

# NetSuite Health Check Guide

**Even strong setups can drift over time,  
slowing users down and creating  
manual work.**

Our Health Check finds small issues  
before they become big problems,  
helping your team move faster, smoother,  
and smarter.

# Why Companies Engage Stockton10

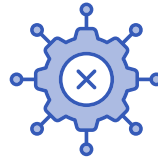

## Post-Go-Live Friction

Slower workflows and user frustration.

## Missed Opportunities

Underused Netsuite features.

## Integration Issues

Broken or delayed system syncs.

## Growth Needs

Netsuite hasn't kept up with Business changes.

## What We Assess

### Post-Go-Live Friction

AP, AR and month-end close processes Spreadsheet reliance outside NetSuite

### Integrations

Health of connections to third-party apps

### Operations

Order-to-cash, procure-to-pay, inventory workflows impact of customizations

### System Speed and Reliability

Load times, error rates and architecture review

### Reporting

Dashboards, KPIS, real-time visibility

### Security

Permissions structure and data protection
