xero

1 Subscriptions

"**Maxio** is great for SaaS reporting. They have a good onboarding process and client care is great even after implementation. What they lack in AI functionality, they make up for with customer support."

maxio.com

HubSpot

2 CRM

*"**HubSpot** is really good for comms tracking and workflow automation. We can set up tasks and actions, not just in terms of sales activities, but even workflows of processes that interact between apps."*

hubspot.com

3 HR & Payroll

*"**EmploymentHero** has a large library of documentation and they also have a tool where staff can draw on their pay in advance – it takes that headache away from me. I probably could use the system better if I put time into learning all the functionalities."*

employmenthero.com

4 Reporting

*"**Joiin** is fantastic for consolidating multiple Xero databases."*

joiin.co

Mayday

5 Intercompany

*"I just love how **Mayday** facilitates intercompany recs and harmonises the COA, especially when acquiring businesses or dealing with legacy entities. It's so easy to implement, it's really intuitive, and it doesn't pretend to be a million things."*

6

Business Ops

*"With **PowerBI**, I can consolidate all financial and non-financial data, although we needed a financial analyst to help us with the initial set-up."*
