

Enclosed Vehicle Transporter

The AKFS Enclosed Vehicle Transporter provides a premium solution for transporting high-value, prestige and specialist vehicles. Designed for operators who require complete confidence throughout every journey, it combines advanced chassis engineering with a fully enclosed body to provide exceptional protection, security and reliability.

Whether transporting classic cars, supercars, competition vehicles or specialist automotive assets, every AKFS Enclosed Vehicle Transporter is engineered to minimise loading angles while maximising vehicle protection throughout transit. Its enclosed body safeguards valuable vehicles from road debris, adverse weather and unwanted attention, helping ensure they arrive in the same condition they left.

Built on the proven AL-KO low-floor chassis conversion, exclusive to Fiat and Peugeot back-to-back chassis cabs, the vehicle delivers outstanding stability, generous payload capacity and excellent driving characteristics. The tapered floor design, composite closed-cell tailgate, heavy-duty lashing points and vehicle securing straps provide safe, efficient loading and secure vehicle restraint, while integrated LED work lights improve visibility during loading and unloading.

Available in 3500kg, 4500kg and 5500kg GVW, every AKFS Enclosed Vehicle Transporter is tailored to your application rather than supplied as a standard conversion. From chassis selection through to the finished vehicle, our Product Specialists work with you to specify a transporter that delivers the protection, payload and operational performance your business requires both today and into the future.

Built Without Compromise

Standard Features:

- Closed deck with beavertail
- 8-foot load-certified aluminium ramps
- Eight surface-mounted securing points
- Vehicle securing straps
- LED lighting within the enclosed load area

Optional Features:

- Electric winch system
- Aluminium helper ramps
- Lockable storage locker
- Reversing camera with mirror monitor
- DVR camera system
- Rear parking sensors

What chassis options are available?

The AKFS Enclosed Vehicle Transporter is built on the proven AL-KO low-floor chassis conversion, available on Fiat and Peugeot back-to-back chassis cabs. This lightweight yet exceptionally strong platform provides excellent stability, generous payload capacity and low loading heights, making it ideally suited to transporting high-value vehicles safely and efficiently.

If you have a preferred chassis manufacturer or specific operational requirements, our Product Specialists will be happy to discuss the options available and help specify the right vehicle for your application.
