

Covered Vehicle Transporter

The AKFS Covered Vehicle Transporter provides a secure and dependable solution for transporting high-value cars and specialist automotive vehicles. Designed for businesses that require complete confidence during transit, it combines robust construction with practical features that help protect valuable vehicles from collection through to delivery.

Whether transporting classic cars, prestige vehicles, performance cars or specialist automotive assets, every AKFS Covered Vehicle Transporter is engineered to provide the protection, security and reliability professional operators demand. Its enclosed body, practical loading arrangement and durable construction help ensure vehicles arrive in the same condition they left.

The fully enclosed beavertail body is complemented by a lightweight aluminium extruded floor with anti-slip grip tape, 8-foot load-certified aluminium loading ramps and heavy-duty lashing points to support safe, efficient vehicle loading and secure restraint. LED work lights improve visibility when loading and unloading in poor light, helping operators work safely throughout the day.

Built on chassis cabs from leading commercial vehicle manufacturers, every AKFS Covered Vehicle Transporter is tailored to your application rather than supplied as a standard conversion. From chassis selection through to the finished vehicle, our Product Specialists work with you to specify a transporter that delivers the protection, payload and operational performance your business requires, both today and into the future.

Built Without Compromise

Standard Features:

- Covered body structure for protection from weather and road exposure
- Closed aluminium deck with beavertail
- Aluminium extruded flooring with barley-seed grip plates and grip tape
- 8-foot load-certified aluminium ramps
- Eight surface-mounted securing points
- Vehicle securing straps
- LED lighting within the covered load area

Optional Features:

- Electric winch system
- Aluminium helper ramps
- Rear barn doors
- Lockable storage locker
- Rear parking sensors

What chassis options are available?

AKFS works with leading commercial vehicle manufacturers to provide the most appropriate chassis for your application. Selecting the right chassis helps ensure your conversion delivers the payload, performance and durability your operation demands, while providing the flexibility to support your business both today and in the future.

If you have a preferred chassis manufacturer or a specific operational requirement, our Product Specialists will be happy to discuss the options available and help specify the right vehicle for your application.
