.

Helpful resources	
IMAC resources	Midwives Immunisation toolkit  Provides a quick summary of key information to assist midwives in immunisation during pregnancy - with links to relevant resources and websites, including online education resources. tinyurl.com/4fek8z7t
	Free course – maternal immunisation essentials for midwives  A free short course providing information for midwives and senior midwifery students, intended to help them to increase their knowledge and confidence in supporting hapū māmā in their decisions around vaccinations. Includes sections on practical issues of vaccine administration and cold chain designed for midwives who are administering vaccines. It provides 4-5 hours of professional development. <a href="mailto:tinyurl.com/58j3yy7m">tinyurl.com/58j3yy7m</a>
