

At TheBeanCounters we focus on four services to assist you and your business:

- System Scoping & Design
- System Implementation & Integration
- Process Automation
- PowerBI Reporting

We pride ourselves on a high-quality service, helping you reduce the risks of changing systems, and resolving issues or hurdles as and when they arise.

Tyler is an experienced Accounting Partner & CFO with a demonstrated track record of improving or maintaining high performance finance, HR, payroll and IT functions. He is skilled at developing sustainable processes and installing systems to optimise business performance and reporting. Coupled with a history of intensive automation or eradication of low value tasks to enable lean and efficient processes.

Our aim is to make business simple.

Our team has moved over 200 businesses to market leading, integrated, and automated systems.

We work side by side with you to improve your business functions. We adapt to each client's needs, so they get the most cost-effective service to the quality they require.

To enable the best priced service and a fair outcome, we work on hourly rates. This helps ensure success of the project but to also adapt the service offering as your team becomes more comfortable with the new systems and processes.

Our system implementation and transition program typically follow these 5 key stages:
