

Ultra® 4500kg Car Transporter

The AKFS Ultra® 4500kg Car Transporter is a purpose-engineered vehicle transport solution, developed for professional operators who require greater carrying capacity for a broader range of modern vehicles. Building on the established Ultra® range, it combines increased carrying capacity with lightweight engineering, practical loading characteristics and everyday usability.

As vehicle weights continue to evolve, particularly across larger cars, SUVs and battery electric vehicles, some operators are finding that the carrying capacity available within the 3500kg GVW category can restrict the vehicles and jobs they are able to accept. The Ultra® 4500kg has been developed to help bridge the gap between a 3500kg transporter and larger 7200kg or 7500kg vehicles, providing another option for heavier mainstream vehicle movements.

With an unladen weight from 2052kg, the Ultra® 4500kg has been engineered to make effective use of its available gross vehicle weight while retaining the practical characteristics associated with the Ultra® range. Its extended wheelbase, built-in helper ramps, 8-foot load-certified aluminium ramps and multiple securing points combine to provide a practical loading and transportation solution for demanding day-to-day operations.

Built on the proven AL-KO chassis conversion, every AKFS Ultra® Car Transporter can be configured around your operational requirements. From selecting the most appropriate vehicle specification through to loading, securing, storage and optional equipment, our Product Specialists work with you to deliver a transporter matched to the vehicles you need to move and the work your business undertakes.

Built Without Compromise

Standard Features:

- Deck and ramp configuration designed to accommodate vehicles with low front spoilers
- 8-foot load-certified aluminium ramps with built-in helper ramps
- Extended wheelbase to support effective weight distribution across the front and rear axles
- 3+3 plank bed
- Eight surface-mounted securing points
- Vehicle securing straps
- Aluminium front crash bar

Optional Features:

- Electric winch system with wireless remote upgrade
- Punched decking for over-wheel securing straps
- Lockable storage locker
- Compact LED light bar
- LED work lights
- LED front flasher units in the front grille
- Closed deck
- Wheel chocks
- Rear parking sensors

What chassis options are available?

The AKFS Ultra® 4500kg Car Transporter is built using the Fiat Ducato and proven AL-KO chassis conversion, providing a purpose-engineered platform for the 4500kg GVW application.

The combination of the Fiat Ducato cab, AL-KO chassis conversion and AKFS lightweight transporter body has been developed to provide the carrying capacity, practical loading characteristics and everyday usability required by professional vehicle transport and recovery operators.

If you have specific operational or specification requirements, our Product Specialists will be happy to discuss the available options and help configure the right Ultra® 4500kg solution for your business.
